Resilience Of Conservative Religion The Case Of Popular Conservative Protestant Congregations:

The Resilience of Conservative Religion Joseph B. Tamney, 2002-02-11 The recent growth and popularity of conservative churches contradicts the idea that late modern societies have outgrown the need for such relics of the past as traditionalist religions In this book Joseph Tamney offers an explanation for this this apparent incongruity by looking at the case of growing popular conservative Protestant congregations in the United States His findings represent a synthesis of ideas from supporters of secularization theory and from those who stress the competitive market of churches in America as a factor in church growth

Religion and Knowledge Mathew Guest, Elisabeth Arweck, 2016-04-15 Religions have always been associated with particular forms of knowledge often knowledge accorded special significance and sometimes knowledge at odds with prevailing understandings of truth and authority in wider society New religious movements emerge on the basis of reformulated often controversial understandings of how the world works and where ultimate meaning can be found Governments have risen and fallen on the basis of such differences and global conflict has raged around competing claims about the origins and content of religious truth Such concerns give rise to recurrent questions faced by academics governments and the general public How do we treat statements made by religious groups and on what basis are they made What authorities lie behind religious claims to truth How can competing claims about knowledge be resolved Are there instances when it is appropriate to police religious knowledge claims or restrict their public expression This book addresses the relationship between religion and knowledge from a sociological perspective taking both religion and knowledge as phenomena located within ever changing social contexts It builds on historical foundations but offers a distinctive focus on the changing status of religious phenomena at the turn of the twenty first century Including critical engagement with live debates about intelligent design and the new atheism this collection of essays brings recent research on religious movements into conversation with debates about socialisation reflexivity and the changing capacity of social institutions to shape human identities Contributors examine religion as an institutional context for the production of knowledge as a form of knowledge to be transmitted or conveyed and as a social field in which controversies about knowledge emerge

Religion and Modern Society Bryan S. Turner, 2011-03-31 Religion is now high on the public agenda with recent events focusing the world's attention on Islam in particular This book provides a unique historical and comparative analysis of the place of religion in the emergence of modern secular society Bryan S Turner considers the problems of multicultural multi faith societies and legal pluralism in terms of citizenship and the state with special emphasis on the problems of defining religion and the sacred in the secularisation debate He explores a range of issues central to current debates the secularisation thesis itself the communications revolution the rise of youth spirituality feminism piety and religious revival Religion and Modern Society contributes to political and ethical controversies through discussions of cosmopolitanism religion and globalisation It concludes with a pessimistic analysis of the erosion of the social in modern society and the inability of new religions to

provide social repair **Religious Fundamentalism** Peter Herriot, 2008-09-25 How does a religious fundamentalist come to embrace a counter cultural world view Fundamentalism can be analysed from a variety of perspectives It is a type of belief system which enables individuals to make sense of their lives and provides them with an identity It is a social phenomenon in which strictly religious people act according to the norms values and beliefs of the group to which they belong It is a cultural product in the sense that different cultural settings result in different forms of fundamentalism And it is a global phenomenon in the obvious sense that it is to be found everywhere and also because it is both a reaction against and also a part of the globalising modern world Religious Fundamentalism deals with all of these four levels of analysis uniquely combining sociological and psychological perspectives and relating them to each other Each chapter is followed by a lengthy case study and these range from a close textual analysis of George W Bush s second inaugural speech through to a treatment of Al Qaida as a global media event This book provides a comprehensive social scientific perspective on a subject of immense contemporary significance and should be of use both to university students and also to students of the contemporary world

Christianity and the University Experience Mathew Guest, Kristin Aune, Sonya Sharma, Rob Warner, 2013-09-12 What impact does the experience of university have on Christian students Are universities a force for secularisation Is student faith enduring or a passing phase Universities are often associated with a sceptical attitude towards religion Many assume that academic study leads students away from any existing religious convictions heightening the appeal of a rationalist secularism increasingly dominant in wider society And yet Christianity remains highly visible on university campuses and continues to be a prominent identity marker in the lives of many students Analysing over 4 000 responses to a national survey of students and nearly 100 interviews with students and those working with them this book examines Christianity in universities across England It explores the beliefs values and practices of Christian students It reveals how the university experience influences their Christian identities and the influence Christian students have upon university life Christianity and the University Experience makes fascinating reading for anyone interested in the survival and evolution of religion in the contemporary world It offers fresh insights relevant to those working with Christian students including churches chaplaincies and student organisations as well as policy makers and university managers interested in the significance of religion for education social responsibility and social cohesion **Secularization and Its Discontents** Rob Warner, 2010-10-21

Secularization and Its Discontents provides an illuminating overview of major current debates in the sociology of religion exploring changing patterns of religious practice in the West during the past 150 years Examining classical secularization theory as well as modified versions that allow for difference between national and social contexts Rob Warner also explores the proposed post secularization paradigm as well as its close offshoot rational choice theory Possibilities for a spiritual revolution and the feminisation of religion are scrutinised and also theories of the durability of conservative religion The author goes on to develop a new interpretation of resilient religion from an analysis of 21st century trends in religious participation These are

categorised as entrepreneurial and experiential therapeutic before the volume finally focuses upon individual identity construction through autonomous religious consumption This book provides a clear and penetrating overview of theoretical frameworks and develops a new theoretical synthesis derived from fresh examination of empirical data and will be of interest to academics and students in religious studies practical theology and the sociology of religion The Devil's Music Randall J. Stephens, 2018-03-19 Randall Stephens traces rock's inspiration to the Pentecostal churches where Elvis Little Richard and others worshipped Faith which served as a vehicle for whites' fears led them to condemn the godless music of blacks and hippies But in a reversal of strategy evangelicals later embraced Christian rock as a way to project Jesus's message

Godly Ambition Alister Chapman, 2014 British Christian leader John Stott was one of the most influential figures of the evangelical movement during the second half of the twentieth century Called the pope of evangelicalism by many he helped to shape a global religious movement that grew rapidly during his career He preached to thousands on six continents Millions bought his books and listened to his sermons In 2005 Time included him in its annual list of the 100 most influential people in the world Alister Chapman chronicles Stott's rise to global Christian stardom The story begins in England with an exploration of Stott's conversion and education then his ministry to students his work at All Souls Langham Place London and his attempts to increase evangelical influence in the Church of England By the mid 1970s Stott had an international presence leading the evangelical Lausanne movement that attracted evangelicals from almost every country in the world Chapman recounts how Stott challenged evangelicals' habitual conservatism and anti-intellectualism showing his role in a movement that was as dysfunctional as it was dynamic Godly Ambition is the first scholarly biography of Stott Based on extensive examination of his personal papers it is a critical yet sympathetic account of a gifted and determined man who did all he could to further God's kingdom and who became a Christian luminary in the process **The Transformative Power of**

Faith Erin Dufault-Hunter, 2012-04-26 The Transformative Power of Faith examines how and why some people particularly those coming out of highly self-destructive violent and antisocial backgrounds who appear beyond repair experience profound personal transformation through conversion to strong faith Illustrated by stories of converts who came out of serious drug addiction gangs and poverty through adherence to a demanding faith Erin Dufault-Hunter argues for a narrative approach to conversion This holistic theoretical perspective offers an alternative epistemological stance to reductionistic models sometimes perpetuated among social scientists and religious ethicists alike In this study the narrative lens gives vision of the religious Other a depth and complexity too often lacking Such an approach allows a deeper understanding of the dynamics of personal transformation in ways that make sense of psychological and social factors without ignoring so-called spiritual ones

Religious Commodifications in Asia Pattana Kitiarsa, 2007-11-09 This book addresses the growing academic concerns of the market religion convergences in Asia Bringing together a group of leading scholars from Asia Europe Australia and North America it discusses multiple issues regarding religious commodifications and their

consequences across Asia's diverse religious traditions. Covering key issues in the anthropology and sociology of contemporary Asian religion, it draws theoretical implications for the study of religions in the light of the shift of religious institutions from traditional religious beliefs to material prosperity. The fact that religions compete with each other in a market of faiths is also at the core of the analysis. The contributions show how ordinary people and religious institutions in Asia adjusted to and negotiated with the penetrative forces of a global market economy into the region's changing religious cultural landscapes. An excellent contribution to the growing demands of ethnographically and theoretically updated interpretations of Asian religions. *Religious Commodifications in Asia* will be of interest to scholars of Asian religion and new religious movements.
