Tacit Knowledge in Professional Practice Robert J. Sternberg,Joseph A. Horvath,1999-02-01 Those responsible for professional development in public and private sector organizations have long had to deal with an uncomfortable reality Billions of dollars are spent on formal education and training directed toward the development of job incumbents yet the recipients of this training spend all but a fraction of their working life outside the training room in meetings on the shop floor on the road or in their offices Faced with the need to promote continuous learning in a cost effective manner trainers consultants and educators have sought to develop ways to enrich the instructional and developmental potential of job assignments to understand and facilitate the lessons of experience Not surprisingly social and behavioral scientists have weighed in on the subject of on the job learning and one message of their research is quite clear This message is that much of the knowledge people use to succeed on the job is acquired implicitly without intention to learn or awareness of having learned The common language of the workplace reflects an awareness of this fact as people speak of learning by doing or by

osmosis and of professional instinct or intuition Psychologists more careful if not clearer in their choice of words refer to learning without intention or awareness as implicit learning and refer to the knowledge that results from this learning as tacit knowledge Tacit Knowledge in Professional Practice explores implicit learning and tacit knowledge as they manifest themselves in the practice of six knowledge intensive professions and considers the implications of a tacit knowledge approach for increasing the instructional and developmental impact of work experiences This volume brings together distinguished practitioners and researchers in each of the six disciplines to discuss their own research and or professional experience and to engage each other s views It addresses professional practice in its totality from the technical to the interpersonal to the crassly commercial not simply a few aspects of practice that lend themselves to controlled study Finally this edited volume seeks to go beyond the enumeration of critical experiences to an understanding of the psychological mechanisms that underlie learning from experience in professional disciplines and in so doing to lay a foundation for innovations in professional education and training **ECIAIR 2019 European Conference on the Impact of Artificial Intelligence and Robotics** Dr Paul Griffiths ,Dr. Mitt Nowshade Kabir ,2019-10-31 **Moral Psychology Today** David K.
