Sport, Education and Society

Sport, Culture and the Media comprehensively analyses two of the most powerful cultural forces of our times: sport and media. It examines the ways in which media sport has established itself in contemporary everyday life, and how sport and media have made themselves mutually dependent.

This new edition examines the latest developments in sports media, including:

- Expanded material on new media sport and technology developments
- Updated coverage of political economy, including major changes in the ownership of sports broadcasting
- New scholarship and research on recent sports events like the Olympics and the World Cup, sports television and press, and theoretical developments in areas like globalization and spectatorship

The first part of the book, "Making Media Sport", traces the rise of the sports media and the ways in which broadcast and print sports texts are produced, the values and practices of those who produce them, and the economic and political influences on and implications of the media sports cultural complex. The second part, "Unmaking the Media Sports Text", concentrates on different media forms – television, still photography, news reporting, film, live commentary, creative sports writing and new media sports technologies.

This is a key textbook for undergraduate studies in culture and media, sociology, sport and leisure studies, communication, race, ethnicity and gender.

David Rowe has degrees in Sociology from the universities of Nottingham, York and Essex. He is Director of the Cultural Industries and Practices Research Centre (CIP) and Associate Professor of Media and Cultural Studies at the University of Newcastle, Australia. We are the Champions: The Politics of Sports and Popular Music Ken McLeod, 2016-02-11 Sports and popular music are synergistic agents in the construction of identity and community They are often interconnected through common cross marketing tactics and through influence on each other s performative strategies and stylistic content Typically only studied as separate entities popular music and sport cultures mutually play off each other in exchanges of style ideologies and forms Posing unique challenges to notions of mind body dualities nationalism class gender and racial codes and sexual orientation Dr Ken McLeod illuminates the paradoxical and often conflicting relationships associated with these modes of leisure and entertainment and demonstrates that they are not culturally or ideologically distinct but are interconnected modes of contemporary social practice Examples include how music is used to enhance sporting events such as anthems chants cheers and intermission entertainment music that is used as an active part of the athletic event and music that has been written about or that is associated with sports There are also connections in the use of music in sports movies television and video games and important though critically under acknowledged similarities regarding spectatorship practice and performance Despite the scope of such confluences the extraordinary impact of the interrelationship of music and sports on popular culture has remained little recognized McLeod ties together several influential threads of popular culture and fills a significant void in our understanding of the construction and communication of identity in the late twentieth and early twenty first centuries
