Natural Disaster at the Closing of the Dutch Golden Age Adam Sundberg, 2022-01-27 By the early eighteenth century the economic primacy cultural efflorescence and geopolitical power of the Dutch Republic appeared to be waning The end of this Golden Age was also an era of natural disasters Between the late seventeenth and the mid eighteenth century Dutch communities weathered numerous calamities including river and coastal floods cattle plagues and an outbreak of strange mollusks that threatened the literal foundations of the Republic Adam Sundberg demonstrates that these disasters emerged out of longstanding changes in environment and society They were also fundamental to the Dutch experience and understanding of eighteenth century decline Disasters provoked widespread suffering but they also opened opportunities to retool management strategies expand the scale of response and to reconsider the ultimate meaning of catastrophe This book reveals a dynamic and often resilient picture of a society coping with calamity at odds with historical assessments of eighteenth century stagnation

Inventing Exoticism Benjamin Schmidt, 2015-02-09 As early modern Europe launched its multiple projects of global empire it simultaneously embarked on an ambitious program of describing and picturing the world The shapes and meanings of the extraordinary global images that emerged from this process form the subject of this highly original and richly textured study of cultural geography Inventing Exoticism draws on a vast range of sources from history literature science and art to describe the energetic and sustained international engagements that gave birth to our modern conceptions of exoticism and globalism Illustrated with more than two hundred images of engravings paintings ceramics and more Inventing Exoticism shows in vivid example and persuasive detail how Europeans came to see and understand the world at an especially critical juncture of imperial imagination At the turn to the eighteenth century European markets were flooded by books and artifacts that described or otherwise evoked non European realms histories and ethnographies of overseas kingdoms travel narratives and decorative maps lavishly produced tomes illustrating foreign flora and fauna and numerous decorative objects in the styles of distant cultures Inventing Exoticism meticulously analyzes these while further identifying the particular role of the Dutch Carriers of the World as Defoe famously called them in the business of exotica The form of early modern exoticism that sold so well as this book shows originated not with expansion minded imperialists of London and Paris but in the canny ateliers of Holland By scrutinizing these materials from the perspectives of both producers and consumers and paying close attention to processes of cultural mediation Inventing Exoticism interrogates traditional postcolonial theories of knowledge and power It proposes a wholly revisionist understanding of geography in a pivotal age of expansion and offers a crucial historical perspective on our own global culture as it engages in a media saturated world

Handbook of

Research on Nurturing Industrial Economy for Africa's Development Nafukho, Frederick Muyia, Boniface Makulilo, Alexander, 2021-03-19 A robust manufacturing sector is a necessity and a sufficient condition for any country's human and economic development as it creates employment and alleviates poverty. During this Fourth Industrial Revolution era, there is an urgent need in Africa to optimally utilize the existing resources to support manufacturing or else risk allowing the continent to fall behind in the industrial economy. Innovative strategies are needed that can unlock Africa's manufacturing potential by exploring key areas that may help Africa mature and launch modernized economies that will benefit the developed world's industrial economy. The Handbook of Research on Nurturing Industrial Economy for Africa's Development examines various innovations necessary for Africa's economic development, including drivers of the manufacturing economy such as education, agriculture, human capital, science and technological innovations, language, politics, and business environments. The book explores strategies to increase Africa's economic diversity, complexity, productivity, and ultimately competitiveness, and for the continent to realize its manufacturing industrial potential. Further chapters focus on African countries' industrial economies in the African context and facilitating the fulfillment of the Sustainable Development Goals (SDGs) and the African Union's Agenda 2063. This book is a valuable reference tool for government officials, economists, industrialists, practitioners, stakeholders, researchers, academicians, and students interested in the industrial economic development of Africa.

The Nurturing of New Educational Researchers María de Ibarrola, Lorin W. Anderson, 2014-07-11

Five educational researchers coming from a variety of higher education institutions, academic disciplines, and cultural backgrounds met together over a three-year period to discuss the present and future of doctoral education and training in the field of education. Their hope was that the product of their discussions would enable educators and policy makers around the world to rethink, restructure, and even design new programs to prepare the rising generation of educational researchers in their countries. These differences in academic, national, and institutional perspectives led to a variety of ways, even conflicting ones, in which the quality of doctoral education and training could be improved. Based on our discussion, we came to the conclusion that there are no universal solutions to the problems involved in setting up and operating a quality doctoral program. Rather, educators would be wise to be aware of the alternatives at their disposal and make informed choices based on an understanding of the larger societal and political contexts in their states, regions, or nations. To facilitate this decision-making process, we have chosen to conclude with a set of key questions that should be addressed by those seeking to examine and improve their doctoral programs in education and briefly describe some of the alternative ways of answering these questions. Instead of passively absorbing a unified position, then, the reader is invited to join the dialogue that has taken place and is still taking place between and among the authors. To exemplify such a dialogue, each chapter is followed by one or two commentaries written by members of the group. We would encourage the reader to write commentaries on the individual chapters and perhaps the commentaries thereby engaging in a dialogue with the
