## **New Communications Landscape Demystifying Media Globalization:**

*The New Communications Landscape* Anura Goonasekera, Jan Servaes, Georgette Wang, 2003-09-02 New Communications Landscape explores the theories of media globalization with emphasis on the areas of cultural and local television markets It focuses on the industry content and strategy audience policy and future research *The New Communications Landscape*, 2000 *The Myth of Media Globalization* Kai Hafez, 2013-07-08 The ongoing interconnection of the world through modern mass media is generally considered to be one of the major developments underpinning globalization This important book considers anew the globalization phenomenon in the media sphere Rather than heralding globalization or warning of its dangers as in many other books Kai Hafez analyses the degree to which media globalization is really taking place Do we have enough evidence to show that there is a linear and accelerated move towards transnationalization in the media All too often the empirical data presented seems rather more anecdotal than representative Many transborder media phenomena are overestimated and taken out of the context of locally and nationally oriented mainstream media processes all over the world The inherent danger is that a central paradigm of the social sciences rather than bearing scholarly substance will turn out to be a myth and even a sometimes dangerously ideological tool Based on a theoretical debate of media globalization the work discusses most major fields of media development including foreign reporting satellite TV film internet foreign broadcasting media and migration media policy and media economy As an important new contribution to timely debates *The Myth of Media Globalization* will be essential and provocative reading for students and scholars alike *Aesthetic Practices and Politics in Media, Music, and Art* Rocío G. Davis, Dorothea Fischer-Hornung, Johanna C. Kardux, 2010-09-13 This volume analyzes innovative forms of media and music art installations television commercials photography films songs telenovelas to examine the performance of migration in contemporary culture Though migration studies and media studies are ostensibly different fields this transnational collection of essays addresses how their interconnection has shaped our understanding of the paradigms through which we think about migration ethnicity nation and the transnational Cultural representations intervene in collective beliefs Art and media clearly influence the ways the experience of migration is articulated and recalled intervening in individual perceptions as well as public policy To understand the connection between migration and diverse media the authors examine how migration is represented in film television music and art but also how media shape the ways in which host country and homeland are imagined Among the topics considered are new mediated forms for representing migration widening the perspective on the ways these representations may be analyzed readings of enactments of memory in trans and inter disciplinary ways and discussions of globalization and transnationalism inviting us to rethink traditional borders in respect to migration nation states as well as disciplines *The Global Public Sphere* Ingrid Volkmer, 2014-07-17 Over the last several years the debate about publics seems to have newly emerged This debate critically reflects the Habermasian ideal of a national public sphere in a transnational context However it seems that the issue of a reconstruction

of a global public sphere is more complex In this brilliant and provocative book Ingrid Volkmer argues that a reflective approach of globalization is required in order to identify and deconstruct key strata of deliberate public discourse in supra and subnational societal formations This construction helps to understand the new processes of legitimacy at the beginning of the 21st century in which the traditional conception of a public and its role as a legitimizing force are being challenged and transformed The book unfolds this key phenomenon of global deliberate interconnectedness as a discursive and negotiated dimension within reflective globalization i e continuously constituting maintaining and refining the life of the global public and conceptualizes a global public sphere Offering insightful case studies to illustrate this new theory of the global public sphere the book will be essential reading for students and scholars of media and communication studies and social and political theory

**Global Media Ethics and the Digital Revolution** Nouredine Miladi, 2021-11-29 This volume responds to the challenges posed by the rapid developments in satellite TV and digital technologies addressing media ethics from a global perspective to discuss how we can understand journalism practice in its cultural contexts An international team of contributors draw upon global and non Western traditions to discuss the philosophical origins of ethics and the tension that exists between media institutions the media market and political ideological influencers The chapters then unveil the discrepancies among international journalists in abiding by the ethics of the profession and the extent to which media ethics are understood and applied in their local context environment Arguing that the legitimacy of ethics comes not from the definition per se but from the extent to which it leads to social good the book posits this should be the media's raison d'être to abide by globally accepted ethical norms in order to serve the common good Taking a truly global approach to the question of media ethics this volume will be an important resource for scholars and students of journalism communication studies media studies sociology politics and cultural studies
