Special Issue "New" Instruments of Environmental Governance? Andrew J. Jordan, 2003

Environmental Governance in Europe Rüdiger K.W. Wurzel, Anthony R. Zito, A. J. Jordan, 2013-01-01 This path breaking book written by three well known experts makes an extremely valuable contribution to the study of new environmental policy instruments as well as to much wider theoretical debates about governance policy innovation learning and transfer Drawing on an unrivalled comparative empirical study of five different jurisdictions it manages to make many new points about issues that many of us thought had already been settled Martin J. Nicke Free University of Berlin and former deputy chair German Advisory Council on the Environment Germany Much more than a study of environmental policy instruments this book ranges widely and authoritatively over the government to governance debate theories of policy change regulation policy transfer and policy learning Its lessons and conclusions are relevant and timely well beyond the European context of its case studies and it will be essential reading for public policy scholars everywhere for some time to come Jeremy Rayner University of Saskatchewan Canada This book represents a very rare achievement in that it combines detailed and up to the minute empirical analysis of environmental policy over the past four decades with a sophisticated discussion and critique of current theoretical issues in comparative and policy studies generally It unfolds with a keen eye towards understanding the temporal dimensions of policy dynamics both in the specific policy field examined but also in terms of testing key analytical concepts Taken as a whole it provides the most detailed empirical assessment to date of the general government to governance hypothesis with significant implications for policy and governance studies in general Michael Howlett Simon Fraser University Canada and National University of Singapore This book fills an important gap in the environmental governance literature addressing governance at a lower level of abstraction than other texts and examining how it plays out in relation to specific modes and instruments of governing It also contributes towards governance theory building efforts through the development of an empirically relevant analytical framework In so doing it provides a firm underpinning for assessing whether to what extent and in what

ways there has been a transition from government towards governance in environmental policy Neil Gunningham Australian National University Theoretically sophisticated and empirically rich this book provides an overview of the introduction development and use of new policy instruments and new modes of environmental governance in the European context taking into account both national and European Union experiences This is a welcome addition to the field Miranda Schreurs Environmental Policy Research Centre and Free University of Berlin Germany European governance has witnessed dramatic changes in recent decades By assessing the use of new environmental policy instruments in European Union countries including the United Kingdom Germany the Netherlands and Austria this timely book analyses whether traditional forms of top down government have given way to less hierarchical governance instruments which rely strongly on societal self steering and or market forces The authors provide important new theoretical insights as well as fresh empirical detail on why and in what form these instruments are being adopted within and across different levels of governance along with analysis of the often overlooked interactions between the instrument types Providing important new theoretical insights into the governance debate by combining institutionalist and policy learning transfer approaches this book will be invaluable for both undergraduate and postgraduate students The analytical insights as well as a thorough empirical assessment of the use of environmental policy instruments in practice will prove essential for environmental policy specialists practitioners

Decentralization in Environmental Governance Christian Zuidema, 2016-10-04 Decentralization in Environmental Governance is a critical reflection on the dangers and risks of governance renewal warning against one sided criticism on traditional command and control approaches to planning The book formulates the arguments that support when and how governance renewal might be pursued but this attempt is not just meant for practitioners and scholars interested in governance renewal It is also useful for those interested in the challenge of navigating a plural landscape of diverse planning approaches which are each rooted in contrasting theoretical and philosophical positions The book develops a strategy for making argued choices between alternative planning approaches despite their theoretical and philosophical positions It does so by revitalizing the idea that we can contingently relate alternative planning approaches to the circumstances encountered It is an idea traced to contingency studies of the mid and late 20th century reinterpreted here within a planning landscape dominated by notions of uncertainty complexity and socially constructed knowledge This approach called Post contingency is both a theoretical investigation of arguments for navigating the theoretical plurality we face and an empirical study into renewing environmental governance Next to its theoretical ambitions Decentralization in Environmental Governance is practical in offering a constructive critique on current processes of governance renewal in European environmental governance Everyday Agri-Environmental Governance Jérémie Forney, Dana Bentia, Angga Dwiartama, 2024-07-05 Revitalising the way the social sciences question agri environmental governance this book introduces the everyday governance approach as a means to improving the sustainability of agriculture and food systems The everyday refers to

localised practices specific networks and practical norms that emerge in a process of interaction translation and reinterpretation The authors build this approach on assemblage thinking and theory which focuses on the collective production of the social through complex sets of connections For this reason assemblage thinking becomes a particularly productive guide in exploring how everyday governance is co produced in the interaction between numerous social processes involving a diversity of actors and instruments The authors navigate between original and contrasting case studies from Switzerland Indonesia and the European Union in order to reorient attention to the transformative nature of governance which they locate along four different dimensions of the everyday 1 the interdependence of instruments within a wider governance assemblage 2 the uncertainty and unpredictability of effects in agri environmental governance 3 the distributed nature of agency and its implication for power relations 4 the importance of capacities in the transformation of agri food systems This book calls for a redesigning of agri environmental governance that should move away from the setting of fix and precise objectives and solutions and rather aim for a consolidation of sound foundations on which desirable futures can emerge The book will be an essential read for students and scholars interested in sustainable agriculture and food systems governance modes and approaches and sustainability more broadly The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license

Transnational Environmental Regulation and Governance Veerle Heyvaert, 2018-11-22 A large and growing proportion of contemporary environmental regulation is transnational which means that it is impossible to understand environmental governance without a firm grasp of the nature of transnational environmental regulation TER In this illuminating work Veerle Heyvaert offers readers a comprehensive discussion of TER including analysis of international environmental agreements regional and EU regulation private environmental regulation and governance networks arguing that TER is highly diverse but sufficiently cohesive to allow the identification of shared characteristics that establish TER as a model of regulation The book uncovers the key features of TER and analyses the various intentions of TER regulators TER s governance principles and compliance strategies using a newly developed activity based methodology for regulatory analysis This book should be read by anyone seeking to understand the strengths and weaknesses of transnational environmental governance and its contribution to sustainability

Varieties of Governance G. Capano, M. Howlett, M. Ramesh, 2015-05-26 This edited collection examines various facets of governance the organization and steering of political processes within society for a better understanding of the complexities of contemporary policy making

Climate Policy Changes in Germany and Japan Rie Watanabe, 2012-04-27 Climate Policy Changes in Germany and Japan compares two decades of climate policy development in Germany and Japan It examines whether there is any difference between the types and levels of policy change in the two countries and if so what factors account for the difference Using a comparison of climate policy changes in Germany and Japan from 1987 to 2005 as a basis it also discusses the effectiveness and the limits of existing

theories of policy change and policy process most notably the Advocacy Coalition Framework ACF Punctuated Equilibrium Approach and Multiple Stream Approach and explores the theoretical question as to how long term paradigmatic policy change takes place The book lastly presents a hypothetical model of the mechanisms of paradigmatic policy change The two countries form a useful comparative approach to the issue of climate change They represent the range of types and levels of changes in policies to control CO2 emissions in the industrial and energy sectors dependent variables while also demonstrating similarities in a number of independent variables the size and structure of their economies their shares in global GHG emissions their general policy making styles including strong administrative systems and close relationships between ministries and industries and their general environmental policies Climate Policy Changes in Germany and Japan will be of interest to students and scholars of environmental and comparative politics

Governance for the Environment
Alessandra Goria, Alessandra Sgobbi, Ingmar von Homeyer, 2010-01-01 The integration of environmental concerns into other policy areas is widely recognized as a key element to achieve sustainable development It also represents a challenge for the environmental community requiring not only a new approach to policy making but also changes to existing policies and their implementation This essential book presents a diverse set of perspectives and experiences on how to support sustainable development through the integration of environmental issues into various policy sectors The authors examine existing research on environmental policy integration EPI at three

Public and Private in Natural Resource Governance Thomas Sikor, 2013 This volume develops the rich conceptual and empirical content of public private relationships increasingly acknowledged as the dominant realm of natural resource governance Ten wonderful studies from around the world illuminate opportunities for advancing the theory analysis and effective formation of sustainable systems of resource use The book is excellent for courses in governance and public policy in any resource and environmental field JEFF ROMM
PROFESSOR FOR RESOURCE POLICY UNIVERSITY OF CALIFORNIA AT BERKELEY US The book addresses the theoretically and politically most important division of social organization into public and private The authors bring an exciting multidisciplinary perspective to bear on changing and multiple publics and the strength of relationships connecting these two spheres in rural development and natural resource governance The contributions range from consumer health and food safety soil science forestry and water management to sociological and economic aspects of natural resource property and governance FRANZ VON BENDA BECKMANN MAX PLANCK INSTITUTE FOR SOCIAL ANTHROPOLOGY
GERMANY Natural resources have historically been considered as being governed in public or private spheres that is by the state on behalf of the people or by companies or individuals driven by the market This dichotomy between private and public is now recognized as overly simplistic and it is clear that publics and privates operate at a range of levels and with differing degrees of separation or overlap Bringing together a group of internationally respected researchers this book provides a new perspective on prominent issues in resource governance including the state NGOs civil society communities participation

devolution privatization and hybrid institutions highlighting the three dimensional nature of relations between public and private It builds on empirical analyses from six fields of natural resource governance agri environment biodiversity bioenergy food quality and safety forestry and rural water and employs a comparative approach that goes beyond the specificities of individual policy fields recognizing shared elements and allowing for a greater understanding of the dynamics underlying governance processes Introductions to the volume and to each section summarize the key debates and highlight linkages between chapters This is essential reading for academics students and policy experts in natural resource governance development and environmental policy

Companion to Environmental Studies Noel Castree, Mike Hulme, James D. Proctor, 2018-05-01 Companion to Environmental Studies presents a comprehensive and interdisciplinary overview of the key issues debates concepts approaches and questions that together define environmental studies today The intellectually wide ranging volume covers approaches in environmental science all the way through to humanistic and post natural perspectives on the biophysical world Though many academic disciplines have incorporated studying the environment as part of their curriculum only in recent years has it become central to the social sciences and humanities rather than mainly the geosciences The environment is now a keyword in everything from fisheries science to international relations to philosophical ethics to cultural studies The Companion brings these subject areas and their distinctive perspectives and contributions together in one accessible volume Over 150 short chapters written by leading international experts provide concise authoritative and easy to use summaries of all the major and emerging topics dominating the field while the seven part introductions situate and provide context for section entries A gateway to deeper understanding is provided via further reading and links to online resources Companion to Environmental Studies offers an essential one stop reference to university students academics policy makers and others keenly interested in the environmental question the answer to which will define the coming century

Politics of the Environment Chukwumerije Okereke, 2018-12-07 The environment is increasingly seen at the forefront of many political agendas Covering important topics such as the Kyoto protocol and deforestation this book provides extensive coverage of all aspects of environmental politics Essays of around 6 000 words in length make up the bulk of the book Written by notable experts in the field of environmental politics these essays each examine a different aspect of the subject

Environmental Leadership Deborah Rigling Gallagher, 2012-09-19 This reference handbook tackles issues relevant to leadership in the realm of the environment and sustainability

Climate Change Governance in Chinese Cities Qianqing Mai, Maria Francesch-Huidobro, 2014-11-27 In the last thirty years China has experienced rapid economic development and urbanisation which has resulted in high levels of environmental degradation and has put considerable pressure on the country's infrastructure and natural resources As China commits to considerably lower the carbon intensity of its economy this volume analyses and explains the governance of climate change mitigation responses in major Chinese cities The book focuses specifically on two highly carbon intensive sectors buildings and

transport in Guangzhou Shenzhen and Hong Kong to explore how collaborative municipal networks function in practice in Chinese cities The authors find that effective coordination relies on the political will of local administrative elites the political significance attached to climate change issues the legitimate authority granted to the coordinating agency and human and financial capitals Collaboration is hampered by limited span of network engagement inadequate authority of the primary network participants insufficient input and output legitimacy of the sectoral innovations and missing linkages across functionally segregated sectors The book concludes that the enhanced collaboration and coordination between networks that has emerged in the process of low carbon transitions is transforming the Chinese environmental state into a more pluralistic inclusive and legitimate one This book will be of interest to researchers and practitioners across disciplines including Chinese studies environmental politics and policy urban studies and planning and geography

The Politics of Carbon Markets Benjamin Stephan, Richard Lane, 2014-08-27 The carbon markets are in the middle of a fundamental crisis a crisis marked by collapsing prices fleeing actors and ever increasing greenhouse gas levels Yet carbon trading remains at the heart of global attempts to respond to climate change Not only this but markets continue to proliferate particularly in the Global South The Politics of Carbon Markets helps to make sense of this paradox and brings two urgently needed insights to the analysis of carbon markets First the markets must be understood in relation to the politics involved in their development maintenance and opposition Second this politics is multiform and pervasive Implementation of new techniques and measuring tools policy development and contestation and the structuring context of institutional settings and macro social forces all involve a variety of political actors and create new forms of political agency The contributions study the total extent of the carbon markets from their prehistory to their contemporary expansion and wider impacts This wide ranging political perspective on the carbon markets is invaluable to those studying and interested in ecological markets climate change governance and environmental politics

The Oxford Handbook of Governance David Levi-Faur, 2012-03-29 The Oxford Handbook of Governance presents an authoritative and accessible state of the art analysis of the social science literature on governance The volume presents the core concepts and knowledge that have evolved in the study of governance in different levels and arenas of politics and policymaking In doing so it establishes itself as the essential point of reference for all those studying politics society and economics from a governance perspective The volume comprises fifty two chapters from leaders in the field The chapters are organized in nine sections dealing with topics that include governance as the reform of the state democratic governance European governance and global governance

Environmental Governance and Greening Fiscal Policy Murray Petrie, 2021-11-27 This book addresses the increasingly urgent question How can governments be made more accountable for the quality of their environmental stewardship It explores Enhanced national State of the Environment reporting and integration of environmental outcomes in key national indicators Mainstreaming environmental goals targets and risks by integrating them in fiscal policy and the annual budget a government s most important policy instrument

Promoting sustainability by progressively exposing and eliminating harmful tax and expenditure policies putting a price on pollution and providing environmental public goods Civil society environmental monitoring The book combines in depth assessment of the latest climate green budgeting literature and country practices with discussion of how to implement green fiscal policies The framework is deliberately ambitious given the severity scale and urgency of climate change and biodiversity loss The book will be of interest to ministry of finance budget and planning officials to environment sector agencies oversight institutions international organizations civil society organizations and to academics and students in the fields of environmental studies development studies economics public finance and public policy EU Enlargement and the Environment JoAnn Carmin, Stacy D. VanDeveer, 2023-05-31 This volume focuses attention on key environmental and institutional changes associated with eastern expansion of the European Union assessing and challenging prevailing views about the outcomes and processes of this historic development Looking at four central themes capacity changes and limitations the EU s mixed messages and conflicting priorities non state actor roles and developments and the exchange of ideas and information the volume shows that enlargement will change the EU not just make it bigger and that EU officials and programs are improving aspects of environmental policy in CEE countries even as they are making others less sustainable This book was previously published as a special issue of the journal Environmental Politics
