Health Care in America John C. Burnham, 2015-05-15

A comprehensive history of sickness health and medicine in America from Colonial times to the present In *Health Care in America* historian John C Burnham describes changes over four centuries of medicine and public health in America Beginning with seventeenth century concerns over personal and neighborhood illnesses Burnham concludes with the arrival of a new epoch in American medicine and health care at the turn of the twenty first century From the 1600s through the 1990s Americans turned to a variety of healers practices and institutions in their efforts to prevent and survive epidemics of smallpox yellow fever cholera influenza polio and AIDS Health care workers in all periods attended births and deaths and cared for people who had injuries disabilities and chronic diseases Drawing on primary sources classic scholarship and a vast body of recent literature in the history of medicine and public health Burnham finds that traditional healing care and medicine dominated the United States until the late nineteenth century when antiseptic aseptic surgery and germ theory initiated an intellectual social and technical transformation He divides the age of modern medicine into several eras physiological medicine 1910s 1930s antibiotics 1930s 1950s technology 1950s 1960s environmental medicine 1970s 1980s and beginning around 1990 genetic medicine The cumulating developments in each era led to today s radically altered doctor patient relationship and the insistent questions that swirl around the financial cost of health care Burnham s sweeping narrative makes sense of medical practice medical research and human frailties and foibles opening the door to a new understanding of our current concerns

Cross-Cultural and Cross-Disciplinary Perspectives in Social Gerontology

Tannistha Samanta, 2016-08-02

This volume intends to re establish social gerontology as a discipline that has pragmatic links to policy and practice Collectively the chapters enrich public debates about the moral cultural and economic questions surrounding aging thereby ameliorating the problems associated with aging societies This volume is uniquely cross cultural theory driven and cross disciplinary It fills a gap in the gerontological scholarship of the global south that is predominantly descriptive and empirical Based on original research this volume examines in particular the sociological question of inequality and its intersection with age gender health family and social relations In the process the studies herein highlight

the unique historical institutional and social systems that govern the subjective experience of aging in diverse contexts globally. Specifically, societies in transition including India, Lebanon, Nigeria, Japan, China, Israel, and in Europe are studied while connecting the micro social experience of aging, loneliness, wellbeing, discrimination, relationships, and resilience with larger temporal and political contexts. This exercise generates intellectual capital that reformulates links between aging research and policy in innovative ways. Overall, the volume echoes the global scientific commitment to understand the socio-cultural process of aging in transitional societies and utilizes rich opportunities for cross-fertilization of ideas, disciplines, and methods to advance the gerontological promise of critical inquiry, training, and practice.

Information Technology in Health Care 2007 Johanna Westbrook, Johanna I. Westbrook, 2007. This volume presents the papers from the 3rd International Conference on Technology in Health Care: Socio-technical Approaches held in Sydney, Australia, in 2007.

Essentials of Correctional Nursing Lorry Schoenly, Catherine M. Knox, 2012-08-14. *Essentials of Correctional Nursing* is the first new and comprehensive text about this growing field to be published in the last decade. Fortunately, the editors have done a great job in all respects. This book should be required reading for all medical practitioners and administrators working in jails or prisons. It certainly belongs on the shelf of every nurse, physician, ancillary healthcare professional, and corrections administrator. *CorHealth*, The Newsletter of the American Correctional Health Services Association, I highly recommend *Essentials of Correctional Nursing* by Lorry Schoenly, PhD, RN, CCHP, RN, and Catherine M. Knox, MN, RN, CCHP, RN, editors. This long-awaited book, dedicated to the professional specialty of correctional nursing, is not just a good read; it is one of those books that stays on your desk and may never make it to the bookshelf. American jails: correctional nursing has minimal published texts to support, educate, and provide ongoing best practices in this specialty. Schoenly and Knox have successfully met those needs with *Essentials of Correctional Nursing*. *Journal of Correctional Health Care Nurses* have been described as the backbone of correctional health care. Yet the complex challenges of caring for this disenfranchised population are many. Ethical dilemmas around issues of patient privacy and self-determination abound, and the ability to adhere to the central tenet of nursing, the concept of caring, is often compromised. *Essentials of Correctional Nursing* supports correctional nurses by providing a comprehensive body of current, evidence-based knowledge about the best practices to deliver optimal nursing care to this population. It describes how nurses can apply their knowledge and skills to assess the full range of health conditions presented by incarcerated individuals and determine the urgency and priority of requisite care. The book describes the unique health needs and corresponding care for juveniles, women, and individuals at the end of life. Chapters are devoted to nursing care for patients with chronic disease, infectious disease, mental illness, or pain, or who are in withdrawal from drugs or alcohol. Chapters addressing health screening, medical emergencies, sick call, and dental care describe how nurses identify, respond to, and manage these health care concerns in the correctional setting. *Essentials of Correctional Nursing* was written and reviewed by experienced correctional nurses with thousands of hours of experience. American Nurses

Association standards are woven throughout the text which provide the information needed by nurses studying for certification exams in correctional nursing The text will also be of value to nurses working in such settings as emergency departments specialty clinics hospitals psychiatric treatment units community health clinics substance abuse treatment programs and long term care settings where they may encounter patients who are currently or have previously been incarcerated Key Features Addresses legal and ethical issues surrounding correctional nursing Covers common inmate patient health care concerns and diseases Discusses the unique health needs of juveniles women and individuals at the end of life Describes how nurses can safely navigate the correctional environment to create a therapeutic alliance with patients Provides information about health screening medical emergencies sick call and dental care Serves as a core resource in the preparation for correctional nursing certification exams
