Childless: No Choice James H. Monach,2003-09-02 As many as one in five couples in some population groups might be involuntarily childless and despite the attention attracted by technological advances and media coverage people often feel themselves to be totally isolated stigmatised and misunderstood by many professionals and ordinary people *Childless No Choice* is based on original research into the emotional and social aspects of involuntary childlessness the main component being a long term study of the experiences of couples attending an infertility clinic supported by a community survey and a study of the attitudes of general practitioners At a time of rapidly developing treatments for infertility and new legislative controls it is important that all those professionally involved have a full appreciation of the experiences and views of infertile people themselves While there is enormous attention in the media given to getting pregnant and to childbirth there is an almost total neglect of the possibility that for some people these natural functions may not happen James H Monach examines in detail the causes of childlessness and the availability of choices for childless people including artificial insemination fostering and adoption This book will be invaluable to doctors sociologists social workers psychologists health administrators and to anyone who works with childless couples as well as to childless couples themselves *Encyclopedia of Childbearing* Carol Mann,Barbara Katz Rothman,1992-11-17 Childbearing is more than pregnancy and labor It is the having and not having of children It is a profound event in the lives of families and in the lives and bodies of women The feminist movement and the development of feminist studies have helped to rehumanize the subject of childbearing by removing it from the remote environment of institutionalized medicine The multi disciplinary *Encyclopedia of Childbearing* is a major contribution to this new accessibility **New Reproductive Technologies** Maureen McNeil,1990-04-12 This collection of essays provides an overview of the social developments associated with the new reproductive technologies It assesses the

significance of these new technologies for the field of the sociology of technology as a whole Library Journal ,1994

Current Catalog National Library of Medicine (U.S.),1969 Includes subject section name section and 1968 1970 technical reports *Fertility Counseling* Sharon N. Covington,2015-04-02 Using real world cases this clinical guide details the psychosocial challenges faced by patients navigating the world of medically assisted reproduction MAR It describes in depth the latest perspectives on counseling approaches to the evolving complexities of family creation whether fertility issues are a presenting problem or occur during the course of therapy or the aftermath of a struggle with infertility Applying an evidence based cross border approach international experts not only discuss advanced perspectives on topics such as third party reproduction pregnancy loss and adoption but also newer issues of fertility preservation older patient parenthood LGBT and singles family creation A comprehensive resource it explores pioneering insights into fertility counseling such as spirituality developing disclosure language a counselor s personal fertility issues and more This is an essential aid for medical and mental health professionals to develop and refine the skills needed to treat the increasingly diverse and complex needs of MAR patients Fertility Preservation Emre Seli,Ashok Agarwal,2011-09-24 A growing majority of women in the western hemisphere have been delaying initiation of childbearing to later in life Consequently more women in their late 30s to early 40s are attempting to get pregnant for the first time than ever before Since the incidence of most cancers increases with age delayed childbearing results in more female cancer survivors interested in fertility preservation In this book the editors provide strategies for fertility preservation in women and men who require gonadotoxic treatment In addition epidemiologic ethical medico legal psychologic and social aspects of fertility preservation are discussed Using a format that combines concise scientific background with practical methodological information and easy to grasp algorithms the chapters all conform to a uniform structure including a brief abstract keyword glossary step by step protocol of laboratory procedures key issues in commentary and a list of references The result is a unique practical reference guide for reproductive endocrinologists urologists embryologists reproductive scientists and oncologists **A Pastoral Theology of**

Childlessness Emma Nash,2021-05-31 The experiences of infertility and childlessness while not worse than other griefs and disappointments people experience are nevertheless distinctive in a number of important respects Unlike other griefs they often take place in private with no body no funeral and no public acknowledgement of the loss In her profound and wise theology of childlessness Emma Nash takes her own story as a starting point examining several distinctive features of this painful human experience She asks what biblical and theological resources offer consolation and what liberative action individuals and churches might take to make an appropriate response Weaving trauma theology together with personal experience Nash offers a profound and heartfelt theological reflection which breaks the barriers between pastoral resource and carefully constructed theology **Infertility** Annette L. Stanton,Christine Dunkel-Schetter,2013-06-29 As a researcher whose work focuses largely on the causes and consequences of unwanted pregnancy I may appear to be an unlikely

candidate to write a foreword to a book on infertility Yet many of the themes that emerge in the study of unwanted pregnancy are also apparent in the study of infertility Moreover this volume is an important contribution to the literature on fertility women s health issues and health psychology in general all topics with which I have been closely involved over the past two decades Neither pregnancy nor its absence is inherently desirable The occurrence of a pregnancy can be met with joy or despair and its absence can be a cause of relief or anguish Whether or not these states are wanted the conscious and unconscious meanings attached to pregnancy and in fertility the responses of others the perceived implications of these states and one s expectations for the future all are critical factors in determining an individual s response In addition both unwanted pregnancy and failure to conceive can be socially stigmatized evoking both overt and subtle social disapproval Further they involve not only the woman but her partner and potentially the extended family Finally both of these reproductive issues have been poorly researched Because both are emotionally charged and socially stigmatized events they are difficult to study Much of the early literature relied on anecdotal or case reports

Miscarriage Sherokee Ilse, Linda Hammer Burns, 1985 Miscarriage offers a comprehensive and insightful perspective on possible causes medical terminology choices and decisions emotional aspects coping suggestions choices for the future and resources for families experiencing a miscarriage Those who have suffered a miscarriage will find emotional and medical support that far surpasses any other book on this subject Family and friends will learn about miscarriage and how to help their loved ones

Communication and Disenfranchisement Eileen Berlin Ray, 2013-12-02 This volume and its companion case studies book deal with some of the people groups and classes who are living a disenfranchised existence in the United States Whether through birth life events or unfortunate circumstances they are denied full privileges rights and power within the existing societal structure Centered around societal health problems as they relate to socioeconomic status family abuse and health concerns these volumes examine salient issues from several theoretical frameworks including feminist theory and the social construction of reality Communication and Disenfranchisement provides theory based essays on topics such as the homeless adult survivors of sexual assault battered women persons with disabilities impoverished women the indigent living in the inner city persons with HIV AIDS the terminally ill and the elderly Case Studies in Communication and Disenfranchisement provides parallel case studies applying the issues and concepts discussed in the essays Used together these books provide theoretically based applications of social health issues within a communication framework Traditionally health communication research has emphasized the communication physical health relationship Inadvertently this primary focus has restricted what information has been included under the domain of health communication These books expand that domain by examining how the communication disenfranchisement relationship is accomplished managed and overcome and by recognizing the significance of the pragmatic and theoretic implications of this inquiry
