People The Land Pathways To Reform I:

A Fractured North Erich Kasten,Igor Krupnik,Gail Fondahl,2024-04-09 The remarkable opening of Siberia and the Russian Arctic to international social science research starting in the early 1990s has given rise to the spirit of cooperation innovative partnerships and the co production of knowledge across boundaries and academic cultures These interactions and the heartfelt relationships built by years of collaborations are now suspended or at least highly constrained after February 2022 This volume s essays explore various dimensions of the newly fractured North and of the war s impact that poses dilemmas to field practitioners In this three part volume the first in the Fractured North series scholars with decades long experience in northern Russia document the breakdown of collegial relationships as state control has intensified Early career professionals consider the ruinous impacts on their planned research trajectories and the new methods of distant anthropology The volume includes several historical essays about the dilemmas that scholars encountered in the face of past repressive regimes and connection breakdowns and what we might learn from how they dealt with these challenges Who Owns the Stock? Anatoly M. Khazanov,Günther Schlee,2012-08-01 The issue of collective and multiple property rights in animals such as cattle camels or reindeers among pastoralists has never been a subject of special cross cultural and comparative study Focusing on pastoralist societies in East and West Africa the Far North and Siberia and the Eurasian steppes this volume addresses the issue of property rights and the changes these societies have undergone due to the direct or indirect influence of modernization and globalization processes The contributors also investigate the interplay of older sets of rights and modern marketing policies political ecological and economic effects of collectivization and de collectivization the existence of collective and private property in the Soviet Union and its successor states state taxation and destocking measures in African dry lands and the effects of quarantine as well as import and export regulations The rich and well researched ethnographic historical and economic data in these chapters provides new theoretical insights into the matter of property rights in animals **Khanty, People of the Taiga** Andrew Wiget,Olga Balalaeva,2011-05-15 Drawing on nearly twenty years of fieldwork as well as ethnohistory politics and economics this volume takes a close look at changes in the lives of the indigenous Siberian Khanty people and draws crucial connections between those changes and the social cultural and political transformation that swept Russia during the transition to democracy Delving deeply into the history of the Khanty who were almost completely isolated prior to the Russian revolution the authors show how the customs traditions and knowledge of indigenous people interact with and are threatened by events in the larger world **Environmental Justice and Sustainability in the Former Soviet Union** Julian Agyeman,Yelena Ogneva-Himmelberger,2009 An examination of the awareness of environmental and social justice issues in the former Soviet republics from the Western style democracies of the Baltic region to the totalitarian regimes of Central Asia and the resulting activism in those states The legacy of environmental catastrophe in the states of the former Soviet Union includes desertification pollution and the toxic aftermath

of industrial accidents the most notorious of which was the Chernobyl disaster of 1986 This book examines the development of environmental activism in Russia and the former Soviet republics in response to these problems and its effect on policy and planning It also shows that because of increasing economic ethnic and social inequality in the former Soviet states debates over environmental justice are beginning to come to the fore The book explores the varying environmental social political and economic circumstances of these countries which range from the Western style democracies of the Baltic states to the totalitarian regimes of Central Asia and how they affect the ecological environmental and public health Among the topics covered are environmentalism in Russia including the progressive nature of its laws on environmental protection which are undermined by overburdened and underpaid law enforcement the effect of oil wealth on Azerbaijan and Kazakhstan the role of nationalism in Latvian environmentalism the struggle of Russia's indigenous peoples for environmental justice public participation in Estonia's environmental movement and lack of access to natural capital in Tajikistan Environmental Justice and Sustainability in the Former Soviet Union makes clear that although fragile transition economies varying degrees of democratization and a focus on national security can stymie progress toward just sustainability the diverse states of the former Soviet Union are making some progress toward green and environmental justice issues separately

Settlers on the Edge Niobe Thompson, 2009-01-01 Based on extensive research in the Arctic Russian region of Chukotka, *Settlers on the Edge* is the first English language account of settler life anywhere in the circumpolar north to appear since Robert Paine's *The White Arctic* 1977 and the first to explore the experiences of Soviet era migrants to the far north. Niobe Thompson describes the remarkable transformation of a population once dedicated to establishing colonial power on a northern frontier into a rooted community of locals now resisting a renewed colonial project. He also provides unique insights into the future of identity politics in the Arctic, the role of resource capital, and the oligarchs in the Russian provinces and the fundamental human questions of belonging and transience.

The Oxford Handbook of Law and Anthropology Marie-Claire Foblets, Mark Goodale, Maria Sapiñoli, Olaf Zenker, 2022-04-01 The *Oxford Handbook of Law and Anthropology* is a ground-breaking collection of essays that provides an original and internationally framed conception of the historical, theoretical, and ethnographic interconnections of law and anthropology. Each of the chapters in the Handbook provides a survey of the current state of scholarly debate and an argument about the future direction of research in this dynamic and interdisciplinary field. The structure of the Handbook is animated by an overarching collective narrative about how law and anthropology have and should relate to each other as intersecting domains of inquiry that address such fundamental questions as dispute resolution, normative ordering, social organization, and legal, political, and social identity. The need for such a comprehensive project has become even more pressing as lawyers and anthropologists work together in an ever-increasing number of areas, including immigration and asylum processes, international justice forums, cultural heritage certification and monitoring, and the writing of new national constitutions among many others. The Handbook takes critical stock of these various points of intersection in order to identify and conceptualize the most promising areas of innovation and sociolegal relevance, as well as to acknowledge the points of tension, open questions, and areas for future development.

What it Means to be a Herdsman Joachim Otto Habeck, 2005 In this book, author Joachim Otto Habeck takes the reader to the tundra in the Far North of the Russian Federation, describing and interpreting the practice of reindeer herding on the land. His vivid account of the everyday life of Komi reindeer herders and their family members as they interact with their bosses, the town, the market, and oil companies reveals both the reach of their agency and its limitations. Through a meticulous analysis of each of these domains, Habeck shows how public discourse about reindeer

husbandry as a traditional life style derives from outside the Komi reindeer herding communities yet it has powerful effects on the local actors ability to frame their own existence He argues that the concept of tradition despite its many positive connotations places Komi reindeer herders in a golden cage which leaves no space for acknowledging their drive to innovation and flexibility Revival: Shang yang's reforms and state control in China.
