New History Of Wales Religion And Society In The Nineteenth Century:

The Mid-Victorian Generation K. Theodore Hoppen, 2000-06-30 This the third volume to appear in the New Oxford History of England covers the period from the repeal of the Corn Laws to the dramatic failure of Gladstone's first Home Rule Bill In his magisterial study of the mid Victorian generation Theo Hoppen identifies three defining themes The first he calls established industrialism the growing acceptance that factory life and manufacturing had come to stay It was during these four decades that the balance of employment shifted irrevocably For the first time in history more people were employed in industry than worked on the land The second concerns the multiple national identities of the constituent parts of the United Kingdom Dr Hoppen's study of the histories of Ireland Scotland Wales and the Empire reveals the existence of a variety of particular and overlapping national traditions flourishing alongside the increasingly influential structure of the unitary state The third defining theme is that of interlocking spheres which the author uses to illuminate the formation of public culture in the period This he argues was generated not by a series of influences operating independently from each other but by a variety of intermeshed political economic scientific literary and artistic developments This original and authoritative book will define these pivotal forty years in British history for the next generation [Evangelical Protestantism in Ulster Society 1740-1890](#) David Hampton, Myrtle Hull, 2004-08-02 First published in 1992 Routledge is an imprint of Taylor Francis an informa company [The Decline of Christendom in Western Europe, 1750-2000](#) Hugh McLeod, Werner Ustorf, 2003-07-17 Christendom lasted for over a thousand years in Western Europe and we are still living in its shadow For over two centuries this social and religious order has been in decline Enforced religious unity has given way to increasing pluralism and since 1960 this process has spectacularly accelerated In this 2003 book historians sociologists and theologians from six countries answer two central questions what is the religious condition of Western Europe at the start of the twenty first century and how and why did Christendom decline Beginning by overviewing the more recent situation the authors then go back into the past tracing the course of events in England Ireland France Germany and the Netherlands and showing how the fate of Christendom is reflected in changing attitudes to death and to technology and in the evolution of religious language They reveal a pattern more complex and ambiguous than many of the conventional narratives will admit [The Oxford History of Protestant Dissenting Traditions](#) Mark A. Noll, John Coffey, Timothy Larsen, Andrew C. Thompson (Lecturer in history), Michael Ledger-Lomas, Jehu Hanciles, Mark Hutchinson, 2017 The five volume Oxford History of Dissenting Protestant Traditions series is governed by a motif of migration out of England It first traces organized church traditions that arose in England as Dissenters distanced themselves from a state church defined by diocesan episcopacy the Book of Common Prayer the Thirty Nine Articles and royal supremacy but then follows those traditions as they spread beyond England and also traces newer traditions that emerged downstream in other parts of the world from earlier forms of Dissent Secondly it does the same for the doctrines church practices stances toward state and society attitudes toward Scripture and characteristic patterns of

organization that also originated in earlier English Dissent but that have often defined a trajectory of influence independent ecclesiastical organizations The Oxford History of Protestant Dissenting Traditions Volume III considers the Dissenting traditions of the United Kingdom the British Empire and the United States in the nineteenth century It provides an overview of the historiography on Dissent while making the case for seeing Dissenters in different Anglophone connections as interconnected and conscious of their genealogical connections The nineteenth century saw the creation of a vast Anglo world which also brought Anglophone Dissent to its apogee

Religion and Political Culture in Britain and Ireland David Hempton, 1996-01-26 The main theme of this book is religion and identity not only national identity but also regional and local identities David Hempton penetrates to the heart of vigorous religious and political cultures both elite and popular in the eighteenth and nineteenth centuries He brings to life a diverse and variegated spectrum of religious communities in all of the British Isles With so much new British history really an extended version of old English history Hempton has devoted more attention to the Celtic fringes especially Ireland It is an exercise in comparative history but he also shows how richly coloured is the religious history of these islands He demonstrates that even in their cultural distinctiveness the various religious traditions have had more in common than is sometimes imagined The book arises from the 1993 Cadbury Lectures at the University of Birmingham

Religion and Society in the Diocese of St Davids 1485-2011 John Morgan-Guy, 2016-04-01 During the medieval and early modern periods the Welsh diocese of St Davids was one of the largest

in the country and the most remote As this collection makes clear this combination of factors resulted in a religious life which was less regulated and controlled by the institutional forces of both Church and State Addressing key ideas in the development of popular religious culture and the stubborn continuity of long lasting religious practices into the modern era the volume shows how the diocese was also a locus for continuing major religious controversies especially in the nineteenth century Presenting a fresh view of the Diocese of St Davids since the Reformation this is the first new account of religion and society in over a century It is moreover not one which is written primarily from an institutional perspective but from that of wider society As well as a chronological treatment giving an overview of the history of religion in the diocese chapters address key themes including a study of religious revivals which originated within the borders of the diocese consideration of popular and elite education including the contribution of Bishop Burgess s pioneering institution at Lampeter the first degree awarding institution in England and Wales after Oxford and Cambridge the relationship of the Church to the revival of Welsh cultural identity and new reflections on the agitation and realisation of disestablishment of the Church as it affected Wales As such this pioneering study has much to offer all those with an interest not only in Welsh history but ecclesiastical history more broadly

Periodizing Secularization Clive D. Field,2019-10-31 Moving beyond the now somewhat tired debates about secularization as paradigm theory or master narrative Periodizing Secularization focuses upon the empirical evidence for secularization viewed in its descriptive sense as the waning social influence of religion in Britain Particular emphasis is attached to the two key performance indicators of religious allegiance and churchgoing each subsuming several sub indicators between 1880 and 1945 including the first substantive account of secularization during the fin de si cle A wide range of primary sources is deployed many of them relatively or entirely unknown and with due regard to their methodological and interpretative challenges On the back of them a cross cutting statistical measure of active church adherence is devised which clearly shows how secularization has been a reality and a gradual not revolutionary process The most likely causes of secularization were an incremental demise of a Sabbatarian culture coupled with the associated emergence of new leisure opportunities and transport links and of religious socialization in the church at home and in the school The analysis is also extended backwards to include a summary of developments

during the eighteenth and early nineteenth centuries and laterally to incorporate a preliminary evaluation of a six dimensional model of diffusive religion demonstrating that these alternative performance indicators have hitherto failed to prove that secularization has not occurred The book is designed as a prequel to the author s previous volumes on the chronology of British secularization Britain s Last Religious Revival 2015 and Secularization in the Long 1960s 2017 Together they offer a holistic picture of religious transformation in Britain during the key secularizing century of 1880-1980

Church and State in Modern Britain 1700-1850 Richard Brown, 2002-01-04 In this the second part of his history of the Industrial Revolution Richard Brown examines the political and religious developments which took place in Britain between the 1780s and 1840s in terms of the aristocratic elite and through the expression of alternative radical ideologies Opening with a discussion of the nature of history and of Britain in 1700 it goes on to consider Britain s foreign policy the emergence of the modern state and the mid century crisis of the 1840s Unlike many previous works it emphasises British not just English history It is this diversity of experience and the focus on continuity as well as change women as well as men that makes this a distinctive text Students will also find the theoretical foundations of historical narrative and analysis clearly explained

Religion and the Book Trade Caroline Archer, Lisa Peters, 2015-09-18 This volume brings together a selection of the papers presented at the Print Networks conference at the National Library of Wales Aberystwyth in July 2011 The conference theme Religion and the book trade was chosen to mark the four hundredth anniversary of the publication of the King James Bible Numerous events throughout the United Kingdom and the English speaking world took place to commemorate this historic event the Print Networks conference being one of many Religious books be they tracts sermons homilies hymn books or Bibles were primarily used by all denominations to spread their version of Christianity to attract people to their cause and to retain the loyalty of supporters But these publications are also credited with the survival of indigenous languages and naturally the printers and distributors of these religious works were crucial to the process of spreading both religion and literacy among the population The contributions to this book cover a wide gamut of religion and the book trade from the sixteenth to the twentieth centuries Most of the chapters are concerned with the European book trade and concentrate on Christian religions and cover both Catholic and Protestant particularly Nonconformist Dissenter experiences Most of the chapters relate to the British and Irish book trade

but there are also contributions discussing Italy and the Netherlands There are chapters relating to the printers and publishers of religious works authorship the issue and production of religious periodicals the promoters of religious libraries and clandestine elements of the trade This volume emphasises the pivotal role played by those in the book trade printers publishers or booksellers in the distribution of religious works and demonstrates that spreading the ideas of their authors creators or translators would have been far more difficult without their involvement This book will be of interest to academics independent scholars heritage professionals and research students in the fields of book trade history book arts bibliography bookbinding printing and typographic history publishing social and industrial history and religious history
