 mathematicians philosophers and political scientists on three intimately related concepts that are at the heart of theories of  
 democracy and social welfare The editors have brought together some of the leading scholars in the different fields to create  
 a distinctive volume Chapters include contributions on foundational and methodological issues in the definition and  
 measurement of power and freedom and empirical studies of power and coalition formation in voting bodies The volume also  
 contains contributions that make an effort to bridge the gaps between different disciplinary approaches including one on the  
 importance of Machiavelli's writing as a reference point for modern political theory and others on the related concepts of  
 fairness and responsibility A majority of the chapters make use of game theory      **The Publishers' Trade List Annual**

 is a concept rooted in psychology and phenomenology offering significant insights into human decision making and well  
 being Similarly in social analysis and social sciences frameworks such as PDCA DMAIC SWOT and OODA have been  
 established to enable structured evaluation and effective problem solving Furthermore in phenomenology and social sciences  
 various logical systems have been developed to address specific objectives and practical applications This paper extends

these concepts using the Neutrosophic theory revisiting their mathematical definitions and exploring their properties The Neutrosophic Set an extension of the Fuzzy Set is a highly flexible framework that has been widely studied in fields such as social sciences By incorporating Neutrosophic Sets we aim to improve their suitability for programming and mathematical analysis providing advanced methods to tackle complex multi dimensional problems We hope that this research will inspire further studies and foster the development of practical applications across various related disciplines **Subject Catalog,**
