New Directions In European Community Law:

New Directions in European Public Law Jack Beatson, Takis Tridimas, 1998 From two symposia in the winter and spring of 1997 at Cambridge England 13 essays analyze a cluster of issues arising in the European Union public law arena Some deal with issues of liability and the availability of remedies in European and domestic law Others take a broader view looking at the phenomenon of cross fertilization among national legal systems and between national systems and European Union law Distributed in the US by ISBS Annotation copyrighted by Book News Inc Portland OR **New Directions in European Community Law** Francis G. Snyder, 1990-01-01 *New Directions in European Community Law* Francis G. Snyder, 1990

The Modernisation of EC Antitrust Law Rein Wesseling, 2000-10-19 In recent years European Community EC competition law has come under fire Continued criticism of all aspects of the means by which EC competition law is enforced has brought to light ineffectiveness of the present system Consequently the European Commission has responded by issuing the White Paper on Modernisation which sets out its vision on the future of EC competition law This new book takes a step back and tries to understand the current challenges to EC competition policy by examining the origins of the Community's competition law system In the first part of the book the author sketches the development of Community competition law enforcement between the European Economic Community established in 1958 and the European Union of today Taking this dynamic perspective on EC competition law the second part of the book addresses topical problems of EC competition policy the pertinent objectives the institutional framework the division of jurisdiction between the Community and Member States and decentralised enforcement of Community law Notably the author's conclusions diverge considerably from the analysis found in the Commission White Paper on Modernisation The author proposes various alternative solutions to the existing problems which arguably fit better within the overall constitutional development of the Community than the solutions offered by the Commission The book will be of interest to competition lawyers as well as to all those interested in the constitutional development of the European Community *European Labour Law* Brian Bercusson, 2009-07-09 This extensively updated second edition explores how individual European labour law systems combine to produce a distinctly European transnational system

The Construction of Europe S. Martin, 2013-03-09 Stephen Martin The fourteen essays that constitute this work provide a coherent review of the past and present of the European Community and consider some of its possible futures Werner Abelshauser and Richard Griffiths offer separate perspectives on the precursors of the European Community Abelshauser argues that comparison of the fates of the European Coal and Steel Community and the European Defense Community demonstrate the dominance of political over economic considerations in the integration process Griffiths considers the stillborn European Political Community many of the proposed features of which somewhat transformed were embodied in the Treaty of Rome Both suggest that as a practical matter a coming together of French and German interests has been a precondition for advances in European integration Stephen Martin and Andrew Evans discuss the development of

the Community's Structural Funds first envisaged as tools to smooth the transition from a collection of regional economies to a continent-wide single market now increasingly seen as devices to guide adjustment to long-term structural problems

Stuart Holland emphasizes the role of the Structural Funds as one element in a broad range of strategies to ensure social and economic cohesion as the Maastricht Treaty ushers the European Union into the next stage of its development **Advancing**

the Method and Practice of Transnational Law Julien Chaisse, Oana Stefan, 2023-09-21 This book adopts a transnational methodology to reflect on the legalisation of international economic relations A Liber Amicorum for Professor Francis Snyder it outlines the ways in which legal scholarship has taken his legacy further in relation to the concept of transnational law the law in context method and the evolution of sustainability law The lens is both theoretical and practical delving into international investment law financial monetary law free trade agreements indigenous rights and food law and covering case studies from EU law WTO law American law Chinese law and Indonesian law The chapters explore how Snyder's ideas have advanced legal research and determined change in regulation impacting trade relationships worldwide Part I of the book gives an overview of the actors the norms and the processes of transnational economic law discussing sites of governance legal pluralism and soft law Part II takes stock of the law in context research method looking not only at the way in which it can be refined and used by academics but also at the practical implications of such a method to improve regulatory settings and promote social and policy goals including the emerging generation of FTAs such as TPP TTIP and RCEP Part III focuses on sustainability law assessing Francis Snyder's contribution to systemic changes and reforms in China and the Asia Pacific region The book is a must have for any academic or practitioner interested in an up-to-date account of the recent developments in transnational trade law research *The Effectiveness of the Köbler Liability in National Courts* Zsófia

Varga, 2020-10-15 Over the last 15 years Köbler liability has resulted in the allocation of damages on only five occasions Why is that And what are the practical implications of the Köbler judgment in the Member States This book offers a unique analysis of the principle not from the usual EU-focused point of view but from the view of the practical Member State and thus follows the track set by earlier books in the EU Law in the Member States series It thoroughly examines the national jurisprudential and legislative acceptance of the state liability principle and explores the existence of alternative remedies available in the Member States in case of such breaches The conclusions based on a systematic assessment of 300 national judgments from the 28 Member States lead to a reconsideration of the role of the Köbler doctrine in the system of judicial remedies against violation of EU law by national supreme courts After the pronouncement of the ECJ judgment in Köbler legal scholars and practitioners have forecast the eradication of the principle of res judicata and the endangering of judicial independence The judgment caused a lot of ink to flow according to the ECJ's records at least 100 studies are directly devoted to the analysis of this decision This book is however the first to offer a comprehensive analysis on the genuine life of the Köbler liability in the Member States **Legislative Drafting for the EU** Helen Xanthaki, 2024-04-12 Legislative

Drafting for the EU calls for reform in the design of EU legislation to bolster its strength in political social and economic spheres The book offers technical guidance on how to achieve such reform through drafting and underlines the importance of accessible communication to create collective ownership of the regulatory aims *Environmental Protection Sue Elworthy*, Jane Holder, 1997-06 This book is targeted to students studying environmental law as well as legal academics researchers and undergraduates from other disciplines including economics political science and natural sciences
