Power Process Participation Tools For Change:

People, Land, and Water Guy Bessette, 2006 In natural resource management research best practice implies the participation of community members research or development teams and other stakeholders to jointly identify research and development parameters and contribute to decision making Ideally the research or development process itself generates a situation of empowerment in which participants transform their vision and become able to take effective action Used increasingly widely in resource management this process is known as Participatory Development Communication PDC This book presents conceptual and methodological issues r Participatory Research Methodologies Alpaslan Özerdem, Richard Bowd, 2016-05-13 Participatory research methodologies have been used since the 1970s as a tool to garner accurate information about communities in which development practitioners operate Their usefulness as a collection of research techniques has been evident in academic disciplines such as politics sociology anthropology and economics among others This informative text assesses the use of participatory methods as a research tool in the contexts of development and reconstruction after conflict and disasters by identifying cross cutting themes and establishing a comparative lessons learned framework that can help inform future uses of them both for practitioners and researchers More importantly rather than adopting a prescriptive perspective this book provides a critical analysis of such methodologies Specifically the reader will benefit from the collation of the experiences of those who utilize participatory research methods in different countries and contexts and from different academic and practitioner perspectives *Managing Natural Resource Conflicts with Participatory Mapping and PGIS Applications* Peter A. Kwaku Kyem, 2021-08-04 This book integrates spatial analysis into the study and management of conflicts and offers a model in conflict studies that incorporates theoretical explanations of conflict its causes and impacts with a geospatial strategy for intervening in disputes over allocation and use of natural resources connects theory and practice Alongside a theoretical analysis of resource conflicts and an account of Participatory Mapping and PGIS development this book provides a case study of GIS applications in conflict mediation The book also lays out a practical and straightforward demonstration of PGIS applications in conflict management using a real world case study and traces the Participatory Mapping and PGIS movements evolution compares PPGIS and PGIS practices and makes distinctions between traditional GIS applications and PGIS practice The approach embodies the enhanced use of spatial information and media sets of tools for analyzing mapping and displaying spatial data and a platform for participatory discussions that enhances consensus building The book therefore contributes to the search for novel approaches for managing current and emerging conflicts With this book resource managers development practitioners students and scholars of Participatory Mapping and PGIS applications and conflict studies will be equipped with the principles skills and the tools they need to manage non violent resource conflicts and keep the disputes from slipping into violence The book will also be a valuable text for basic and advanced studies in Participatory Mapping and PGIS applications Conflict Resolution and Conflict Management
