Charging Forward Chris Benner, Manuel Pastor, 2024-10-22 A clarion call for justice in the quest for clean energy California s Salton Sea region is home to some of the worst environmental health conditions in the country It is also ground zero for a new lithium gold rush a race to extract a mineral critical to the rapidly expanding electric vehicle and renewable energy storage markets With enough lithium lurking beneath the surface to provide a third of global demand who will benefit from the development of this precious resource A work of stunning analysis and reporting Charging Forward shows that the questions raised by Lithium Valley lie at the heart of the green transition Weaving together movement politics federal policy and global supply chains noted experts Chris Benner and Manuel Pastor stress that extracting lithium is just a first step the real question is whether the region and the nation will address and overcome the environmental degradation labor

exploitation and racial injustice that have been as much a part of the landscape as the Salton Sea itself What happens in Lithium Valley the authors argue will not stay there This tiny patch of California is a microcosm of the broad climate challenges we face understanding Lithium Valley today is the key to grasping the future of our economy and our planet
