

What is **REALITY**?

Reality encompasses the objective existence of the physical world, events, and entities, independent of perception. It includes the tangible and intangible elements that shape our experiences.

Reality is a dynamic interplay of matter, energy, space, and time, governed by natural laws. Human perception, cognition, and interpretation contribute subjective dimensions to reality, shaping individual perspectives.

Reality is the sum of universal truths, perceptions, and the ever-evolving nature of existence, challenging our understanding and pushing the boundaries of knowledge and consciousness.
