Interculturality, Interaction and Language Learning Jane Woodin, 2018-05-23 This book opens up new lines of debate in language learning and intercultural communication through an investigation of tandem language learning a method of language learning based on mutual language exchange between native speakers and learners of each other s language in connection with intercultural learning and identity construction Through an empirical study of face to face tandem conversations Jane Woodin provides compelling evidence for the re definition of the tandem partnership beyond the traditional native speaker non native speaker NS NNS paradigm By analyzing conversation shapes learner identification of self and other and interactants own focus on culture this book reveals

how interactants themselves address the complexities of language learning ownership and meaning The book also questions the prevalence of models of intercultural competence which describe the competence of the individual with little recognition of the role of the relationship or interaction Woodin considers the broader applicability of the tandem framework of autonomy and reciprocity and suggests new directions for further research on tandem learning
