## **New European Music:**

A New European Music Hans Adolf Neunzig, 1985 The history of European music in the 17th and 18th centuries is associated with three names the names of men who contributed decisively to the development and dissemination of new musical forms and structures which were to affect and dominate the future They are Heinrich Schutz 1585 1672 George Frideric Handel 1685 1759 and Johann Sebastian Bach 1685 1750 A century before Bach and Handel Heinrich Schutz became the father of modern music through the combination and assimilation of the Italian Netherlands music with the traditional musical forms of central Germany Without his work and his musical theories which were carried out into the world by his pupils neither the Baroque nor the Classical and Romantic music of Germany and Europe would have existed in the forms we know In George Frideric Handel the music of the Baroque found its ambassador With his operas and still more with his great oratorios he is the complete expression of the Baroque response to life and the wealth of musical expression of that period But the point of convergence of all European music is the work of the composer whom all Western music was to take its authority from then on Johann Sebastian Bach Their life their creativity and their influence on the history of music is outlined in the chapters of this book This account includes their origins evolution and social environment as well as their musical development

**The Making of European Music in the Long Eighteenth Century** D. R. M. Irving, 2024-09-03 Musical representations of Europe in myth and allegory are well known but when and under what circumstances did the words European and music become linked together What did the resulting term mean in music before 1800 and how did it evolve into the label Western music which features so prominently in pedagogical and scholarly discourses In *The Making of European Music in the Long Eighteenth Century* author D R M Irving traces the emergence of such large scale categories in Western European thought Beginning in the 1670s Jesuit missionaries in China began to refer to European music and for the next hundred years the term appeared almost exclusively in comparison with musics from other parts of the world It entered common use from the 1770s and in the 1830s became synonymous with a new concept of Western music Western European writers also associated these terms with notions of progress and perfection Meanwhile changing ideas about modern Europe's cultural relationship with classical antiquity together with theories that systematically and condescendingly racialized people from other continents influenced the ways that these scholars imagined and interpreted musical pasts around the globe Irving weaves his analyses throughout the book's historical examinations suggesting that European music originates from self fashioning in contexts of intercultural comparison outside the continent rather than from the resolution of national

aesthetic differences within it He shows that Western music as understood today arose in line with the growth of Orientalism and increasing awareness of musics of the East All such reductive terms often imply homogeneity and essentialism and Irving asks what a reassessment of their beginnings might mean for music history Taken as a whole the book shows how a renewed critique of primary sources can help dismantle historiographical constructs that arose within narratives of musical pasts involving Europe

**Revival and Reconciliation** Philip V. Bohlman, 2013-06-07 Sacred music has long contributed fundamentally to the making of Europe The passage from origin myths to history the sacred journeys that have mobilized pilgrims crusaders and colonizers the politics and power sounded by the vox populi all have joined in counterpoint to shape Europe's historical *longue durée* Drawing upon three decades of research in European sacred music Philip V Bohlman calls for a reexamination of European modernity in the twenty first century a modernity shaped no less by canonic religious and musical practices than by the proliferation of belief systems that today more than ever respond to the diverse belief systems that engender the New Europe In contrast to most studies of sacred musical practice in European history with their emphasis on the musical repertoires and ecclesiastical practices at the center of society Bohlman turns our attention to individual and marginalized communities and to the collectives of believers to whose lives meaning accrues upon sounding the sacred together In the historical chapters that open *Revival and Reconciliation* Bohlman examines the genesis of modern history in the convergence and conflict that lie at the heart of the Abrahamic faiths Judaism Christianity and Islam Critical to the meaning of these religions to Europe Bohlman argues has been their capacity to mobilize both sacred journey and social action which enter the everyday lives of Europeans through folk religion pilgrimage and politics the subjects of the second half of his study The closing sections then cross the threshold from history into modernity above all that of the New Europe with its return to religion through revival and reconciliation Based on an extensive ethnographic engagement with the sacred landscapes and sites of conflict in twenty first century Europe Bohlman calls in his final chapters for new ways of hearing the silenced voices and the full chorus of sacred music in our contemporary world Ethnomusicologists from different traditions as well as scholars of religious studies and the history of modern Europe will find *Revival and Reconciliation* a fascinating exploration of the connections between sacred music and the role it plays in the formations of the modern self

Bohlman, 2000-12 A specter lurks in the house of music and it goes by the name of race write Ronald Radano and Philip Bohlman in their introduction Yet the intimate relationship between race and music has rarely been examined by contemporary scholars most of whom have abandoned it for the more enlightened notions of ethnicity and culture Here a distinguished group of contributors confront the issue head on Representing an unusually broad range of academic disciplines and geographic regions they critically examine how the imagination of race has influenced musical production reception and scholarly analysis even as they reject the objectivity of the concept itself Each essay follows the lead of the substantial introduction which reviews the history of race in European and American non
