New Communications:

To Inform Or to Control? Oswald Harold Ganley, Gladys D. Ganley, 1989 The New Communications Technologies
Michael M. Mirabito, Barbara L. Morgenstern, 2004 A complete explanation of today's communication technologies and their impact Journal of New Communications Research - Vol. II/Issue 1 - Spring/Summer 2007 , The New Communications
Frederick Williams, 1984-01-01 The New Communications. (2. Ed.). Frederick Williams, 1989 The New Communications Technologies Michael M. Mirabito, Barbara L. Morgenstern, 1990 Reshaping Communications Paschal Preston, 2001-02-05 It is a cliché but this book is timely welcome and indeed a breath of fresh air. It is of particular value for people concerned with public communications, political economy, economics, and the relationship between society and technology. Moreover, this book powerfully dispels the tacit assumption prevalent in business, politics, media, and academia that a combination of technical fixes and the free market can right all social problems. Irish Journal of Sociology Thirty years ago one writer complained that to admire technology is all out of fashion. Today excited claims are made for the impact that these technologies are having on social, political, and economic life. But how are we to assess these claims? This book critically interrogates many of the prevailing ideas, offers a fresh perspective on this new digital age. Reshaping Communications Provides an alternative and more grounded account of the complex interplay between new technology and information structures and changes in society. Illuminates the fundamental continuities as well as changes in socioeconomic and political processes. Draws on an interdisciplinary perspective and original empirical research. The book will be essential reading for all those concerned with the new communication technologies, including students of media and communications as well as policy makers.

Networks of Communication in South Africa R. Sooryamoorthy, 2017-06-15 This book is an original study on the development of media technologies, communications, and social networks in South Africa. It is for those researching the growth of communication technology and new media in Africa as well as those more widely involved in development studies and economics.
