Un-Habitat, 2013-10-30 Urban transport systems worldwide are faced by a multitude of challenges Among the most visible of these are the traffic gridlocks experienced on city roads and highways all over the world The prescribed solution to transport problems in most cities has thus been to build more infrastructures for cars with a limited number of cities improving public transport systems in a sustainable manner However a number of challenges faced by urban transport systems such as greenhouse gas emissions noise and air pollution and road traffic accidents do not necessarily get solved by the construction of new infrastructure Planning and Design for Sustainable Urban Mobility argues that the development of sustainable urban transport systems requires a conceptual leap The purpose of transportation and mobility is to gain access to destinations activities services and goods Thus access is the ultimate objective of transportation As a result urban planning and design should focus on how to bring people and places together by creating cities that focus on accessibility rather than simply increasing the length of urban transport infrastructure or increasing the movement of people or goods Urban form and the functionality of the city are therefore a major focus of this report which highlights the importance of integrated land use and transport planning This new report of the United Nations Human Settlements Programme UN Habitat the world's leading authority on urban issues provides some thought provoking insights and policy recommendations on how to plan and design sustainable urban mobility systems The Global Report on Human Settlements is the most authoritative and up to date global assessment of human settlements conditions and trends Preceding issues of the report have addressed such topics as Cities in a Globalizing World The Challenge of Slums Financing Urban Shelter Enhancing Urban Safety and Security Planning Sustainable Cities and Cities and Climate Change Cities in a Time of Terror H. its creative potential Nicholas A Phelps explores the key themes and driving questions in the circulation of planning ideas and methods over time and across spaces identifying the contrasts and commonalities between urban planning systems and cultures He argues that the tools for inclusive urban planning are today more than ever not solely restricted to the hands of planning bodies but are distributed across citizens a variety of organizations what Phelps calls clubs and states As a result the book sets the ground for the new arrangements between these groups and actors which will be central to the future of urban planning By unsettling standard accounts this book compels us towards more critical and creative thinking to ensure that the imagination wisdom and methods of urban planning are mobilized towards achieving the aspiration of shaping better places *Metropolitan Ruralities* Terry Marsden,Kjell Andersson,Stefan Sjöblom,Leo Granberg,Peter Ehrström,2016-07-29 During modernity metropolitan ruralities have been regarded as land reserves for urban expansion However there is a growing insight that there are limits to the urban expansion into rural areas This volume discusses potential developments in urban and rural policy and planning which need to be considered *Urban World/Global City* David Clark,2004-06-01 This book identifies and accounts for the characteristics of the contemporary city and of urban society It analyzes the distribution and growth of settlements and explores the social and behavioral characteristics of urban living The latest theoretical and empirical developments and insights are synthesized and presented in an accessible and engaging way This second edition has been extensively updated and referenced Each chapter includes sets of learning objectives annotated readings and topics for discussion Well illustrated throughout it will be essential reading for students of geography sociology and development studies and all who seek an understanding of how the urban world has evolved and how it will change in the twenty first century [Encyclopedia of World Geography](#) ,2002 Each volume focuses on a specific geographic region covering its physical geography economics government and peoples
