The Urban Caribbean Alejandro Portes, Carlos Dore y Cabral, Patricia Landolt, 1997-06-03 A study of urbanization in five countries Costa Rica Haiti Guatemala the Dominican Republic and Jamaica during the 1980s and 1990s when the region s economy shifted from one heavily dependent on imports to one directed more to producing exports The Urban Caribbean studies urbanization in five countries Costa Rica Haiti Guatemala the Dominican Republic and Jamaica during the 1980s and 1990s when the region s economy shifted from one heavily dependent on imports to one directed more to producing exports This shift caused producers and entrepreneurs to rely more on microenterprises thus challenging the informal economy networks of the central cities Sociologist Alejandro Portes and the other contributors use rich in depth data to examine both qualitative and quantitative changes in these five countries Their research method allows them to make generalizations applicable to all five economies while retaining the concreteness of the similarities and differences that make each country unique This volume is an incentive to other collaborative efforts to chart the paths taken by the countries of Latin America and the Caribbean as they seek to accommodate to the new global political and economic context The message of the volume is a convincing one Because of similarities in the trends affecting countries of the region and policy debates each country can benefit from the experiences of the others However the differences in political structure and in the nature of citizenship mean that social and economic policy debates must take into account the national context from the Foreword by Bryan Roberts University of Texas Austin

Writing Identity Emanuelle Oliveira, 2008 In the late 1970s Brazil was experiencing the return to democracy through a gradual political opening and the re birth of its civil society Writing Identity examines the intricate connections between artistic production and political action It centers on the politics of the black movement and the literary production of a Sao Paulo based group of Afro Brazilian writers the Quilombhoje Using Pierre Bourdieu s theory of

the field of cultural production the manuscript explores the relationship between black writers and the Brazilian dominant canon studying the reception and criticism of contemporary Afro Brazilian literature After the 1940s the Brazilian literary field underwent several transformations Literary criticism's displacement from the newspapers to the universities placed a growing emphasis on aesthetics and style Academic critics denounced the focus on a political and racial agenda as major weaknesses of Afro Brazilian writing and stressed the need for aesthetic experimentation within the literary field Writing Identity investigates how Afro Brazilian writers maintained strong connections to the black movement in Brazil and yet sought to fuse a social and racial agenda with more sophisticated literary practices As active militants in the black movement Quilombhoje authors strove to strengthen a collective sense of black identity for Afro Brazilians Handbook of Social Movements across Latin America Paul Almeida, Allen Cordero Ulate, 2015-07-14 This handbook covers social movement activities in Latin American countries that have had profound consequences on the political culture of the region It examines the developments of the past twenty years such as a renewed upswing in popular mobilization the ending of violent conflicts and military governments new struggles and a relatively more democratic climate It shows that from southern Chiapas to Argentina social movements in the 1990s and especially in the 2000s have reached new heights of popular participation There is a lack of research on the politics of this region in the contemporary era of globalization this volume partially fills the void and offers a rich resource to students scholars and the general public in terms of understanding the politics of mass mobilization in the early twenty first century The contributors each address social movement activity in their own nation and together they present a multidisciplinary perspective on the topic Each chapter uses a case study design to bring out the most prominent attributes of the particular social struggle s for instance the main protagonists in the campaigns the grievances of the population and the outcomes of the struggles This Handbook is divided into seven substantive themes providing overall coherence to a broad range of social conflicts across countries issues and social groups These themes include 1 theory of Latin American social movements 2 neoliberalism 3 indigenous struggles 4 women's movements 5 movements and the State 6 environmental movements and 7 transnational mobilizations Demanding the Land Paul Gandhi Joseph Dosh, 2010 Examines the widespread Latin American phenomenon of illegal land seizures and squatter settlement development Explains based on case studies in Peru and Ecuador how invasion organizations mobilize why they succeed or fail and why they endure or disappear Provided by publisher *Social Movements, Indigenous Politics and Democratisation in Guatemala* Roderick Leslie Brett, 2008 Drawing on social movement theory this book presents a comprehensive analysis of the evolution of collective action during Guatemala's democratic transition 1985 1996 and the accompanying impact of social movements on democratisation focusing on three indigenous peoples' social movement organisations Latin American Society Tessa Cubitt, 2014-09-25 First published in 1995 This book serves as an introduction to Latin American society As it covers a very broad topic the aim is to acquaint the reader with some of the

Social Movements, Indigenous Politics and Democratisation in Guatemala, 1985-1996

Mark G. Brett, 2008-02-28 This book analyses patterns of collective action that emerged during Guatemala's democratic transition between 1985 and 1996 focusing in particular on the role of indigenous actors in the political processes undergirding and shaping democratisation and the respective impact of the transition upon indigenous social movements. Comparatively little has been written about collective action in Guatemala within the discipline of political science despite the mobilisation of a wide range of social movements in response to the brutal armed conflict rather literature has focused principally on the role of elite actors in democratisation. This study presents a fresh perspective presenting an analysis of the political evolution of three social movements and their human rights platforms through the framework of social movement theory.

The New Economic Sociology Maruo F. Guillen, Randall

Collins, Paula England, Marshall Meyer, 2002-04-25 As the American economy surged in the 1990s economic sociology made great strides as well. Economists and sociologists worked across disciplinary boundaries to study the booming market as both a product and a producer of culture tracing the correlations they saw between economic and social phenomena. In the process they debated the methodological issues that arose from their interdisciplinary perspectives. *The New Economic Sociology* provides an overview of these debates and assesses the state of the burgeoning discipline. The contributors summarize economic sociology's accomplishments to date identifying key theoretical problems and opportunities and formulating strategies for future research in the field. The book opens with an introduction to the main debates and conceptual approaches in economic sociology. Contributor Neil Fligstein suggests that the current resurgence of interest in economic sociology is due to the way it brings together many sociological subdisciplines including the study of markets, households, labor, markets, stratification, networks and culture. Other contributors examine the role of economic phenomena from a network perspective. Ron Burt for example demonstrates how social relationships affect competitive dynamics in the marketplace. A third set of chapters addresses the role of gender in economic sociology. In her chapter Barbara Reskin rethinks conventional notions about discrimination and points out that the law only covers one type of discrimination while in recent years social scientists have uncovered other forms of hidden discrimination which must be addressed as well. *The New Economic Sociology* also addresses the problem of economic development and change from a sociological perspective.

Alejandro Portes and Margarita Mooney elaborate on one of the key emerging concepts in economic sociology arguing that social capital as an attribute of communities and regions can contribute to economic and social well being by fostering collaboration and entrepreneurship The contributors concur that economic action must be interpreted through the cultural understandings that lend it stability and meaning By rendering these often complex debates accessible The New Economic Sociology makes a significant contribution to this still rapidly developing field and provides a useful guide for future avenues of research
