**Rational Mysticism** John Horgan, 2004-03-22 The author of The End of Science chronicles the most advanced research into such experiences as prayer fasting and trances in this great read The Washington Post How do trances visions prayer satori and other mystical experiences work What induces and defines them Is there a scientific explanation for religious mysteries and transcendent meditation John Horgan investigates a wide range of fields chemistry neuroscience psychology anthropology theology and more to narrow the gap between reason and mystical phenomena As both a seeker and an award winning journalist Horgan consulted a wide range of experts including theologian Huston Smith spiritual heir to Joseph Campbell Andrew Newberg the scientist whose guest for the God module was the focus of a Newsweek cover story Ken Wilber prominent transpersonal psychologist Alexander Shulgin legendary psychedelic drug chemist and Susan Blackmore Oxford educated psychologist parapsychology debunker and Zen practitioner Horgan explores the striking similarities between mystical technologies like sensory deprivation prayer fasting trance dancing meditation and drug trips He participates in experiments that seek the neurological underpinnings of mystical experiences And finally he recounts his own search for enlightenment adventurous poignant and sometimes surprisingly comic Horgan's conclusions resonate with the controversial climax of The End of Science because as he argues the most enlightened mystics and the most enlightened scientists end up in the same place confronting the imponderable depth of the universe Medjugorje and the Supernatural Daniel Maria Klimek, 2018-03-01 In June 1981 six young Croatians in the village of Medjugorje in the former Yugoslavia reported that the Virgin Mary had appeared to them The Medjugorje visionaries say that Mary has returned every day since then bringing them important messages from heaven to convey to the world Throughout history people have reported encountering extraordinary religious experiences apparitions of the Virgin Mary visions of Jesus Christ weeping statues and icons the stigmata physical healings and miracles and experiences of the afterlife and interpreted them as supernatural in origin Scholars have often tried to reinterpret such experiences including those described by the great mystics like Francis of Assisi Catherine of Siena and Teresa of Avila into natural or psychopathological categories such as hysteria hallucination delusion epileptic seizures psychosis the workings of the unconscious mind or fraud Are such reductionist explanations valid Over the past three decades the Medjugorje visionaries have been subjected to extensive medical psychological and scientific examination even while undergoing their visionary experiences Daniel Klimek argues that the case of Medjugorje affords a rare opportunity to understand a deeper dimension of extraordinary religious phenomena Presenting and analyzing the scientific studies on the visionaries in juxtaposition with the major scholars and debates surrounding religious experience Klimek concludes that a multidisciplinary approach grants a more holistic and deeper understanding of such extraordinary

convey in their work a sense of foreboding and confinement in bleak ritualistic spaces. This book identifies many similarities between the spaces and activities they evoke and the initiatory practices of fraternal orders and secret societies that were an integral part of the social landscape of the Ireland experienced by both men during childhood Many of these Irish societies modelled their ritual structures and symbolism on the Masonic Order Freemasons use the term spurious Freemasonry to designate those rituals not sanctioned by the Grand Lodge The Masonic author Albert Mackey argues that the spurious forms were those derived from the various cult practices of the classical world and describes these initiatory practices as a course of severe and arduous trials This reading of Bacon s and Beckett s work draws on theories of trauma to suggest that there may be a disturbing link between Bacon's stark imagery Beckett's obscure performances and the unofficial use of Masonic Zen Buddhism and the Reality of Suffering Tullio Giraldi, 2024-09-10 This book offers an accessible guide to the role that Zen has played and alongside Buddhism might play in both Eastern and Western attempts to alleviate mental suffering Since its beginnings 2500 years ago the central belief of Buddhism has been that what we perceive as reality is a mental representation a religious belief which has since been substantiated by the evidence of neuroscience The work and progress of clinical medicine psychiatry and psychology have attempted to alleviate the sufferings of life but the current approaches to mental health in psychiatry the neurosciences and cognitivism don't fully address the complexity and mutual inter relationship of the variety of factors involved in mental suffering and its non linear and chaotic aspects Zen Buddhism on the other hand encourages access to reality and so this book will explore scientifically the ways in which it s guiding principles can be deployed to support and enhance Western clinical solutions to mental strife Rock Music Mark Spicer, 2017-07-05 This volume gathers together twenty articles from among the best scholarly writing on rock music published in academic journals over the past two decades These diverse essays reflect the wide range of approaches that scholars in various disciplines have applied to the study of rock from those that address mainly the historical sociological cultural and technological factors that gave rise to this music to those that focus primarily on analysis of the music itself This collection of articles some of which are now out of print or otherwise difficult to access provides an overview of the current state of research in the field of rock music and includes an introduction which contributes to the ongoing debate over the distinction or lack thereof betweenrock andpop Starstruck Albert A. Harrison, 2007-04-01 We live in an era of exploding scientific knowledge about the universe and our place and future within it Much of this new knowledge conflicts with earlier wisdom and some has frightening implications Cosmic evolution space exploration the search for extraterrestrial life and concerns about humanity s future prompt us to seek new answers to old existential questions Where did we come from Why are we here Are we alone What will become of us In our search for answers we turn to science religion myth and varying combinations thereof Exploring an ambiguous region between recognized findings and unfettered imagination Starstruck explores the multifaceted far reaching and often contentious attempts of people with contrasting worldviews to develop
