The Nurse in Popular Media Marcus K. Harmes, Barbara Harmes, Meredith A. Harmes, 2021-10-28 The image of the nurse is ubiquitous both in life and in popular media One of the earliest instances of nursing and media intersecting is the Edison phonographic recording of Florence Nightingale's voice in 1890 Since then a parade of nurses good bad or otherwise has appeared on both cinema and television screens How do we interpret the many different types of nurses real and fictional lifelike and distorted sexual and forbidding who are so visible in the public consciousness This book is a comprehensive collection of unique insights from scholars across the Western world Essays explore a diversity of nursing types that traverse popular characterizations of nurses from various time periods The shifting roles of nurses are explored across media including picture postcards film television journalism and the collection and preservation of uniforms and memorabilia

Media and Health Clive Seale, 2003-01-17 This book appears to fill a substantial gap in the literature at present There are quite simply no books available which engage seriously and competently with the presentation of health issues in the media and certainly none which focuses on representations of health and illness in as thematically coherent a manner as Seale proposes to do Richard Gwyn University of Cardiff This is an excellent resource for students It provides a comprehensive review of secondary literature in the field and is very well researched Students of sociology of health and illness and in media and communication studies will find the book invaluable David Oswell Goldsmiths College University of London This is a comprehensive work on media health providing an invaluable toolkit for understanding health and the media in contemporary society Seale goes further than previous textbooks critiquing the lament of media health promoters in order to explore the moralisation and commercialisation of media health Dr Annette Hill University of Westminster How are health matters presented by the mass media How accurate are the messages we are receiving This book demonstrates how health messages in popular mass media are important influences in our lives and that they are not neutral being subject to many determining influences It demonstrates the importance of mass media for understanding the experience of illness health and health care bringing together the latest thinking in the field of media studies and the sociology of health and illness This book provides a thorough review of research literature on media representations of health illness and health care covering their production characteristic forms and relationships with the everyday lives of media audiences It brings together both well known and lesser known studies in the context of an integrated sociological argument about media and health Media producers are subject to a variety of influences from medical lobbies scientific organizations and not least the commercial pressure to satisfy media saturated audiences These mean that aims of health promoters are not always easily achieved leading to considerable tensions that require a deeper

understanding of media health than has hitherto been applied to them This book will be essential reading for health educators and promoters as well as health care providers interested in the cultural aspects of health sociologists of health and illness and students and academics of media studies **Beyond Reflective Practice** Helen Bradbury,Nick Frost,Sue Kilminster,Miriam Zukas,2012-09-11 Reflective practice has moved from the margins to the mainstream of professional education However in this process its radical potential has been subsumed by individualistic rather than situated understandings of practice Presenting critical perspectives that challenge the current paradigm this book aims to move beyond reflective practice It proposes new conceptualisations and offers fresh approaches relevant across professions Contributors include both academics and practitioners concerned with the training and development of professionals Definitions of reflection which are often implicit often focus on the individual s internal thought processes and responsibility for their actions The individual what they did thought felt is emphasised with little recognition of context power dynamics or ideological challenge This book presents the work of practitioners educators academics and researchers who see this as problematic and are moving towards a more critical approach to reflective practice With an overview from the editors and fourteen chapters considering new conceptualisations professional perspectives and new practices Beyond Reflective Practice examines what new forms of professional reflective practice are emerging It examines in particular the relationships between reflective practitioners and those upon whom they practise It looks at the ways in which the world of professional work has changed and the ways in which professional practice needs to change to meet the needs of this new world It will be relevant for those concerned with initial and ongoing professional learning both in work and in educational contexts

Reflective Practice Janet Hargreaves,Louise Page,2013-12-19 Reflective practice is an essential skill for those working in health and social care but why is it so vital and how can it be learned As inter disciplinary working becomes more common finding shared ways of reflection on practice are becoming more and more important How do we share our ideas and thoughts to enrich both professionals and their client base This book uses stories and exercises to enable readers to develop their skills Its emphasis is on the practical from how to construct a reflective essay to the ethical ambiguities of whistleblowing and constructing a professional persona The book is written with the needs of students of health and social care in mind For those who want to develop their skills beyond the scope of the book each chapter ends by with a step up suggestion enabling them to build on what they have already learned *Have Women Made a Difference?* Judith Harford,Claire Rush,2010 Tracing the evolution of women s role in university education from the 19th century to the present day this book captures the complexity of women s position within the academy and poses the critical question Have women made a difference The Palgrave Handbook of Gender and Healthcare Ellen Kuhlmann,Ellen Annandale,2012-06-26 This authoritative state of the art reference collection addresses the main issues and core debates related to gender and healthcare in one accessible volume This essential guide to an area of increasing interest provides a critical overview of

Tascón, 2018-09-03 How are we to understand how the dominance of visual images and representations in late modernity affects Social Work practice research and education Social workers are increasingly using still and moving images to illustrate their work to create new knowledge and to further specific groups interests As a profession in which communication is central visual practices are becoming ever more significant as they seek to carry out their work with and for the marginalised and disenfranchised It is time for the profession to gain more critical analytical and practical knowledge of visual culture and communication in order to use and create images in accordance with its central principle of social justice That requires an understanding of them beyond representation As important as this is it is also where the profession's scholarly work in this area has remained and halted and thus understanding of the work of images in our practices is limited In order to more fully understand images and their effects both ideologically and experientially social workers need to bring to bear other areas of study such as reception studies visual phenomenology and the gaze These other analytical frames enable a consideration not only of images per se but also of their effect on the viewer the human spectators and the subjects at the heart of Social Work By bringing understandings and experiences in Film Media and Communications Visual Communication for Social Work Practice provides the reader with a wide range of critically analytical frames for practitioners activists educators and researchers as they use and create images This invites a deeper knowledge and familiarity with the power dimensions of the image thus aligning with the social justice dimension of Social Work Examples are provided from cinema popular media but more importantly from Social Work practitioners themselves to demonstrate what has already been made possible as they create and use images to further the interpersonal communal and justice

Pheasant-Kelly,2013-05-21 American cinema abounds with films set in prisons asylums hospitals and other institutions Rather than orderly places of recovery and rehabilitation these institutional settings emerge as abject spaces of control and repression in which adult identity is threatened as a narrative impetus Exploring the abject through issues as diverse as racism mental illness or the preservation of bodies for organ donation thi book analyses a range of films including One Flew Over the Cuckoo s Nest 1975 The Shawshank Redemption 1994 Full Metal Jacket 1987 and Girl Interrupted 1999 through to

cult films such as *Carrie* 1976 and *Bubba Ho-tep* 2002. In these films locations of coherence and order become places where the internal and repressed aspects of the body individual and social threaten to overwhelm the individual. Identity is compromised through harsh conditions, extreme discipline, the exertion of absolute control and above all the restriction of personal space. Symbolically infantilised, forced to reassess aspects of the adult, the only escape is through violence. The eponymous Carrie escapes from her cupboard for a massacre, the women of *Girl Interrupted* mutilate and annihilate themselves and Kubrick's *Gomer Pyle* shoots sadistic patriarch Sergeant Hartman in the head. By analysing scenes of horror and disgust within the context of abject space, Frances Pheasant Kelly reveals how threats to identity manifest in scenes of torture, horror and psychosexual repression and are resolved either through death or through traumatic re-entry into the outside world. Bringing together contemporary theoretical debates and critical disciplines, *Abject Spaces in American Cinema* offers a coherent and meaningful analysis of institutional films and shows that the chaos of the abject space cannot be resolved, only escaped. This readable and engaging tour of the abject in the institution of film will be immensely valuable to students of Film Studies, Critical Theory and Cultural Studies.
