Ebeling, 2009-12-30 Austrian economist Ludwig von Mises was one of the most original and controversial economists of the 20th century both as a defender of free market liberalism and a leading opponent of socialism and the interventionist welfare state He was both the grant designer of a political economy of freedom and a trenchant detailed critic of government regulatory and monetary policies in the first half of the 20th century This fascinating book explores the cultural currents of anti-Semitism in Austria before and after the First World War that Mises confronted as an Austrian Jew his analysis of Austria Hungary's establishment of a gold standard Mises multi sided activities in the years after the World War I in stemming a hyperinflation opposing government fiscal mismanagement and resisting misguided policies during the Great Depression and his analysis of how Europe plunged into World War II and the policies to restore freedom and prosperity in the post war period It also discusses the confrontation between the Austrian

Economists and the Keynesians over the causes and cures for the Great Depression as well as how Mises Austrian approach to money and the business cycle contrasted with both the ideas of Joseph A Schumpeter and the Swedish Economists of the interwar period This volume breaks new ground in placing Ludwig von Mises many original views on political economy public policy and monetary economics in the historical context of his time especially during the interwar period when he was a senior economic analyst for the Vienna Chamber of Commerce and after his arrival in America during World War II The book will therefore be of interest to students and researchers in monetary economics political economy expectations theory and the market process and the history of economic thought

Foundations of Economic Personalism is a series of three book length monographs each closely examining a significant dimension of the Center for Economic Personalism's unique synthesis of Christian personalism and free economic market theory In the aftermath of the momentous geo political and economic changes of the late 1980s a small group of Christian social ethicists began to converse with free market economists over the morality of market activity This interdisciplinary exchange eventually led to the founding of a new academic subdiscipline under the rubric of economic personalism These scholars attempt to integrate economic theory history and methodology with Christian personalism's stress upon human dignity humane social structures and social justice This volume presents the methodological and theoretical foundations for economic personalism through a detailed investigation of human action from two different yet complementary perspectives from the personalist perspective of Karol Wojtyla in *The Acting Person* 1969 and the free market perspective of Ludwig von Mises in *Human Action* 1949 By comparing and contrasting the viewpoints of Wojtyla and Mises the authors develop a

comprehensive praxeology i.e a theory of human action capable of analyzing human action from moral and economic perspectives Beyond Self Interest illustrates how a unified praxeology could encourage more sustained analysis of the moral dimensions of economic activity while simultaneously softening the utilitarian prejudice of contemporary economic analysis
