Seizures Norman Delanty, 2001-11-27 Seizures are frightening events They frighten the patients who experience them they frighten those who witness them they also frighten many physicians who have to deal with them Most individuals with seizures present to family physicians or to emergency room physicians However despite the fact that seizures are among the most common neurological conditions most general practitioners family practice specialists and internists do not see large numbers of patients with seizures Given the apoplectic appearance of generalized tonic clonic convulsions it is not difficult to understand why they arouse such emotional responses in those that experience them those that witness them and those

whose care is sought for them Seizures are symptoms of something wrong with the brain Many different kinds of perturbations in brain anatomy chemistry or physiology can produce seizures For many individuals seizures occur in the context of an acute illness and will not recur once that illness is treated These individuals do not have epilepsy They have transient disturbances in brain function attributable to systemic medical conditions It is important to recognize these issues because first the seizure may be the initial or even only manifestation of the underlying medical problem and this needs to be recognized

Radiology of Infectious Diseases: Volume 1 Hongjun Li, 2015-08-28 This book provides a comprehensive overview of diagnostic imaging in infectious diseases It starts with a general review of infectious diseases including their classification characteristics and epidemiology In separate chapters the authors then introduce the radionuclide imaging of 50 kinds of infectious diseases Volume 1 covers 21 viral infections Volume 2 has 29 chapters discussing 24 bacterial infections and 5 parasitic infections Each disease is clearly illustrated using cases combined with high quality computed tomography CT and magnetic resonance imaging MRI The book provides a valuable reference source for radiologists and doctors working in the area of infectious diseases
