Edward W. Morris,2012-09-15 An avalanche of recent newspapers weekly newsmagazines scholarly journals and academic
books has helped to spark a heated debate by publishing warnings of a boy crisis in which male students at all academic
levels have begun falling behind their female peers In Learning the Hard Way Edward W Morris explores and analyzes
detailed ethnographic data on this purported gender gap between boys and girls in educational achievement at two low
income high schools one rural and predominantly white the other urban and mostly African American Crucial questions arose
from his study of gender at these two schools Why did boys tend to show less interest in and more defiance toward school
Why did girls significantly outperform boys at both schools Why did people at the schools still describe boys as especially
smart Morris examines these questions and in the process illuminates connections of gender to race class and place This
book is not simply about the educational troubles of boys but the troubled and complex experience of gender in school It
reveals how particular race class and geographical experiences shape masculinity and femininity in ways that affect
academic performance His findings add a new perspective to the gender gap in achievement
