**Economics: The Language Question in Africa** Nkonko M. Kamwangamalu, 2016-04-23 This book addresses the perennial question of how to promote Africa's indigenous languages as medium of instruction in educational systems Breaking with the traditional approach to the continent's language question by focusing on the often overlooked issue of the link between African languages and economic development Language Policy and Economics argues that African languages are an integral part of a nation's socio-political and economic development Therefore the book argues that any language policy designed to promote these languages in such higher domains as the educational system in particular must have economic advantages if the intent is to succeed and proposes Prestige Planning as the way to address this issue The proposition is a welcome break away from language policies which pay lip service to the empowerment of African languages while by default strengthening the stranglehold of imported European languages      **English as a Local Language** Christina Higgins, 2009-07-08 When

analyzed in multilingual contexts English is often treated as an entity that is separable from its linguistic environment It is often the case however that multilinguals use English in hybrid and transcultural ways This book explores how multilingual East Africans make use of English as a local resource in their everyday practices by examining a range of domains including workplace conversation beauty pageants hip hop and advertising Drawing on the Bakhtinian concept of multivocality the author uses discourse analysis and ethnographic approaches to demonstrate the range of linguistic and cultural hybridity found across these domains and to consider the constraints on hybridity in each context By focusing on the cultural and linguistic bricolage in which English is often found the book illustrates how multilinguals respond to the tension between local identification and dominant conceptualizations of English as a language for global communication      **Encyclopedia of**
