New Dark Age:

New Dark Age James Bridle, 2018-07-17 New Dark Age is among the most unsettling and illuminating books I've read about the Internet which is to say that it is among the most unsettling and illuminating books I've read about contemporary life New Yorker As the world around us increases in technological complexity our understanding of it diminishes Underlying this trend is a single idea the belief that our existence is understandable through computation and more data is enough to help us build a better world In reality we are lost in a sea of information increasingly divided by fundamentalism simplistic narratives conspiracy theories and post factual politics Meanwhile those in power use our lack of understanding to further their own interests Despite the apparent accessibility of information we're living in a new Dark Age From rogue financial systems to shopping algorithms from artificial intelligence to state secrecy we no longer understand how our world is governed or presented to us The media is filled with unverifiable speculation much of it generated by anonymous software while companies dominate their employees through surveillance and the threat of automation In his brilliant new work leading artist and writer James Bridle surveys the history of art technology and information systems and reveals the dark clouds that gather over our dreams of the digital sublime

Science Fiction and the New Dark Age Harold L. Berger, 1976 Humanism: In Command or in Crisis? Michael A. Schuler, 2023-08-31 According to bestselling historian Yuval Noah Harari today's average American has their foot in three ideological camps nationalism free market capitalism and humanism The first two might seem obvious but the third It's entirely possible that most who qualify for that label would be hard pressed to explain its meaning much less use it self descriptively This book is designed to serve two important purposes First to provide an accessible resource for anyone curious about the humanist tradition and the arguments advanced by leading contemporary proponents Second to address what the author believes is a critical question for our time the era of the Anthropocene Is humanism's seemingly benign package of values at least partially responsible for some of the world's most pressing problems To answer the last question Schuler draws from an eclectic collection of commentators including life scientists spiritual writers public intellectuals technologists novelists and even poets In the end this wide ranging survey will help the reader determine whether humanism makes sense for them

My Father's World John D. Wineland, Mark Ziese, James Riley Estep, 2011-04-11 My Father's World is a memorial volume celebrating the life of Dr Reuben G Bullard and it focuses on the archaeology and history of the Mediterranean world The essays in this volume are all written by former students of Dr Bullard and the diverse range of topics highlights his broad interests in geology archaeology and biblical studies Bullard was a long time Professor of Geology and Archaeology at Cincinnati Christian University He pioneered the field of Archaeological Geology in the 1960s at Tell Gezer

Tavistock Institute Daniel Estulin, 2015-09-14 The real story behind the Tavistock Institute and its network from an intriguing best selling author The Tavistock Institute in Sussex England describes itself as a nonprofit charity that applies social science to contemporary issues and problems But this book

posits that it is the world's center for mass brainwashing and social engineering activities. It grew from a somewhat crude beginning at Wellington House into a sophisticated organization that was to shape the destiny of the entire planet and in the process change the paradigm of modern society. In this eye-opening work, both the Tavistock network and the methods of brainwashing and psychological warfare are uncovered. With connections to U.S. research institutes, think tanks, and the drug industry, the Tavistock has a large reach, and the Tavistock Institute attempts to show that the conspiracy is real, who is behind it, what its final long-term objectives are, and how we the people can stop them.

House of Darkness House of Light

Andrea Perron, 2014-08-11 Roger and Carolyn Perron purchased the home of their dreams and eventual nightmares in December of 1970. The Arnold Estate located just beyond the village of Harrisville, Rhode Island, seemed the idyllic setting in which to raise a family. The couple unwittingly moved their five young daughters into the ancient and mysterious farmhouse. Secrets were kept and then revealed within a space shared by mortal and immortal alike. Time suddenly became irrelevant, fractured by spirits making their presence known, then dispersing into the ether. The house is a portal to the past and a passage to the future. This is a sacred story of spiritual enlightenment told some thirty years hence. The family is now somewhat less reticent to divulge a closely guarded experience. Their odyssey is chronicled by the eldest sibling and is an unabridged account of a supernatural excursion. Ed and Lorraine Warren investigated this haunting in a futile attempt to intervene on their behalf. They consider the Perron family saga to be one of the most compelling and significant of a famously ghost-storied career as paranormal researchers. During a seance gone horribly wrong, they unleashed an unholy hostess, the spirit called Bathsheba, a God-forsaken soul. Perceiving herself to be the mistress of the house, she did not appreciate the competition. Carolyn had long been under siege, overt threats issued in the form of fire, a mother's greatest fear. It transformed the woman in unimaginable ways. After nearly a decade, the family left a once-beloved home behind, though it will never leave them, as each remains haunted by a memory. This tale is an inspiring testament to the resilience of the human spirit on a pathway of discovery, an eternal journey for the living and the dead.

Alternative Governance in the Northern Triangle and Implications for U.S. Foreign Policy Douglas Farah, Carl Meacham, 2015-10-06 This study examines different forms of alternative governance in the absence of a strong state presence in the Northern Triangle of Central America, along part of the Guatemala-Honduras border, a region notorious for its soaring homicide rates, corruption, violence, and emigration to the United States. The purpose of the study is to shed light on the complex and interwoven issues that drive the current crisis of governance in the region and spill over with increasing frequency into strategic issues for the United States.

Chromatic Algorithms Carolyn L. Kane, 2014-08-13 These days we take for granted that our computer screens and even our phones will show us images in vibrant full color. Digital color is a fundamental part of how we use our devices, but we never give a thought to how it is produced or how it came about. *Chromatic Algorithms* reveals the fascinating history behind digital color, tracing it from the work of a few brilliant computer scientists and experimentally minded artists in the late 1960s and early

70s through to its appearance in commercial software in the early 1990s Mixing philosophy of technology aesthetics and media analysis Carolyn Kane shows how revolutionary the earliest computer generated colors were built with the massive postwar number crunching machines these first examples of computer art were so fantastic that artists and computer scientists regarded them as psychedelic even revolutionary harbingers of a better future for humans and machines But Kane shows the explosive growth of personal computing and its accompanying need for off the shelf software led to standardization and the gradual closing of the experimental field in which computer artists had thrived Even so the gap between the bright bold presence of color onscreen and the increasing abstraction of its underlying code continues to lure artists and designers from a wide range of fields and Kane draws on their work to pose fascinating questions about the relationships among art code science and media in the twenty first century

The Triumph and Tragedy of the Intellectuals Harry Redner, 2016-09-30 This fourth installment of Harry Redner's tetralogy on the history of civilization argues that intellectuals have a brilliant past a dubious present and possibly no future He contends that the philosophers of the seventeenth century laid the ground for the intellectuals of the eighteenth century the Age of Enlightenment They in turn promoted a fundamental transformation of human consciousness they literally intellectualized the world The outcome was the disenchantment of the world in all its cultural dimensions in art religion ethics politics and philosophy In this fascinating study Redner demonstrates how secularization took the sting out of both the dread and promise of an afterlife and intellectuals learned to die without the hope of immortality popularized by philosophy and religion Ultimately they produced the ideologies that generated the totalitarian regimes of the twentieth century which subsequently

exterminated these intellectuals through mass murder on a scale never before experienced The book traces the sources of this fatal entanglement and goes on to examine the contemporary condition of intellectuals in America and the world Wherein lies the future of the intellectuals Redner suggest that in the present state of globalization dominated by technocrats experts and professionals their fate remains uncertain **Global Futures** Ronaldo Munck,2025-02-27 Global Futures Key Concepts for Social Transformation provokes us to rethink some of the key words and concepts which define the current global order Prompted by crises around the world it seeks to re energise our desire for a better future The book takes seven key concepts from the new global studies and considers how they are used and whether they are adequate for addressing the twenty first century s increasingly complex global order The topics covered include widely used concepts such as development modernity history and politics as well as more unusual themes such as desire complexity and alternative futures The core message of this book is that we need to grasp the complex and contradictory reality behind these important concepts in order to foster a new way of thinking seeing and acting for a future fit for human purpose Written by Ronaldo Munck a key social theorist and social activist with a Latin American and European background this book will be perfect for students and researchers of sociology politics international relations and global development *Cottons: The Secret of the Wind* Jim Pascoe,2018-07-10 In Cottons rabbits and foxes inhabit a world where magic technology and art are used as weapons of war Written by Jim Pascoe with bold illustrations from Heidi Arnhold To her neighbors in the Vale of Industry Bridgebelle is an ordinary rabbit All day long she toils at the carrot factory After a hard day she returns home to care for her ailing auntie And whenever she s out she s watchful of the murderous foxes who prey on her kind But Bridgebelle is not ordinary she s a rabbit with talents beyond her own understanding Using cha the mysterious fuel that powers her world she can change everyday objects into thokchas magical transforming works of art Bridgebelle makes thokchas because they re beautiful But there are those in her world who want to harness her powers and turn her art into a weapon *Jane Jacobs is still here* Roberto Rocco,2023-06-06 On the occasion of Jane Jacobs 100 anniversary the chair of Spatial Planning and Strategy of the Delft University of Technology together with the OTB Research Institute for the Built Environment and the Rotterdam Erasmus University College organised a two day conference on Jane Jacob s legacy at TU Delft on 24 25 May 2016 This event was complemented one year later by a Jane Jacobs Year closing event We wished to celebrate the life and accomplishments of one of the most important urban thinkers of our time someone who has influenced generations of designers and planners and others concerned with the built environment the great Jane Jacobs This volume contains a number of papers presented at the celebratory conference held at TU Delft in May 2016 with six tracks coordinated by guest scholars Track 1 Jane Jacobs ethics and the just city Track 2 Jane Jacobs and Street Spaces Streets as public places Track 3 Jane Jacobs and the dynamics of neighbourhoods Track 4 Jane Jacobs and the Reshaping old urban fabrics in Chinese cities Track 5 Jane Jacobs and organised complexity Track 6 Jane Jacobs and safety in public space **Dislocation: Awkward**

Spatial Transitions Philip Cooke, 2021-05-18 Today the world is in the most serious turmoil it has experienced for many centuries. These multiple crises arise from the fundamental mistreatment by capitalist competition of the carrying capacity of the planet. Even before coronavirus, evidently morbid symptoms of over development led many spatial planners to write of the threat of a new Dark Age. Many advocated a return to policy decentralisation as the Covid 19 crisis demonstrated once again the failure of global controller mindsets to manage complex systems successfully. *Spatial Transitions* is a critical exploration of where spatial development processes and rules have gone wrong across many economies. The chapters lay out which mindsets have been responsible for this and gives pointers to new practices that aim to ameliorate the effects of past failings. In the first nine chapters a mapping of key elements of the prevailing omni crisis are summarised. These range from an exegesis of the Anthropocene, the rise of populism, the transition to neoliberalist anti planning and migration as planning issues with pleas for evolutionary change in spatial policy and process dynamics. Finally a group of chapters explores the flailing as territorial governances tried to plot the rise of creative cities 4.0 era industry and services and in the built form the role of architects in city renewal. In the last part attention is devoted to territorial innovation, knowledge recombination, sustainable mobility and finally green entrepreneurship as necessary elements of a post coronavirus climate change mitigation and sustainable mobility set of survival strategies. The chapters in this book were originally published in the journal *European Planning Studies*.

Faith Matters Kerry Walters, 2019-06-17 In a day in which Christians too often reduce faith to mere sentimentality and atheists decry it as superstitious nonsense, Fr Kerry Walters offers a series of reflections intended to show that indeed faith matters. Drawn from his popular weekly newspaper column *Faith Matters*, these short meditations explore Christian faith from the perspectives of doctrine, spirituality, ethics, politics, art and science, the saints and the holy seasons that mark the Christian year and set the rhythm of Christian living.

Regulating Hate Speech Created by Generative AI Jay Liebowitz, 2024-08-02 *Regulating Hate Speech Created by Generative AI* explores the new hybrid space of Human Machine Interaction (HMI) in which hate speech is represented and computed through algorithms and AI generative systems. The book is exploratory because there are still many problem solving challenges to be faced. It is also innovative because it is not assuming that solutions lie only in technological advancements but on a broader scale. In this sense, large language models can and are being considered from a holistic view, i.e. from the different dimensions and layers of regulatory and legal governance. Highlights of the book include: Generative AI and social engines of hate; An introduction to generative Artificial Intelligence application trends and ethics; The mechanics and validation of generative AI outcomes; An evaluation of Generative AI for hate speech detection; Best practices and key considerations for AI regulation; Using GenAI capabilities for early detection of threats in the digital environment. This book is a hard look at ways to regulate generative AI to reduce online hate and secure justice in a digital environment. Featuring research and offering practical guidelines, the book examines guidelines for regulating generative AI models so they do not

contribute to online hate disinformation and imagery
