New Geopolitics:

Asia's New Geopolitics Michael R. Auslin, 2020-05-01 The Indo Pacific is fast becoming the world's dominant region. As it grows in power and wealth, geopolitical competition has reemerged, threatening future stability not merely in Asia but around the globe. China is aggressive and uncooperative and increasingly expects the world to bend to its wishes. The focus on Sino-US competition for global power has obscured Asia's other great game: the rivalry between Japan and China. A modernizing India risks missing out on the energies and talents of millions of its women, potentially hampering the broader role it can play in the world. And in North Korea, the most frightening question raised by Kim Jong-un's pursuit of the ultimate weapon is also the simplest: can he control his nukes. In *Asia's New Geopolitics: Essays on Reshaping the Indo-Pacific*, Michael R. Auslin examines these and other key issues transforming the Indo-Pacific and the broader world. He also explores the history of American strategy in Asia from the 18th century through today. Taken together, Auslin's essays convey the richness and diversity of the region with more than three billion people. The Indo-Pacific contains over half of the global population, including the world's two most populous nations, India and China. In a riveting final chapter, Auslin imagines a war between America and China in a bid for regional hegemony and what this conflict might look like.

New Geopolitics Michael Don Ward, 2022-02-16 First Published in 1992. This volume focuses upon the synergy between geography and international politics. A new geopolitics is developed, bringing together the insights of political geography and international relations. In each chapter, leading scholars focus on the spatial context through which contemporary world politics are conducted. War, conflict, cooperation, state building, and power are examined in a geopolitical context.

Rising Powers, Shrinking Planet Michael Klare, 2008-04-15 Analyzes how control of the world's diminishing sources of energy and natural resources will result in a future of new alliances and new global threats in which finite sources of oil, natural gas, uranium, coal, and copper will be up for grabs.

The Geopolitics Reader Simon Dalby, Paul Routledge, Gearóid Ó Tuathail, 2003-08-01 The *Geopolitics Reader* offers an interdisciplinary sourcebook of the most important political, geographical, historical, and sociological readings of geopolitics in the late twentieth century. The Reader is divided into five parts which draw on the most illuminating examples of imperial, Cold War, contemporary geopolitics, new environmental themes, and multiple resistances to the practices of geopolitics. The editors provide comprehensive introductions and critical comment at the beginning of each part, and visual geopolitical texts in the form of political cartoons are integrated throughout. Encouraging exploration of divergent viewpoints of global conflict and change, this invaluable compendium includes readings by Martin Luther King, Vaclav Havel, and George Bush.

Axis of Convenience Bobo Lo, 2009-08-01 Few relationships have been as misunderstood as the strategic partnership between Russia and China. Official rhetoric portrays it as the very model of international cooperation. Moscow and Beijing claim that ties are closer and warmer than at any time in history. In reality, however, the picture is highly ambiguous. While both sides are committed to multifaceted engagement, cooperation is complicated by historical suspicions.

cultural prejudices geopolitical rivalries and competing priorities For Russia China is at once the focus of a genuine convergence of interests and the greatest long term threat to its national security For China Russia is a key supplier of energy and weapons but is frequently dismissed as a self important power whose rhetoric far outstrips its real influence A xis of Convenience cuts through the mythmaking and examines the Sino Russian partnership on its own merits It steers between the overblown interpretation of an anti Western particularly anti American alliance and the complacent assumption that past animosities and competing agendas must always divide the two nations Their relationship reflects a new geopolitics one that eschews formal alliances in favor of more flexible and opportunistic arrangements Ultimately it is an axis of convenience driven by cold eyed perceptions of the national interest In evaluating the current state and future prospects of the relationship Bobo Lo assesses its impact on the evolving strategic environments in Central and East Asia He also analyzes the global implications of rapprochement between Moscow and Beijing focusing in particular on the geopolitics of energy and Russia China U S triangularism
