New Geopolitics Of Eurasia And Turkey's Position:

The New Geopolitics of Eurasia and Turkey's Position Bulent Aras,2013-01-11 This work explores the geopolitical struggles that are currently underway in the newly independent states of the Caucasus region showing how many players in the region are coalescing into two opposing blocs The growing political military and economic ties amongst the countries of these two blocs stem from a number of developments in the region most notably the fall of the Soviet Union and consequently the end of the Cold War and its bi polar global alliance structure These blocs are competing for influence in the region and the rights to exploit and transport the rich energy resources that have been found in the Caspian Sea The text shows how many actors have been willing to co operate in other non energy related issues in the hope of receiving a financial reward when countries do decide on these matters

Heartlands of Eurasia Anita Sengupta,2009-07-16 *Heartlands of Eurasia* explores how received metageographical knowledge informs the understanding of global processes and is subsequently transformed into geopolitical reasoning with foreign policy implications It provides a detailed examination of writings from both within the region and outside that look into the significance of Halford Mackinder s heritage in the context of a vastly changed world situation In particular it attempts to examine how policy makers and strategic thinkers have used these geopolitical concepts as justification for their policy in the region Finally it attempts an analysis of the extent to which this policy thinking was translated into practice While the study looks into how the vision of the pivotal significance of a vast expanse of land finds its echoes in contemporary narratives it also underlines the very creative ways in which Mackinder s ideas have been reinterpreted in keeping with the changing global dynamics Making use of the way in which the region has been traditionally defined and the way in which the people defined themselves the study brings into focus a debate on the usefulness of region or area based studies that are located in geographical imaginations Anita Sengupta uses this connection to examine the following issues geopolitical imaginations and their relevance in identifying areas in the present context the intersection between how areas are defined from an outsider perspective and how people define themselves the extent to which these definitions have influenced policy and the possibility or feasibility of the development of alternative geostrategic discourses Mackinder himself did not specify the geographical area identified first as the pivot and later the heartland but his ideas were focused on the closed heartland of Euro Asia an area that was unassailable by sea power This study therefore centers its debates around the Eurasian space in general though the focus is on the Central Asian region and Uzbekistan in particular The book is ideal for specialists working on the Eurasian region graduate students interested in geopolitics as well as Eurasian and Central Asian studies and undergraduates studying political science and international relations

Revolutionaries and Reformers Barry Rubin,2012-02-01 Islamist movements seeking power today are faced with difficult choices regarding strategy ranging from armed struggle to electoral efforts An emerging alternative consists of a rethinking of Islamist politics where the goal of a totally Islamic polity would be abandoned in favor of some form of Islamic oriented society In this reformulation Islamist politics would function as a pressure group to make society more Islamic reinforcing the walls of semi separate internal communities and reinterpreting Islam in more liberal ways The September 11 2001 terror attack on the United States however demonstrates that the radical approach remains attractive to many Islamists Addressing these issues the contributors look at the countries where Islamist movements have been most important Case studies of revolutionary and reformist groups are followed by chapters discussing future alternatives for Islamist politics presenting arguments both advocating and critical of a potential liberal reformist interest group Islamism

Security of Natural Gas Supply through Transit Countries Jens Hetland,Teimuraz Gochitashvili,2004-06-29 Jens HETLAND the commercialisation of natural gas fields is inherently linked to rigid transportation systems that require huge investments in tangible assets fixed to specific locations the supply of natural gas is constrained by the transportation system and requires access to appropriate infrastructure for transport and distribution the trading of natural gas is traditionally associated with long term contracts albeit the duration per se of gas transport contracts appears to be less important after the deregulation of the energy markets As diversification is strategically important to modern societies the security of energy supplies becomes an inherent issue In order to avoid situations of shortage and to

keep the price level stable industrial nations are paying attention to the security of energy supplies In brief terms this means that having more than one supplier of natural gas and more than one transport route would be strategically important This also affects political issues and international law and regulations economics science and technology The purpose of this book is to address opportunities extended from science and research pertaining to the exploitation and international trading of natural gas that involves transit countries This especially relates to the transport and handling of gas from remote regions and pipelines that are

Israel's Foreign Policy Beyond the Arab World Jean-Loup Samaan, 2017-11-28 For over 60 years Israel's foreign policy establishment has looked at its regional policy through the lens of a geopolitical concept named the periphery doctrine The idea posited that due to the fundamental hostility of neighboring Arab countries Israel ought to counterbalance this threat by engaging with the periphery of the Arab world through clandestine diplomacy Based on original research in the Israeli diplomatic archives and interviews with key past and present decision makers this book shows that this concept of a periphery was and remains a core driver of Israel's foreign policy The periphery was borne out of the debates among Zionist circles concerning the geopolitics of the nascent Israeli State The evidence from Israel's contemporary policies shows that these principles survived the historical relationships with some countries Iran Turkey Ethiopia and were emulated in other cases Azerbaijan Greece South Sudan and even to a certain extent in the attempted exchanges by Israel with Gulf Arab kingdoms The book enables readers to understand Israel's pessimistic or realist in the traditional sense philosophy when it comes to the conduct of foreign policy The history of the periphery doctrine sheds light on fundamental issues such as Israel's role in the regional security system its overreliance on military and intelligence cooperation as tools of diplomacy and finally its enduring perception of inextricable isolation Through a detailed appraisal of Israel's periphery doctrine from its birth in the fifties until its contemporary renaissance this book offers a new perspective on Israel's foreign policy and will appeal to students and scholars of Middle East Politics and History and International Relations
