New Kind Of Country:

A New Kind of Country Dorothy Gilman, 1978-01-01 Novelist Dorothy Gilman author of the bestselling Mrs Pollifax series had reached a point of no return in her life With her sons in college Ms Gilman was searching for something unknowable unnameable until she bought a small house in a little lobstering village in Nova Scotia Canada And so she began her life again discovering talents and interests she never realized were hers accepting the inner peace she had always fought and most of all understanding the untapped part of herself almost as if it were a new kind of country to challenge explore and love

Before the Country Stephanie McKenzie, 2007-11-25 In the late 1960s and early 1970s Canada witnessed an explosion in the production of literary works by Aboriginal writers a development that some critics have called the Native Renaissance In *Before the Country* Stephanie McKenzie explores the extent to which this growing body of literature influenced non Native Canadian writers and has been fundamental in shaping our search for a national mythology In the context of Northrop Frye's theories of myth and in light of the attempts of social critics and early anthologists to define Canada and Canadian literature McKenzie discusses the ways in which our decidedly fractured sense of literary nationalism has set indigenous culture apart from the mainstream She examines anew the aesthetics of Native Literature and in a style that is creative as much as it is scholarly McKenzie incorporates the principles of storytelling into the unfolding of her argument This strategy not only enlivens her narrative but also underscores the need for new theoretical strategies in the criticism of Aboriginal literatures *Before the Country* invites us to engage in one such endeavour

The Iron Horse in Indian Country Alessandra La Rocca Link, 2025 *The Iron Horse in Indian Country* Native Americans and Railroads in the U S West explores how Indigenous peoples across the trans Mississippi West adapted to the railroad revolution of the nineteenth and early twentieth centuries Historians have long pondered the profound and far reaching role of railroads in transforming the United States economic political social and physical landscapes This book decenters and reframes this work by spotlighting how Native Americans incorporated railroads into their own socio economic political and cultural networks This Indigenous process of incorporation challenges deep seated stereotypes of Indians as either violently resisting the juggernaut of the Iron Horse or simply vanishing at the first blast of a locomotive's whistle It begins with a study of Indigenous contributions to the Pacific Railway Surveys of the 1850s and extends through to the rise of two significant intertribal organizations The Society of American Indians and the Native American Church The work charts two key trends in railroad colonialism the rise of eminent domain as the legal backing for Indigenous dispossession and the role of railroad expansion in the decision to end treaty relations between Native nations and the federal government And yet this book demonstrates that even as railroad driven settler colonialism brought disease economic displacement and dispossession to Indigenous communities Native peoples eventually turned the railroad into a literal and figurative vehicle of survival appropriating and repurposing this novel technology to establish themselves as decisive actors in a modern world

Country Competitiveness Bruce Kogut, 1993-08-05 With the expansion of global competition through international trade agreements and heightened rivalry between firms in the domestic market, it is easy to understand why a firm would seek to compete by lowering the wages paid to labor. Yet this strategy is troubled not only by the efforts of other firms pursuing cheaper labor costs but also by the failure to adopt better ways of organizing work. New products are copied within a short time after introduction. What is difficult to imitate is the organizing of work as applied to the factory floor, to the corporation, and to relations among firms and other institutions. This book explores detailed case studies of individual firms, country comparisons, and historical patterns of diffusion. The authors emphasize that the speed by which a firm adopts and integrates new technologies and ways of organizing must be understood in the context of the strength of the regional and national network of firms and institutions. The chapters in the book are written by world

renowned scholars including Giovanni Dosi Horst Kern Michael Schumann and Eleanor D Westner and represent major schools of thought from Germany France the U S Japan and the United Kingdom The studies are international in nature and include in depth analyses of software systems automobile manufacturing e g the Toyota Production System and the machine tool industry Greece Country Study Guide Volume 1 Strategic Information and Developments IBP USA,2013-08 Greece Country Study Guide Strategic Information and Developments Volume 1 Strategic Information and Developments
