Pension Reform In Six Countries What Can We Learn From Each Other:

Pension Reform in Six Countries Axel H. Börsch-Supan, Meinhard Miegel, 2012-12-06 Axel Borsch Supan and Meinhard Miegel The provision of retirement income is a dynamic system that needs to be adapted constantly to the ever changing economic and societal environment Sometimes incremental adaptations suffice sometimes however larger reform steps are necessary We see this evolutionary process both through history and across countries Over and again societies are confronted with new challenges not the least with respect to old age social security At this juncture of history almost all industrialized countries face rapid population aging and need to adapt their pension systems to this historically unprecedented demographic change The six countries in this study Chile Germany Great Britain the Netherlands Switzerland and the United States have responded very differently to this new challenge This is the point of departure for this book Why did the countries respond so differently What can we learn from each other It is not the point of this book to provide a universally optimal solution to the pension problems caused by population aging The six countries are simply too different in terms of their demographic and cultural and in particular in terms of their historical and economic backgrounds However since national discussions tend to be surprisingly narrowly focussed even in times of globalization there is much to learn by looking over the neighbor's fence And since some countries have reformed earlier than others we even have the benefit of quite a few trials and errors in one country from which all other countries can learn

Beyond the Welfare State Sirvan Karimi, 2017-01-18 Neoliberal calls for welfare state reforms especially cuts to public pensions are a contentious issue for employees employers and national governments across the western world But what are the underlying factors that have shaped the response to these pressures in Canada and Australia In *Beyond the Welfare State* Sirvan Karimi utilizes a synthesis of Marxian class analysis and the power resources model to provide an analytical foundation for the divergent pattern of public pension systems in Canada and Australia Karimi reveals that the postwar social contract in Australia was market based and more conducive to the privatization of retirement income In Canada the social contract emphasized income redistribution that resulted in strengthening the link between the state and the citizen By shedding light on the impact of national settings on public pension systems *Beyond the Welfare State* introduces new conceptual tools to aid our understanding of the welfare state at a time when it is increasingly under threat

Ageing, Financial Markets and Monetary Policy Alan J. Auerbach, Heinz Herrmann, 2013-11-11 net income It draws on the experience gained when the social security system in Italy was reformed in the early 1990s which led to drastic reductions in the number of claims against the statutory pension scheme The various sectors of the population elderly people young people public employees as opposed to private sector employees etc were affected to differing degrees From Brugiavini's estimates it becomes clear that a reduction in claims against the statutory pension system has led to a markedly increased willingness to save particularly in the sectors of the population which were most affected Reinhold Schnabel starts by discussing possible consequences of a pension cut from

a German perspective He discusses possible effects on saving and labour supply In the second part of his comments he questions whether all of Brugiavini s interpretations of the Italian experiment are convincing He doubts in particular whether the reform was unexpected
