Demissie,2016-12-05 Colonial architecture and urbanism carved its way through space ordering and classifying the built environment while projecting the authority of European powers across Africa in the name of science and progress The built urban fabric left by colonial powers attests to its lingering impacts in shaping the present and the future trajectory of postcolonial cities in Africa Colonial Architecture and Urbanism explores the intersection between architecture and urbanism as discursive cultural projects in Africa Like other colonial institutions such as the courts police prisons and schools that were crucial in establishing and maintaining political domination colonial architecture and urbanism played a pivotal role in shaping the spatial and social structures of African cities during the 19th and 20th centuries Indeed it is the cultural destination of colonial architecture and urbanism and the connection between them and colonialism that the volume seeks to critically address The contributions drawn from different interdisciplinary fields map the historical processes of colonial architecture and urbanism and bring into sharp focus the dynamic conditions in which colonial states officials architects planners medical doctors and missionaries mutually constructed a hierarchical and exclusionary built environment that served the wider colonial project in Africa **A Companion to Modern African Art** Gitti Salami,Monica Blackmun

A. Bremner, 2016-10-13 Throughout today's postcolonial world buildings monuments parks streets avenues entire cities even remain as witness to Britain's once impressive if troubled imperial past These structures are a conspicuous and near inescapable reminder of that past and therefore the built heritage of Britain's former colonial empire is a fundamental part of how we negotiate our postcolonial identities often lying at the heart of social tension and debate over how that identity is best represented This volume provides an overview of the architectural and urban transformations that took place across the British Empire between the seventeenth and mid twentieth centuries Although much research has been carried out on architecture and urban planning in Britain's empire in recent decades no single comprehensive reference source exists The essays compiled here remedy this deficiency With its extensive chronological and regional coverage by leading scholars in the field this volume will quickly become a seminal text for those who study teach and research the relationship between empire and the built environment in the British context It provides an up to date account of past and current historiographical approaches toward the study of British imperial and colonial architecture and urbanism and will prove equally useful to those who study architecture and urbanism in other European imperial and transnational contexts The volume is divided in two main sections The first section deals with overarching thematic issues including building typologies major genres and periods of activity networks of expertise and the transmission of ideas the intersection between planning and politics as well as the architectural impact of empire on Britain itself The second section builds on the first by discussing these themes in relation to specific geographical regions teasing out the variations and continuities observable in context both practical and theoretical **Contemporary Architects** Muriel Emanuel, 2016-01-23
