Retinoids, Differentiation and Disease Jonathan Nugent, Sarah Clark, 1985 *Retinoids, Differentiation and Disease* Jonathan Nugent, Sarah Clark, 2009-09-14 The Novartis Foundation Series is a popular collection of the proceedings from Novartis Foundation Symposia in which groups of leading scientists from a range of topics across biology chemistry and medicine assembled to present papers and discuss results The Novartis Foundation originally known as the Ciba Foundation is well known to scientists and clinicians around the world **Chemistry and Biology of Synthetic Retinoids** Marcia I. Dawson, 2018-01-18 The purpose of this book is to present an overview of advances in both retinal and retinoic acid synthetic chemistry and biology Chapters are written by research workers who are active in these fields Emphasis is placed on structure activity relationships It includes topics of cell differentiation maintenance of cell morphology and vision This reference contains a special section on assays which were developed to measure retinoid activity This book is ideal for those interested in the fields of photobiology organic chemistry biological chemistry and nutrition **Retinoids, Differentiation and Disease** , **Retinoids** Heinz Nau, William S. Blaner, 2012-12-06 In the future the decade of the 1990s will likely be viewed as a Golden Age for retinoid research There have been unprecedented research gains in the understanding of retinoid actions and physiology since the retinoid nuclear receptors were first identified and the importance of retinoic acid in develop mental processes was first broadly recognized in the late 1980s Between then and now our knowledge of retinoid action has evolved from one of a near complete lack of understanding of how retinoids act within cells to one of sophisticated understanding of the molecular processes through which retinoids modulate transcription In this volume we have tried to provide a comprehensive update of the present understanding of retinoid actions with an emphasis on re cent advances The initial chapters of the volume or Section A focus on the physicochemical properties and metabolism of naturally occurring retinoids N OY provides an uncommonly encountered view of retinoid effects from the perspective of the physiochemical properties of retinoids V AKIANI and BUCK lend a perspective on the biological occurrence and actions of retro and anhydro retinoids Section B considers both the retinoid nuclear receptors and their mechanisms of action as well as synthetic retinoids that have been used exper imentally to provide mechanistic insights into receptor actions and have potential therapeutic use for treating disease PIEDRAFITA and PFAHL provide a comprehensive review of retinoid nuclear receptor biochemistry and molecular biology *Cancer Treatment Reports* , 1987 **Retinoids, Differentiation and Disease - Symposium** CIBA Foundation Symposium, 1986-04-17 *Journal of the National Cancer Institute* , 2001 **National Library of Medicine Current Catalog** National Library of Medicine (U.S.), **JNCI, Journal of the National Cancer Institute** National Cancer Institute (U.S.), 1984
