Durkheim and the Birth of Economic Sociology Philippe Steiner, 2024-05-14 An illuminating account of the development of Durkheim's economic sociology mile Durkheim's work has traditionally been viewed as a part of sociology removed from economics Rectifying this perception Durkheim and the Birth of Economic Sociology is the first book to provide an in depth look at the contributions made to economic sociology by Durkheim and his followers Philippe Steiner demonstrates the relevance of economic factors to sociology and shows how the Durkheimians inform today's economic systems Steiner argues that there are two stages in Durkheim's approach to the economy a sociological critique of political economy and a sociology of economic knowledge In his early works Durkheim critiques economists and their categories and tries to analyze the division of labor from a social rather than economic perspective From the mid 1890s onward Durkheim's preoccupations shifted to questions of religion and the sociology of knowledge Durkheim's disciples such as Maurice Halbwachs and Fran ois Simiand synthesized and elaborated on Durkheim's first stage arguments while his ideas on religion and the economy were taken up by Marcel Mauss Steiner indicates that the ways in which the Durkheimians rooted the sociology of economic knowledge in the educational system allows for an invaluable perspective on the role of economics in modern society similar to the perspective offered by Max Weber's work Recognizing the power of the Durkheimian approach Durkheim and the Birth of Economic Sociology assesses the effect of this important thinker and his successors on one of the most active fields in contemporary sociology

Social Morphogenesis Margaret S. Archer, 2013-02-20 The rate of social change has speeded up in the last three decades but how do we explain this This volume ventures what the generative mechanism is that produces such rapid change and discusses how this differs from late Modernity Contributors examine if an intensification of morphogenesis positive feedback that results in a change in social form and a corresponding reduction in morphostasis negative feedback that restores or reproduces the form of the social order best captures the process involved This volume resists proclaiming a new social formation as so many books written by empiricists have done by extrapolating from empirical data Until we can convincingly demonstrate that a new generative mechanism is at work it is premature to argue what accounts for the global changes that are taking place and where they will lead More concisely we seek to answer the question whether or not current social change can be regarded as social morphogenesis Only then in the next volumes will the same team of authors be able to remove the question mark

Social Innovation and Sustainability Transition Geoff Desa, Xiangping Jia, 2022-11-09 This book uses a historical and modern lens to reimagine the role that Extension could potentially play in catalyzing reciprocal co-learning relationships between Land Grant Universities and their diverse local constituencies The establishment of statewide extension systems was once seen as a way to ensure that Land Grant Universities would be accessible and responsive to all of a state's residents Extension systems continue to offer a front door to a major public university in almost every county of the United States but they tend to be viewed primarily as a way to translate science or distribute information from the university to the public This

books argues for the importance of Extension and shows that we are conceiving of this system too narrowly Only by retelling the stories of the Extension and getting people to see themselves as part of the story can we imagine a different future in which state universities and land grant colleges engage more authentically and equitably in two way relationships with their local constituents in catalyzing reciprocal co learning relationships between Land Grant Universities and their diverse local constituencies Chapter Palatable disruption the politics of plant milk chapter Feeding the melting pot inclusive strategies for the multi ethnic city chapter A carrot isn t a carrot isn t a carrot tracing value in alternative practices of food exchange chapter Virtualizing the good life reworking narratives of agrarianism and the rural idyll in a computer game and chapter Workable utopias for social change through inclusion and empowerment Community supported agriculture CSA in Wales as social innovation are available open access under a Creative Commons Attribution 4 0 International license via link [springer.com](https://www.springer.com)

Gender Testing in Sport Sandy Montanola,Aurélie Olivesi,2016-02-05 After the young South African athlete Caster Semenya won the 800m title at the 2009 World Championships she was obliged to undergo gender testing and was temporarily withdrawn from international competition The way that this controversy unfolded represents a rich and multi layered example of the construction of gender in wider society and the interrelationships between sport culture and the media This is the first book to explore the case in depth from socio cultural ethical and legal perspectives Analysing what came to be called the Caster Semenya Case in a comprehensive and multi disciplinary fashion and covering issues from media discourses and the rhetoric and regulations of the sport s governing bodies to the reaction of the athlete herself the

book explores the ethics of how gender norms in sport and in society more generally are constructed through appearance behaviour and sporting performance This 2009 controversy can be taken as an indicator of the tensions of the time and served as a link between medical sciences society and gender Including discussions of key concepts such as intersex body norms and fairness Gender Testing in Sport is fascinating and important reading for anybody with an interest in sport studies gender studies or biomedical ethics **Mapping Ideology in Discourse Studies** Simo K. Määttä, Marika K.

Hall, 2022-05-09 Discourse and ideology are quintessential albeit contested concepts in many functionally oriented branches of linguistics such as linguistic anthropology critical discourse studies sociolinguistics and sociology of language With many ways of understanding and utilizing the concepts the line between discourse and ideology can become blurry This volume explores divergent ways in which the concept of ideology may be applied in different branches of sociolinguistics and the sociology of language critical discourse studies and applied linguistics The goal is to provide an overview of the ways in which these two concepts can be used separately or together emphasizing one or the other depending on the ways in which the concepts and their relationship are defined The volume is targeted at scholars working in various fields of linguistics in which discourse and ideology are used as theoretical and analytical tools While the target audience includes both senior and junior scholars a particular goal is to reach junior scholars who often struggle with the distinction between discourse and ideology and their theoretical and methodological potential The volume is suitable for classroom use at the graduate level
