Ortrun Zuber-Skerritt

Peoples Participation Challenges Ahead:

People's Participation Orlando Fals Borda, 1998 *People's Participation* draws on papers discussed at the 1997 World Congress of Participative Convergence in Knowledge Space and Time. It looks at the social, political, economic and cultural movements at the heart of Participative Research where knowledge, space and time are seen as the principal tools for change for the advancement of peoples. **People's Participation** Orlando Fals Borda, 1998-01-01 **Handbook of Action**

Research Peter Reason, Hilary Bradbury, 2006-01-17 With the *Handbook of Action Research* hailed as a turning point in how action research is framed and understood by scholars, this student edition has been structured to provide an easy inroad into the field for researchers and students. It includes concise chapter summaries and an informative introduction that draws together the different strands of action research and reveals their diverse applications as well as their interrelations. Divided into four parts, there are important themes of thinking and practice running throughout. *Laboring Below the Line* Frank Munger, 2002-04-25 As the distribution of wealth between rich and poor in the United States grew more and more unequal over the past twenty years, this economic gap assumed a life of its own in the popular culture. The news and entertainment media increasingly portrayed the lives of the poor with such stereotypes as the lazy welfare mother and the thuggish teen, offering Americans few ways to learn how the other half really lives. *Laboring Below the Line* works to bridge this gap by synthesizing a wide range of qualitative scholarship on the working poor. The result is a coherent, nuanced portrait of how life is lived below the poverty line and a compelling analysis of the systemic forces in which poverty is embedded and through which it is perpetuated. *Laboring Below the Line* explores the role of interpretive research in understanding the causes and effects of poverty. Drawing on perspectives of the working poor, welfare recipients and marginally employed men and women, the contributors, an interdisciplinary roster of ethnographers, oral historians, qualitative sociologists and narrative analysts, dissect the life circumstances that affect the personal outlook, ability to work and expectations for the future of these people. For example, Carol Stack views the work aspirations of an Oakland teenager for whom a job is important even though it strains her academic performance. And Ruth Buchanan looks at low wage telemarketing workers who are attempting to move up the economic ladder while balancing family, education and other important commitments. What emerges is a compelling picture of low wage workers, one that illustrates the precarious circumstances of individuals struggling with the economic conditions and institutions that surround them. Each chapter also explores the capacity for economic survival from a different angle, with ancillary commentary complementing the ethnographies with perspectives from other fields of study such as economics. At this moment of governmental retrenchment, ethnography's complex, nonstereotypical portraits of individual people fighting against poverty are especially important. *Laboring Below the Line* reveals the ambiguities of real lives, the potential for individuals to change in unexpected ways and the even greater intricacy of the collective life of a community.

Gender, Power and Politics in Agriculture Jemimah Njuki, Hale Ann Tufan, Vivian Polar, Hugo Campos, Monifa

Morgan-Bell,2024-10-07 This is a open access book In the agriculture sector the language of gender integration often ignores the politics and the power dynamics that are central to critical and feminist analysis of gender relations This volume explores largely neglected topics such as power dynamics masculinities gendered social norms feminist research practice intersectionality critical analysis of tools and more that are fundamental to shifting the entrenched power dynamics and politics of gender research in agriculture The purpose of this book is to reduce the gap existing between theory methods and practice of gender relations in agriculture and agricultural research Through an in depth analysis of current processes in agriculture and drawing on existing experiences in other sectors it seeks to create pathways for learning catalyzing change and positive impact on gender equity and social inclusion This volume seeks to bring forth a change in how gender relations in agriculture are researched practiced and taught Conferences as Sites of Learning and Development Ortrun

Zuber-Skerritt,2017-02-24 This book applies and expands upon the concept of the learning conference as a site of learning and development using the paradigm and methodologies of participatory action learning and action research PALAR Making a significant contribution to the field this is the first book to outline the characteristics and development of a learning conference culture in theory and practice It demonstrates how application of the learning conference concept can maximise learning opportunities and successful research outcomes to bring about sustainable professional organizational and community development An international team of contributors offer their diverse perspectives on conferences and the practical and theoretical work conducted at these events They contextualize these reflections in the light of global developments in this increasingly troubled twenty first century marked by greater complexity through technology globalization neo liberalism climate change and other sources of practical and ideological change all of which enhance the conceptual and practical utility of the learning conference *Handbook of Research on the Global Empowerment of*

Educators and Student Learning Through Action Research Slapac, Alina,Balcerzak, Phyllis,O'Brien, Kathryn,2021-05-07 The year 2020 brought an unprecedented worldwide health crisis through the COVID 19 pandemic that has been affecting all sectors including education There were questions surrounding the effectiveness of online trainings for teachers online teaching practices the motivation and engagement of students and the quality of learning and education in these times Action research emerged to address these concerns being a systematic process of inquiry using reflection within a cyclical model of planning acting implementing evaluating and continuous reflection This method of research is employed with the expertise and passion from educators to better enhance online practices and education while using authentic learning and experiences Using collaboration social advocacy and action research there is the opportunity to advance teaching for students families and communities without a physical context involved The Handbook of Research on the Global Empowerment of Educators and Student Learning Through Action Research explores successful teaching and learning skills through the method of action research and intersects it with online learning in order to uncover best teaching practices in online platforms This book

showcases educational professionals action research for solutions in advancing teaching and learning the practical benefits of action research recommendations for improving online teaching and learning and a focus on professional growth as well as social justice advocacy It highlights important topics including student learning teacher collaboration authentic learning advocacy and action research in both K 12 and higher education settings This book is ideal for inservice and preservice teachers administrators teacher educators practitioners researchers academicians and students interested in how action research is improving and advancing knowledge on the best teaching practices for online education

Islamic Epistemics and Socioeconomics Masudul Alam Choudhury, 2025-06-16 This book presents selected essays on the epistemological foundation of the Islamic world system in the light of the exegesis of the Qur'an to develop existing understandings of Islamic economics A selection of key contributions by one of the world's leading figures working at the nexus of Islamic social sciences Islamic philosophy and Islamic economics the book integrates applied foundations of Islamic economics and Islamic philosophy presenting a critical outlook on the existing state of Islamic economics and Islamic finance within a broader framework of socio scientific enquiry philosophical perspectives on Islam and philosophy of science The author confronts the absence of epistemic groundwork upon which any fresh social and scientific enquiry is developing in Islamic economics casting the discussion within an explanatory framework of the unity of knowledge as bestowed by Islamic monotheistic law which substantively characterizes the generalization and details of everything The present work unravels this objective methodology and its application with reference to a limited number of issues and problems in global economics Complex and multidisciplinary in its treatment this book presents the key arguments on mathematical philosophical and socio scientific modes of inquiry in deriving developing and empirically applying the Qur'anic methodology of the unity of knowledge to economic problems It is relevant to scholars and advanced students in social scientific studies of Islam Islamic theology and philosophy and Islamic economics and finance

Socio-Cybernetic Study of God and the World-System Choudhury, Masudul Alam, 2013-10-31 In any field whether scientific business or social ethics plays a critical role in determining what is acceptable in a particular community and what is considered taboo The source of these preconditions is often a complex interweaving of tradition and rational thought Socio Cybernetic Study of God and the World System investigates morality in a socio scientific worldview examining the epistemology of existence in conjunction with Islamic monotheistic law to generate a world system that governs action and reaction in the context of a variety of cognitive and social environments Readers with backgrounds in finance and economics can utilize this book to construct a more thorough theoretical understanding of their societal and professional associations

The Equitable Forest Carol J. Pierce Colfer, 2010-09-30 While there continues to be refinement in defining and assessing sustainable management there remains the urgent need for policies that create the conditions that support sustainability and can halt or slow destructive practices already underway Carol Colfer and her contributors maintain that standardized solutions to forest problems from afar have failed to address both human and

environmental needs. Such approaches they argue often neglect the knowledge that local stakeholders have accumulated over generations as forest managers and do not address issues involving the diversity and well being of groups within communities. The contributors note that these problems persist despite clear evidence that equity and social relationships including gender roles are important factors in the ways that communities adapt to change and manage forest resources overall. The Equitable Forest offers an alternative to traditional externally organized strategies for forest management. Termed adaptive collaborative management (ACM), the approach tries to better acknowledge the diversity, complexity and unpredictability of human and natural systems. ACM works to strengthen local institutions and use the knowledge and capacity of groups in local communities to enhance the health and well being of both forests and the people who live in and around them. The Equitable Forest provides a detailed explanation of the descriptive, analytical and methodological tools of ACM along with accounts of early stages of its implementation in tropical regions of Asia, Africa and Latin America. Although the contributors make it clear that it is too soon to evaluate the efficacy of ACM, their work is supported by evidence that rural communities do make important contributions when involved in formal forest management, that management strategies are most effective when flexible and tailored to local contexts and that efforts by outside governmental and nongovernmental organizations to support local management are feasible from the policymaking perspective and desirable for their impact on human economic and environmental well being.

Addressing Global Environmental Security Through Innovative Educational Curricula Susan Allen-Gil, Lia Stelljes, Olena Borysova, 2008-12-03. As the importance of environmental security increases worldwide, colleges and universities are evaluating how well they are preparing the next generation of environmental scientists and managers and developing new educational approaches. In this volume we examine 1 current educational practices and the need for change, 2 educational needs from the perspective of employers and professionals and 3 new practices in higher education in environmental fields. The contributors were carefully selected by an international coordinating team based on their international reputations in the field of progressive educational approaches and understanding of the global employment market in environmental science. Although the focal geographic areas are North America, Europe and the former Soviet republics, the ideas and strategies discussed are universal to all institutions of higher education. We highlight specific non traditional approaches such as using the university as a curricular tool, developing permaculture programs and applying sustainability pedagogy and document their success from both a student and employer perspective. We also include case studies on risk assessment and eco efficiency education to illustrate why and how transdisciplinary education can be accomplished. We conclude that it is imperative that our educational systems teach environmental security at the university level within a transdisciplinary context and that opportunities such as internships and other methods of applied learning are included in the curriculum.

Finding Voice Kim Shelley Berman, 2018-01-02. In *Finding Voice*, Kim Berman demonstrates how she was able to use visual arts training in disenfranchised communities as a

tool for political and social transformation in South Africa Using her own fieldwork as a case study Berman shows how hands on work in the arts with learners of all ages and backgrounds can contribute to economic stability by developing new skills as well as enhancing public health and gender justice within communities Berman s work and the community artwork her book documents present the visual arts as a crucial channel for citizens to find their individual voices and to become agents for change in the arenas of human rights and democracy **Language, Race, and Power in Schools** Pierre W.

Orelus,2016-12-08 In this edited collection authors from various academic cultural racial linguistic and personal backgrounds use critical discourse analysis as a conceptual framework and method to examine social inequities identity issues and linguistic discrimination faced by historically oppressed groups in schools and society *Language Race and Power in Schools* unravels the ways and degrees to which these groups have faced and resisted oppression and draws on critical discourse analysis to examine how multiple forms of oppression intersect This volume interrogates areas of discrimination and injustice and discusses possibilities of developing coalitions and concerted efforts across the lines of diversity *Research in the*
