New Idols Of The Cave On The Limits Of Anti Realism:

New Idols of the Cave Christopher Norris, 1997 This book offers a broad based critical survey of recent anti realist arguments in the philosophy of science cultural theory hermeneutics the sociology of knowledge and the interpretation of quantum mechanics

Epistemology: Key Concepts in Philosophy Christopher Norris, 2005-10-20 Christopher Norris attempts to make epistemology the theory of knowledge accessible to students and those with little prior knowledge of the subject through a series of debates which aim to give an balanced overview

Kierkegaard, Language and the Reality of God Steven Shakespeare, 2017-07-12 This title was first published in 2001 Debate about the reality of God risks becoming an arid stalemate An unbridgeable gulf seems to be fixed between realists arguing that God exists independently of our language and beliefs and anti realists for whom God language functions to express human spiritual ideals with no reference to a reality external to the faith of the believer Soren Kierkegaard has been enlisted as an ally by both sides of this debate Kierkegaard Language and the Reality of God presents a new approach exploring the dynamic nature of Kierkegaard s texts and the way they undermine neat divisions between realism and anti realism objectivity and subjectivity Showing that Kierkegaard s understanding of language is crucial to his practice of communication and his account of the paradoxes inherent in religious discourse Shakespeare argues that Kierkegaard advances a form of ethical realism in which the otherness of God is met in the making of liberating signs Not only are new perspectives opened on Kierkegaard s texts but his own contribution to ongoing debates is affirmed in its vital creative and challenging significance

On Truth and Meaning Christopher Norris, 2006-06-15 Christopher Norris presents a wide ranging and distinctively angled perspective on many of the most challenging topics in current philosophical debate and explores a range of issues in epistemology ethics and philosophy of mind language and logic The book marks a further stage in the author s project of developing a realist truth based approach that would point a way beyond the various unresolved dilemmas and dichotomies bequeathed by old style logical empiricism In a series of closely argued chapters Norris draws out the two chief kinds of deficit normative and causal explanatory that have characterised much recent work in the analytic line of descent He gives a shrewd diagnostic account of the rift that opened up between the two traditions of contemporary philosophic thought one consequence of which was the analytic failure to develop precisely those normative resources that were needed in order to break out of that impasse The book also engages critically with the work of Donald Davidson Saul Kripke John McDowell Hilary Putnam Neil Tennant and Crispin Wright and mounts a vigorous challenge to the prominent strain of anti realist thinking developed on logico semantic and metaphysical grounds by Michael Dummett

Language, Logic and Epistemology C. Norris, 2004-02-25 Norris presents a series of closely linked chapters on recent developments in epistemology philosophy of language cognitive science literary theory musicology and other related fields While to this extent adopting an interdisciplinary approach Norris also very forcefully challenges the view that the academic disciplines as we know them are so many artificial constructs of

recent date and with no further role than to prop up existing divisions of intellectual labour He makes his case through some exceptionally acute revisionist readings of diverse thinkers such as Derrida Paul de Man Wittgenstein Chomsky Michael Dummett and John McDowell In each instance Norris stresses the value of bringing various trans disciplinary perspectives to bear while none the less maintaining adequate standards of area specific relevance and method Most importantly he asserts the central role of recent developments in cognitive science as pointing a way beyond certain otherwise intractable problems in philosophy of mind and language *Derrida, Badiou and the Formal Imperative* Christopher Norris,2012-08-02 In this path breaking study Christopher Norris proposes a transformed understanding of the much exaggerated differences between analytic and continental philosophy While keeping the analytic tradition squarely in view his book focuses on the work of Jacques Derrida and Alain Badiou two of the most original and significant figures in the recent history of ideas Norris argues that these thinkers have decisively reconfigured the terrain of contemporary philosophy and between them pointed a way beyond some of those seemingly intractable issues that have polarised debate on both sides of the notional rift between the analytic and continental traditions In particular his book sets out to show against the received analytic wisdom that continental philosophy has its own analytic resources and is capable of bringing some much needed fresh insight to bear on problems in philosophy of language logic and mathematics Norris provides not only a unique comparative account of Derrida's and Badiou's work but also a remarkably wide ranging assessment of their joint contribution to philosophy's current if widely resisted potential for self transformation God, the Mind's Desire Paul D. Janz,2004-05-06 This 2004 book reconfigures the basic problem of Christian thinking How can human discourse refer meaningfully to a transcendent God as a twofold demand for integrity integrity of reason and integrity of transcendence Centring around a provocative yet penetratingly faithful re reading of Kant's empirical realism and drawing on an impelling confluence of contemporary thinkers including MacKinnon Bonhoeffer Marion Putnam Nagel Paul D Janz argues that theology's referent must be located within present empirical reality Rigorously reasoned yet refreshingly accessible throughout this book provides an important attentively informed alternative to the growing trends toward obscurantism radicalization and anti reason in many recent assessments of theological cognition while remaining equally alert to the hazards of traditional metaphysics In the book's culmination epistemology and Christology converge around problems of noetic authority and orthodoxy with a kind of innovation depth and straightforwardness that readers of theology at all levels of philosophical acquaintance will find illuminating The New Utopian Politics of Ursula K. Le Guin's The Dispossessed Laurence Davis,Peter Stillman,2005-11-22 The Dispossessed has been described by political thinker Andre Gorz as The most striking description I know of the seductions and snares of self managed communist or in other words anarchist society To date however the radical social cultural and political ramifications of Le Guin's multiple award winning novel remain woefully under explored Editors Laurence Davis and Peter Stillman right this state of affairs in the first ever collection of original essays devoted to Le Guin's

novel Among the topics covered in this wide ranging international and interdisciplinary collection are the anarchist ecological post consumerist temporal revolutionary and open ended utopian politics of *The Dispossessed* The book concludes with an essay by Le Guin written specially for this volume in which she reassesses the novel in light of the development of her own thinking over the past 30 years

A Companion to Derrida Zeynep Direk, Leonard Lawlor, 2014-07-02 A Companion to Derrida is the most comprehensive single volume reference work on the thought of Jacques Derrida Leading scholars present a summary of his most important accomplishments across a broad range of subjects and offer new assessments of these achievements The most comprehensive single volume reference work on the thought of Jacques Derrida with contributions from highly prominent Derrida scholars Unique focus on three major philosophical themes of metaphysics and epistemology ethics religion and politics and art and literature Introduces the reader to the positions Derrida took in various areas of philosophy as well as clarifying how derrideans interpret them in the present Contributions present not only a summary of Derrida s most important accomplishments in relation to a wide range of disciplines but also a new assessment of these accomplishments Offers a greater understanding of how Derrida s work has fared since his death

Modernity, Modernism, Postmodernism Terry Eagleton, 2000

Deconstruction After All Christopher Norris, 2015-10-01 This collection of interviews reflections and creative criticism presents Christopher Norris s vigorous polemics with Hayden White Michel Foucault Jean Baudrillard Jean Francois Lyotard Thomas Kuhn Emmanuel Levinas Pierre Bourdieu Richard Rorty and Stanley Fish Alongside Norris s uncompromising critiques there emerge passages of close and careful reading of Jacques Derrida s texts as he cites and reiterates Derrida s philosophical contexts in the works of Immanuel Kant Gaston Bachelard and Georges Canguilhem and in the current discursive fields of epistemology and philosophy of science The book also offers a coda of essays on Frank Kermode Terry Eagleton and Terence Hawkes This collection prefaced with the author s own academic memoir provides an accessible and provocative introduction to Norris s critical thought and highlights the wide range of his interests and philosophical engagements

ISLA 1 Tetsuji Yamamoto, 1998 This volume presents original writings and interviews with prominent thinkers on the front lines of an international intellectual effort to reconsider the fundamental terms of modernity and promote a philosophical design that reconsiders the significance of modernity itself

Interference Patterns Jon Adams, 2007 The story of twentieth century literary criticism can be told as a story about methodological anxieties anxieties fostered by the success of the sciences and enacted by critics who have tried to set the study of literary texts on a more scientific basis At the macrostructural level were taxonomists Northrop Frye attempted to locate literature s conceptual center and organize Ptolemaic satellite myths around it inferring the existence of literature from the possibility of criticism linguistic microstructure seeking and finding unsuspected levels of complexity first in Baudelaire and Shakespeare then in lesser poets then in advertising slogans After the collapse of the structuralist project calls for the scientization of literary study have increasingly come from outside the humanities where despairing of criticism s

native efforts cognitive scientists and **Realising Systems Thinking: Knowledge and Action in Management Science** John Mingers, 2006-09-13 This book deals with the contribution of a systems approach to a range of disciplines from philosophy and biology to social theory and management It weaves together material from some of the pre eminent thinkers of the day In doing so it creates a coherent path from fundamental work on philosophical issues of ontology and epistemology through specific domains of knowledge about the nature of information and meaning human communication and social intervention

Re-Thinking the Cogito Christopher Norris, 2010-08-12 Re Thinking the Cogito seeks to combine a strongly naturalistic with a distinctively rationalist perspective on some nowadays much discussed issues in philosophy of mind Against the common view that they involve downright incompatible conceptions of mind knowledge and ethics it seeks to unite a naturalism that draws on recent advances in neurophysiology and cognitive science with an outlook that gives full weight to those normative values at the heart of rationalist thought True to the book s constructive spirit Norris offers various detailed proposals for bringing the two approaches into a mutually enhancing though also mutually provocative relationship He finds that claim strikingly prefigured in Spinoza s working out of a non reductive yet metaphysically uncompromising mind body monism Moreover he suggests how a thoroughly naturalised approach might yet become a locus of productive engagement with the work of an ultra rationalist thinker such as Alain Badiou Thus Norris puts the case that physically embodied human thought has cognitive intellectual and creative powers that cannot and need not be accounted for in terms of conscious let alone self conscious reflection

Revitalizing Causality Ruth Groff, 2007-12-18 This cutting edge collection of new and previously published articles by philosophers and social scientists addresses just what it means to invoke causal mechanisms or powers in the context of offering a causal explanation A unique collection it offers the reader various disciplinary and inter disciplinary divides helping to stake out a new neo Aristotelian position within contemporary debate

Pragmatism and Literary Studies Winfried Fluck, 1999 *Deconstruction: A Reader* Martin McQuillan, 2017-09-25 Philosophers do it literary critics do it even architects poets painters do it It can involve the concepts of capital politics and justice So what after all is deconstruction Deconstruction A Reader makes an answer to this question available in the only way possible by offering a selection of breathtaking range and depth of essential texts With more than sixty selections by fifty contributors including nine pieces by Jacques Derrida this is the ultimate anthology of deconstructive reading demonstrating that deconstruction is vivid surprising varied and true to the text

Deconstruction and the 'Unfinished Project of Modernity' Christopher Norris, 2020-11-25 Through a close engagement with some key thinkers Norris argues that deconstruction is part of the unfinished project of modernity a project whose interest and values it upholds by continuing to question them in a spirit of enlightened self critical inquiry

Explorations in Cultural History T. G. Ashplant, Gerry Smyth, 2001-03-20 History is an invention in the present as much as a representation and interpretation of the past This has opened up innovative approaches to the research and writing of history and it is the two ideas central to

this theme that culture is historically conditioned and history culturally conditioned that this book explores Both theoretical and practical in its approach this volume explains the development of cultural history and its impact on current teaching Part One examines the ways in which conceptions of historical meaning have been challenged via developments in a range of disciplines including literary and linguistic theory history sociology anthropology media and cultural studies Part Two looks at four case studies drawn from America and Britain the Vietnam Veterans Memorial the music of the Beatles the social documentary of George Orwell and the political polemics of nineteenth century British radical women
