What is Architectural History? Andrew Leach, 2013-04-25 What is Architectural History considers the questions and problems posed by architectural

historians since the rise of the discipline in the late nineteenth century How do historians of architecture organise past time and relate it to the present How does historical evidence translate into historical narrative Should architectural history be useful for practicing architects If so how Leach treats the disciplinarity of architectural history as an open question moving between three key approaches to historical knowledge of architecture within art history as an historical specialisation and most prominently within architecture He suggests that the confusions around this question have been productive ensuring a rich variety of approaches to the project of exploring architecture historically Read alongside introductory surveys of western and global architectural history this book will open up questions of perspective frame and intent for students of architecture art history and history Graduate students and established architectural historians will find much in this book to fuel discussions over the current state of the field in which they work      **Sustainability and Privilege** Gabriel

Arboleda, 2022-05-13 Social design the practice of designing for poverty relief is one of the most popular fields in contemporary architecture Its advocates focusing on the architect s creativity and good intentions are overwhelmingly laudatory while its detractors concerned with the experience of its beneficiaries have dismissed it as an expression of cultural imperialism Placed midway between innocuous celebration and radical critique Sustainability and Privilege highlights the lessons that can be learned from social design s current limitations and proposes a feasible way to improve this practice In this broad ranging account enlivened by fieldwork and case studies Gabriel Arboleda contends that social design s invocation of sustainability often serves to marginalize and displace vulnerable populations through projects that involve experimentation of faulty alternative technologies or that result in so called green gentrification or that impose untoward economic and other burdens Arboleda is fiercely critical of the way social design has been carried out in impoverished regions of the world most notably in Africa and Latin America In addressing the challenges posed by issues of privilege in social design s use of sustainability the book proposes a new interdisciplinary approach called ethnoarchitecture arguing for a simpler open ended and stakeholder driven process that eliminates the casual imposition of the architect s ideas on vulnerable populations foregrounding the people s voices experience and input in social design practice      Mes-Z,
