## **People First Professional And Business Ethics Without Ethics:**

**People First!** Ellen R. Klein, 2003 Through an innovative technique of making the process of the text more important than its thesis Klein offers the reader the opportunity to take seriously the fact that it is time we try a new approach to the teaching and fostering of professional and business ethics i e an approach that removes the pedantic minutia that is endemic to its scholarly study allowing students and managers alike a chance to not only learn about ethics but actually become ethicists themselves People First with its pedagogical focus and eminently readable style walks the reader regardless of philosophical acumen through specific hallmark arguments to one simple fundamental obvious intuitive and universal imperative Put people first Klein hopes that the process that is People First will be self justifying enabling not only the creation of more ethical business and professional leadership but a new age of teaching professional and business ethics that will lead to generations of ethical practitioners in the future Encyclopedia of Business Ethics and Society Robert W.

Kolb, 2008 This encyclopedia spans the relationships among business ethics and society with an emphasis on business ethics and the role of business in society **Business and Religion** Nicholas Capaldi, 2005 **The 101 Principles of an Effective Leadership for Africa** Allen A Alube, 2024-01-15 About the Book The 101 Principles of an Effective Leadership for Africa focuses on responsibility fair governance and moral character of African leadership Allen A Alube targets the African youths who are ready to embrace change and to lead differently with hope and aspiration for the future The African youths have been marginalized by the corrupted leadership and poor governance Alube offers the opportunity to incorporate into the school systems of African nations to encourage African youths to develop and apply a newer mindset related to responsibility good governance and moral character About the Author Dr ABD Allen A Alube is an educator who has taught schools for more than 15 years both here in the States and overseas He has also served in private and public sectors including non profit and religious organizations Currently he works for one of the federal agencies in the state of Tennessee Allen is a husband a father and a proud grandfather of three He enjoys reading soccer working out and traveling He is a member of different socio cultural and professional organizations Allen holds a BA degree in African Studies MA in Religious Education MA in Secondary Education Ed S in Education Administration and a doctoral degree in Professional Leadership

Practical and Professional Ethics: Economic and business ethics Debashis Guha, 2008 **The Journal of Markets & Morality**, 2004 **Ethics Across the Curriculum—Pedagogical Perspectives** Elaine E. Englehardt, Michael S. Pritchard, 2018-05-08 This book features articles by more than twenty experienced teachers of ethics who are committed to the idea that ethics can and should be taught virtually anywhere in the education curriculum They explore a variety of ways in which this might best be done Traditionally confined largely to programs in philosophy and religion the teaching of ethics has in recent decades spread across the curriculum education The contributors to this book discuss the rationale for supporting such efforts the variety of challenges these efforts face and the sorts of benefits faculty and students who

participate in ethics across the curriculum endeavors can expect An overriding theme of this book is that the teaching of ethics should not be restricted to one or two courses in philosophy or religion programs but rather be addressed wherever relevant anywhere in the curriculum For example accredited engineering programs are expected to ensure that their students are introduced to the ethical dimensions of engineering This can involve consideration of ethical issues within particular areas of engineering e g civil mechanical electrical chemical as distinctive segments of certain courses e g those that focus on design problems or as a full semester course in ethics in engineering Similar approaches can be taken in nursing medicine law social work psychology accountancy management and so on That is some emphasis on ethics can be expected to be found in broad range of academic disciplines However many ethical issues require careful attention from the perspectives of several disciplines at once and in ways that require their joining hands Recognizing that adequately addressing many ethical issues may require the inclusion of perspectives from a variety of disciplines makes apparent the need for effective communication and reflection across disciplines not simply within them This in turn suggests that faculty and their students can benefit from special programs that are designed to include participants from a variety of disciplines Such programs will be a central feature of this book Although some differences might arise in how such issues might best be discussed across different parts of the curriculum these discussions might be joined in ways that help students faculty administrators and the wider public better appreciate their shared ethical ground **Penn State Law Review** ,2003
