often off by many hundreds or even thousands of years Volume 1 of a proposed seven volumes **The Man of Sin** Kim Riddlebarger,2006-06-01 The doctrine of the Antichrist is one of the most interesting doctrines found in Scripture says author Kim Riddlebarger Unfortunately it is also one which has been subject to far more speculation than sound biblical exegesis Until now Unlike other resources available on the Antichrist The Man of Sin focuses on Scripture not contemporary events to uncover the truth about this mysterious entity With skilled exegesis Riddlebarger asserts that contrary to popular speculation the Antichrist is not a singular individual but a series of beings that will arise to challenge Christ throughout the inter advental age before culminating in an end times Antichrist Backing this claim first in Scripture Riddlebarger also draws from historical teachings including those of the church fathers the Reformation and historic Protestantism before contrasting this evidence to the sensational interpretations of many contemporary writers Pastors teachers and study groups wanting to understand the doctrine of the Antichrist will find The Man of Sin to be a unique and comprehensive study

Empirico-Statistical Analysis of Narrative Material and its Applications to Historical Dating A.T. Fomenko,2013-11-11 Today the methods of applied statistics have penetrated very different fields of knowledge including the investigation of texts of various origins These texts may be considered as signal sequences of different kinds long genetic codes graphic representations which may be coded and represented by a text as well as actual narrative texts for example historical chronicles originals documents etc One of the most important problems arising here is to recognize dependent text i e texts which have a measure of resemblance arising from some kind of common origin For instance in pattern recognition problems it is essential to identify from a large set of patterns a pattern that is closest to a given one in studying long signal sequences it is important to recognize homogeneous subsequences and the places of their junction This includes in particular the well known change point problem which is given considerable attention in mathematical statistics and the theory of stochastic processes As applied to the study of narrative texts the problem of recognizing dependent and independent texts e g chronicles leads to the problem of finding texts having a common source i e the same original such texts are naturally called dependent or on the contrary having different sources such texts are naturally called independent Clearly such problems are exceedingly complicated and therefore the appearance of new empirico statistical recognition methods which along with the classical approaches may prove useful in concrete studies e g source determination is welcome ... *Catalogue of Printed Books* British Museum. Brandon,2010-06-01 What lies between the authoritative preeminence of the Mother Church of Jerusalem and the virtual extinction both of its life and apparently of all its local records Dr Brandon finds that the full significance of the fall of Jerusalem in AD 70 has been strangely neglected amongst scholars In this original and exhaustive study he shows that this catastrophic event was of profound importance not only for the development of early Christianity but possibly also for its very

survival Besides an ordered survey of other ancient historians this book demonstrates an extensive study of New Testament origins and many will find special interest in the light it throws upon the origin and purpose of canonical works This book faces serious problems of New Testament study that have generally been too easily dismissed and it makes a definite and original contribution towards their solution
