**Investing in Place** Sean Markey, Greg Halseth, Don Manson, 2012-08-01 The future of northern British Columbia a vast resource rich region of vibrant cultures and diverse communities could be either driven by a narrow economic agenda or guided by innovative place based solutions that seek to build viable communities and resilient local and regional economies Investing in Place is about creating the foundations for renewing northern British Columbia s rural and small town economies Markey Halseth and Manson argue that renewal is not about nostalgic reliance on the policies and economic strategies of the past rather it is about building a pragmatic and innovative vision for development one that acknowledges both the opportunities and the challenges posed by resource development and global and technological change For policy makers and residents alike the path to renewal lies in

place based development which consists of people working together at all levels of the community and region to take advantage of local opportunities in a sustainable responsible way      **Financial Crises** Brenda Spotton Visano, 2006-04-18

This study explores the major patterns of change in the evolution of financial crises as enduring phenomena and analyzes the paradoxical position that crises are at once similar to and different from each other Brenda Spotton Visano examines economic psychological and social elements intrinsic to the process of capitalist accumulation and innovation to explain the enduring similarities of crises across historical episodes She also assesses the impact that changing financial and economic structures have on determining the specific nature of crises and the differential effect these have in focal point manner and extent of transmission to other otherwise unrelated parts of the economy Financial Crises offers a consistent method for interpreting variations in financial crises through time and allows for a better overall appreciation for both the transitory fragility and enduring flexibility of financial capitalism and the potential vulnerability created by on going financial development Topical and informative this key book is of keen interest to all those studying and researching international economics and political economy
