Consent in the Childhood Classroom Clio Stearns, 2022-02-21

Consent in the Childhood Classroom challenges typical premises of social and emotional learning, self-regulation, and putative misbehavior by centering the theme of consent in the experiences of young children and their teachers. Early childhood and elementary teachers often face disruptions and acts of dissent from young students without a helpful conceptual framework for understanding how these expressions may stem from social injustices, developmental nuances, and problematic assumptions about the nature of children's agency. By posing complex yet relatable questions about the presumptions of authority, positivity, and routines in learning environments and drawing on classroom anecdotes along with interviews with children and teachers, this book offers an accessible approach to cultivating expansive relationships in the classroom, a vision for a richer and more mutual education, and a clearer understanding of what school means from the perspective of the child.

Behavior and Classroom Management in the Multicultural Classroom Terry L. Shepherd, Diana Linn, 2014-08-06

Addressing the increasing number of culturally and linguistically diverse students in today's schools, this book provides general and special education teachers with the knowledge, skills, and strategies to make the proactive, active, and reactive interventions necessary to create a positive classroom environment in which all students can learn.
