Religious Pluralism And Religious Education:

Religious Pluralism and Religious Education Norma H. Thompson, 1988 *Encountering Religious Pluralism in School and Society* Thorsten Knauth, *Civility, Religious Pluralism and Education* Vincent Biondo, Andrew Fiala, 2013-12-17 This book focuses on the problem of religious diversity civil dialogue and religion education in public schools exploring the ways in which atheists secularists fundamentalists and mainstream religionists come together in the public sphere examining how civil discourse about religion fit within the ideals of the American political and pedagogical systems and how religious studies education can help to foster civility and toleration **Peace Education and Religious Plurality** Robert Jackson, Satoko Fujiwara, 2013-10-18 Does religion bring peace or war In order to discuss this fundamental question it is essential to reflect upon religious education that shapes the views of religion among young generations This book has developed from the special panel on Religious Education and Peace for the 19th World Congress of the International Association for the History of Religions IAHR the largest international organization in religious studies which took place in Tokyo in March 2005 Its international contributors discuss the kinds of religious education used for peace education that is attempted or needed in their respective societies faced with tensions and conflicts not only between different religions but also between religion and secularism This is the first book in the field that includes both Asian and Western writers from Korea Japan Indonesia Israel Germany Spain UK and USA It is an innovative attempt to build a bridge between the study of religion religious education and peace education This book was previously published as a special issue of British Journal of Religious Education **Religion and Schooling in Contemporary America** Thomas C. Hunt, James C. Carper, 1997 First Published in 1998 Routledge is an imprint of Taylor Francis an informa company **Rethinking Religious Education and Plurality** Robert Jackson, 2013-02 This book offers a critical view of approaches to the treatment of different religions in contemporary education in order to devise approaches to teaching and learning and to formulate policies and procedures that are fair and just to all **Religious Education in a Plural, Secularised Society. A Paradigm Shift** Leni Franken, Patrick Loobuyck, 2011 Many European societies are characterised by increasing forms of secularisation and religious diversity This results in a paradigm shift with regard to religious education For a long time the main aim of religious education was clearly to educate children in their own religious tradition Today the aims of religious education are much broader contributing to pupils general education Allgemeinbildung and preparing them for participation as a citizen in the future multicultural society As a result the following question arises in many countries how can teaching into religion be transformed into or complemented by learning about and learning from the study of religions This book brings several distinguished authors in the field of religious education together to reflect on this paradigm shift The book is divided into two parts The first part is rather descriptive and gives an informative and up to date overview of the different discussions about religious education in several European countries The second part is a normative reflection on the question of how religious

education should be organised in plural secularised societies This book is very important for the discussion about religious education Its comparative approach combined with the interdisciplinary dialogue between the different schools in the field of religious education make this book highly recommendable for everyone who is interested in the state of the art and the future of religious education in Europe Didier Pollefeyt full professor in theology and religious education at the Catholic University of Leuven

Religious Education and the Challenge of Pluralism Adam B. Seligman, 2014-09-01 The essays in this volume offer a groundbreaking comparative analysis of religious education and state policies towards religious education in seven different countries and in the European Union as a whole They pose a crucial question can religious education contribute to a shared public sphere and foster solidarity across different ethnic and religious communities In many traditional societies and even in what are largely secular European societies our place in creation the meaning of good and evil and the definition of the good life virtue and moral action are all primarily addressed in religious terms It is in fact hard to come to grips with these issues without recourse to religious language traditions and frames of reference Yet religious languages and identities divide as much as unite and provide a site of contestation and strife as much as a sense of peace and belonging Not surprisingly different countries approach religious education in dramatically different ways Religious Education and the Challenge of Pluralism addresses a pervasive problem how can religious education provide a framework of meaning replete with its language of inclusion and community without at the same time drawing borders and so excluding certain individuals and communities from its terms of collective membership and belonging The authors offer in depth analysis of such pluralistic countries as Bulgaria Israel Malaysia and Turkey as well as Cyprus a country split along lines of ethno religious difference They also examine the connection between religious education and the terms of citizenship in the EU France and the USA illuminating the challenges of educating our citizenry in an age of religious resurgence and global politics

Religious Education Ednan Aslan, Margaret Rausch, 2018-06-06 The authors of this volume examine theory and practice regarding past and present roles of Jewish Christian and Islamic religious education in nurturing tolerance interpreted as mutual respect for and recognition of other groups in Eastern Albania Bulgaria Kosovo Macedonia Moldova Montenegro and Romania and Western Finland Germany Italy Latvia and Spain Europe Israel Nigeria and Uzbekistan They also explore potential roles of religion and exclusivism in fostering Islamic state NGOs etc but also averting Islamic legal theory authority Sufism etc radicalization and of secular states in allowing but also banning minority religious education in public schools With contributions from Friedrich Schweitzer Martin Rothgangel Gerhard Langer Daniela Stan Arto Kallioniemi Juan Ferreiro Galguera Maria Chiara Giorda Rossana M Salerno Viorica Gora Postic Constantin Iulian Damian Valentin Ilie Dzintra Ili ko Ayman Agbaria Zilola Khalilova Raid al Daghistani Osman Ta tan Moshe Ma oz Adriana Cupcea Muhamed Ali R diger Lohlker and Dele Ashiru The Editors Ednan Aslan is the Chair of Islamic Theological studies at the University of Vienna where he is a Professor for Islamic Education Margaret Rausch is scholar researcher and university

instructor in the field of Islamic and Religious Studies Teachers Responding to Religious Diversity in Europe.
Researching Biography and Pedagogy Anna van der Want, Cok Bakker, Ina ter Avest, Judith Everington, 2009 Currently all European societies are experiencing a transformation process towards greater cultural and religious pluralisation Teachers need new answers to turn religious diversity into a resource for peaceful coexistence not a cause of misunderstanding division and hostility Through a qualitative approach we follow the different strategies of teachers to cope with religious diversity in the classrooms of six European countries from Estonia to France from Norway to England from Germany to the Netherlands The juxtaposition of biographical information on the teachers together with their views on religious diversity and their strategies in responding to it provides a well rounded and extremely attractive impression of the attitudes of teachers in Europe The role of the teacher takes on great significance He or she has to meet the twin demands of offering both a solid basis of factual information and the opportunity to formulate individual interpretations and opinions The readers of this book are offered the opportunity to gain insight into the field of the study at two levels They can access the findings of the analyses of the respective national contexts and the European comparison At the same time they are able to study portraits of all of the teachers interviewed in the course of the project so that the collation of data is complemented by insight into the human perspective and the influence of national contexts This is valuable for readers as it offers material for discussions and seminars in the field of education on two very different levels the portraits as working material
