Colonel David M Glantz, 2015-11-06 Includes 19 tables 7 figures 41 maps To be successful a strategic military operation
requires careful planning and meticulous execution History applauds the commander who orchestrates the operation and
major subordinate commanders share in the glory In reality however commanders and soldiers at the operational and tactical
levels play an even more critical role in achieving battlefield success History often accords them little attention Practitioners
of war must study war at all levels An understanding of the strategic aspects of military operations is essential in order to
provide a context for a more detailed and equally critical understanding of precise operational and tactical techniques Few
officers practice war at the strategic level The majority wrestle with the myriad of problems associated with implementing
those strategic plans Leavenworth Paper no 8 through the medium of detailed case studies examines the operational and
tactical aspects of a major strategic operation the Soviet offensive in Manchuria in 1945 The case studies which involve army
corps division regimental and battalion operations focus on the many problems commanders and soldiers at that level face
Constrained by time a desperate enemy rugged terrain and severe climatic conditions the realities of war Soviet commanders
