**Reasoning and Discourse Processes** Terry Myers,1986      Connectionism in Context Andy Clark,Rudi Lutz,2012-12-06 Connectionism in Context aims to broaden and extend the debate concerning the significance of connectionist models The volume collects together a variety of perspectives by experimental and developmental psychologists philosophers and active AI researchers These contributions relate connectionist ideas to historical psychological debates e g over behaviourism and associationism to develop mental and philosophical issues The result is a volume which addresses both familiar but central topics such as the relation between connectionism and classical AI and less familiar but highly challenging topics such as connectionism associationism and behaviourism the distinction between perception and cognition the role of environmental structure and the potential value of connectionism as a means of symbol grounding The nine essays have been written with an interdisciplinary audience in mind and avoid both technical jargon and heavy mathematics

*Discourse Processes between Reason and Emotion* Patrizia Anesa,Aurora Fragonara,2021-05-08 This book addresses different forms of discourse by analysing the emergence of power dynamics in communication and their importance in shaping the production and reception of messages The chapters focus on specific cognitive aspects such as the verbal expression of reasoning or emotions as well as on linguistic and discursive processes The interaction between reasoning feelings and emotions is described in relation to several fields of discourse where power dynamics may emerge and includes among others political media and academic discourse This volume aims to include representative instances of this heterogeneity and is deeply rooted both theoretically and methodologically in the acknowledgment that the investigation of the complex interaction between reason and emotion in discursive productions cannot be exempt from the adoption of a multidisciplinary perspective By providing a critical reflection of their methodological decisions and describing the implications of their research projects the contributors offer insights which are relevant for students researchers and practitioners operating in the broad field of discourse studies

**Mechanisms of Everyday Cognition** James M. Puckett,Hayne W. Reese,2018-10-24 Based on the proceedings of the twelfth biennial conference on life span developmental psychology most of the contributions in this volume deal with the mechanisms of everyday cognition However a broad spectrum of additional concerns is addressed within the domain of everyday cognition its metatheoretical underpinnings theory and theoretical issues methods of investigation empirical considerations and social issues and applications Addressing everyday cognition in infancy childhood adolescence young and middle adulthood and old age this book is consistent with the chronological life span theme of this series The contributors collectively discuss some of the traditional concerns of life span psychology the dialectical nature of everyday cognition individual differences and contextual influences Leading and concluding chapters provide overview integration and summary In bringing together a wide array of age periods and points of view within the domain of everyday cognition the editors hope that students and researchers in developmental psychology

**Mental Logic** Martin D.S. Braine, David P. O'Brien, 1998-04-01 Over the past decade the question of whether there is a mental logic has become subject to considerable debate There have been attacks by critics who believe that all reasoning uses mental models and return attacks on mental models theory This controversy has invaded various journals and has created issues between mental logic and the biases and heuristics approach to reasoning and the content dependent theorists However despite its pertinence to current issues in cognition few cognitive scientists really know what the mental logic theory is and misapprehensions are prevalent This volume is a comprehensive presentation of the theory of mental logic and its implications for cognition and development including the acquisition of language The theory offered here has three parts Part I is the mental logic per se that contains a set of inference schemas Part II is a reasoning program that applies the schemas in lines of reasoning including a direct reasoning routine and more sophisticated indirect reasoning strategies Part III of the theory is pragmatic proposing that the basic meaning of each logic particle is in the inferences that are sanctioned by its inference schemas

K. Honig,J. Gregor Fetterman,Werner K. Honig,2018-10-24 The study of discrimination and generalization in animals traditionally involves stimuli that are simple uniform and restricted in time or space In recent years the area of stimulus control has been expanded with the use of stimuli that are complex extended in time or space and incorporate or represent natural objects events or locations The contributors

to this unique volume have emphasized controlling functions of complex stimulus events such as location or duration and their relation to cognitive processes in animals. The chapters cover a wide array of topics including spatial cognition, categorization, pattern perception, numerosity discriminations, imagery and spatial tracking, thereby addressing the question of how complex events are perceived, processed and organized. This volume goes beyond other recent books on animal cognition in that it specifically places some well known phenomena within the context of stimulus control.

Cognitive Pragmatics Hans-Jörg Schmid, 2012-08-31. Speakers tend to compose their utterances in such a way that the message they want to get across is hardly ever fully encoded by the meanings of the words and the grammar they use. Instead, speakers rely on hearers adding conceptual and emotive content while interpreting the contextually appropriate meanings and intentions behind utterances. This insight, which is of course particularly relevant in all kinds of indirect, figurative or humorous talk, lies at the heart of the linguistic discipline of pragmatics. If pragmatics is the study of meaning in context, then cognitive pragmatics can be broadly defined as encompassing the study of the cognitive principles and processes involved in the construal of meaning in context. While it would seem only natural that pragmatics as such should have addressed such cognitive issues, anyway, it has mainly been due to the historical rooting of this discipline in the philosophy of language that psychological aspects have not been in the pragmatic limelight to date. Being part of the 9 volume series *Handbooks of Pragmatics*, this volume is the first to systematically survey this terrain from a wide range of perspectives. It collects state of the art contributions by leading experts from the fields of pragmatics, psycholinguistics, cognitive linguistics, clinical linguistics and historical linguistics. The volume is divided into four parts which tackle the following questions:

Part I: The cognitive principles of pragmatic competence. What are the general cognitive principles underlying pragmatic competence? i.e. the skill to arrive at context dependent meanings of utterances. What are the cognitive underpinnings of language users' ability to compute or infer intended meanings in the role of hearers and to give hints as to how to decode intended meanings in the role of speakers?

Part II: The psychology of pragmatics. What are the actual cognitive processes taking place during online construal of meaning in context on the basis of encoded messages? How is pragmatic competence acquired in

childhood What are the types sources and effects of pragmatic disorders i.e. impairments of pragmatic competence Part III The construal of non explicit and non literal meaning in context What are the cognitive principles and processes involved in the construal of meanings of non explicit and indirect utterances How do we process figurative meanings humour and gestures Part IV The emergence of linguistic structures from meaning in context What are the repercussions of the repeated construal of context dependent meanings on linguistic structures and the linguistic system How does the system change under the influence of the construal of meanings in social situations Reduced series price print available degruyter de rhenus com     **Subject-oriented Texts** Hartmut Schröder, 2011-09-08 No detailed description available for Subject oriented Texts

concept of context from a variety of different angles and propose new ways of thinking about it with reference to specific human activities such as face to face interaction radio talk medical diagnosis political encounters and socialisation practices Each essay is prefaced by an introduction by the editors which provides relevant theoretical and methodological background and demonstrates its relation to other essays in the volume The editors general introduction provides a lucid overview of the issues currently debated Rethinking Context will be required reading for everyone working within the fields of linguistic anthropology sociolinguistics discourse analysis pragmatics conversation analysis and the sociology of language
