Rebels And Revolutionaries In North China 1845 1945:

Rebels and Revolutionaries in North China, 1845-1945 Elizabeth J. Perry, 1980 *Warfare in Chinese History* H. J. Van Derven, 2000-01-01 Based on original sources and dealing with the subject from the earliest dynasty up to modernity this book uniquely combines chapters on strategy and tactics Both scope and approach make it a must not only for historians of China but with a view to its conclusions on the place of China in the context of global military history also for historians of comparative warfare in general

The Peasant Economy and Social Change in North China Philip Huang, 1985-06-01 The author presents a convincing new interpretation of the origins and nature of the agrarian crisis that gripped the North China Plain in the two centuries before the Revolution His extensive research included eighteenth century homicide case records a nineteenth century country government archive large quantities of 1930 s Japanese ethnographic materials and his own field studies in 1980 Through a comparison of the histories of small family farms and larger scale managerial farms the author documents and illustrates the long term trends of agricultural commercialization social stratification and mounting population pressure in the peasant economy He shows how those changes in the absence of dynamic economic growth combined over the course of several centuries to produce a majority not simply of land short peasants or of exploited tenants and agricultural laborers but of poor peasants who required both family farming and agricultural wage income to survive This interlocking of family farming with wage labor furnished a large supply of cheap labor which in turn acted as a powerful brake of capital accumulation in the economy The formation of such a poor peasantry ultimately altered both the nature of village communities and their relations with the elites and the state creating tensions that led in the end to revolution

A Decade of Upheaval Dong Guoqiang, Andrew G. Walder, 2021-02-23 A revealing exploration of political disruption and violence in a rural Chinese county during the Cultural Revolution A Decade of Upheaval chronicles the surprising and dramatic political conflicts of a rural Chinese county over the course of the Cultural Revolution Drawing on an unprecedented range of sources including work diaries interviews internal party documents and military directives Dong Guoqiang and Andrew Walder uncover a previously unimagined level of strife in the countryside that began with the Red Guard Movement in 1966 and continued unabated until the death of Mao Zedong in 1976 Showing how the upheavals of the Cultural Revolution were not limited to urban areas but reached far into isolated rural regions Dong and Walder reveal that the intervention of military forces in 1967 encouraged factional divisions in Feng County because different branches of China's armed forces took various sides in local disputes The authors also lay bare how the fortunes of local political groups were closely tethered to unpredictable shifts in the decisions of government authorities in Beijing Eventually a backlash against suppression and victimization grew in the early 1970s and resulted in active protests which presaged the settling of scores against radical Maoism A meticulous look at how one overlooked region experienced the Cultural Revolution A Decade of Upheaval illuminates the all encompassing nature of one of the most unstable periods in modern Chinese history

China's

Motor Hill Gates, 2018-10-18 This monumental work reveals the continuities that underlie the changing surface of Chinese life from late imperial days to modern times With a perspective that encompasses a thousand years of Chinese history China s Motor provides a view of the social economic and political principles that have prompted people in widely varying circumstances to act believe and behave in ways that are labeled as Chinese This original reinterpretation of Chinese culture as meticulous in detail as it is vast in scope will revise not only the study of China but also the very terms of social analysis

Events That Formed the Modern World Frank W. Thackeray, John E. Findling, 2012-05-31 This comprehensive five volume set contains readable essays that describe and interpret the most important global events since the European Renaissance some accompanied by related document excerpts and primary source materials What were the effects of the Age of Exploration on today s ethnic groups and social structure How did the development of moveable type pave the way for Facebook and Twitter Why is the Reformation so critical for understanding today s religious controversies This set will help readers answer these questions by exploring the most significant historical events of the modern world This five volume set covers times from the Renaissance to the present Each volume focuses on a specific historic period and examines 12 events within those time frames that changed the world Each entry provides an introduction that lays out factual material in a chronological manner an in depth essay interpreting the event s significance and an annotated bibliography of the most important current works on the topic Select entries are followed by primary sources pertaining to the event under consideration such as diary entries Targeted to both general readers as well as entry level university students this book also directly supports high school and undergraduate curricula allowing students to identify and contextualize events in order to think critically about their causes aftermath and legacy

Schoolhouse Politicians Helen Roberta Chauncey, 1992-01-01 Scholarly study of the Chinese republic 1911 1949 has traditionally viewed the period through its shortcomings notably its failure to establish a secure political order thus allowing the chaos and violence of national power politics to overshadow formative developments taking place at the local level By focusing on the interaction of local politics and the central state Helen Chauncey argues for the importance of local initiative in defining the post imperial state and suggests a rethinking of our understanding of republican period politics Through the prism of educational circles in central Jiangsu province Schoolhouse Politicians challenges assumptions about local elite conservatism by showing how actively politics were pursued in local municipalities well removed from traditional centers of wealth and power It highlights the activism of political entrepreneurs in the arena of local schooling and interprets the apparent disorderly conduct of local republican politics in terms of the strategies activists used to test their right to public association with the central state and to determine what concerns could be addressed through such an association Pursuing a comprehensive approach to the study of local politics this interpretation is sensitive to political intent in a variety of cultural representations from school journals to teachers assemblies to the physical management of public space such as schoolhouses and exercise yards Schoolhouse Politicians

makes a compelling case for the central importance of its immediate subject the growth of the elementary and secondary educational establishment as well as illuminating larger questions of state building This carefully crafted local history based on pioneering research is of significance to the field of modern Chinese history It is also a valuable addition to the recent comparative literature on state making that seeks by exploring a variety of occupations and social groups neglected by traditional histories to give due importance to those little studied experiences that helped shape the potential and limits of the modern state

The Ecology of War in China Micah S. Muscolino, 2015 This book explores the interplay between war and the environment in Henan Province a hotly contested frontline territory that endured massive environmental destruction and human disruption during the conflict between China and Japan that raged during World War II In a desperate attempt to block Japan's military advance Chinese Nationalist armies under Chiang Kai-shek broke the Yellow River's dikes in Henan in June 1938 resulting in devastating floods that persisted until after the war's end Greater catastrophe struck Henan in 1942-1943 when famine took some two million lives and displaced millions more Focusing on these war-induced disasters and their aftermath this book conceptualizes the ecology of war in terms of energy flows through and between militaries societies and environments Ultimately Micah Muscolino argues that efforts to procure and exploit nature's energy in various forms shaped the choices of generals the fates of communities and the trajectory of environmental change in North China

Bandits in Republican China Phil Billingsley, 1988 A study of banditry in Republican China describing the cycles whereby banditry spread from the impoverished margins geographically and socially of late Qing society into entire provinces by the 1920s

China's Great Proletarian Cultural Revolution Woei Lien Chong, 2002 Treating China's Cultural Revolution as much more than a political event this innovative volume explores its ideological dimensions The contributors focus especially on the CR's discourse of heroism and messianism and its demonization of the enemy as reflected in political practice official literature and propaganda art arguing that these characteristics can be traced back to hitherto neglected undercurrents of Chinese tradition Moreover while most studies of the Cultural Revolution are content to point to the discredited cult of heroism and messianism this book also explores the alternative discourses that have flourished to fill the resulting vacuum The contributors analyze the intense intellectual and artistic ferment in post-Mao China that embody resistance to CR ideology as well as the urgent quest for authentic individuality new forms of social cohesion and historical truth Contributions by Anne Marie Brady Woei Lien Chong Lowell Dittmer Monika Gaenssbauer Nick Knight Stefan R Landsberger Nora Sausmikat Barend J ter Haar Natascha Vittinghoff and Lan Yang

The Republic of China Xavier Paules, 2023-11-08 The declaration of the Republic of China in 1912 signalled an entirely new era Not only did the revolution of 1911-12 bring about the fall of the Qing dynasty it also brought an end to the entire series of dynasties that had marked Chinese history for over two millennia Radical reforms since 1901 had culminated in the ending of the political status quo and the rejection of the very idea of empire Drawing on the most recent historical research Xavier Paul's provides a comprehensive account of the crucial but

chaotic period that stretched from the founding of the Republic of China in 1912 to the civil war of 1945-9 which ended with the victory of the Chinese Communist Party (CCP) and the establishment of the People's Republic of China. Paul's challenges various common claims about this period. It is often assumed that the CCP was instrumental in bringing about key events by skilfully mobilizing the population to serve its ends. Paul argues by contrast that the CCP took advantage of fortunate circumstances and that even then it was only in a position to challenge the supremacy of the Guomindang as late as 1944. His analysis takes a broad view by considering the importance of political actors both within and external to the revolutionary movement, enabling him to offer a balanced interpretation of the republican period which sheds new light on China's political, cultural and economic development.

Force and Contention in Contemporary China Ralph A. Thaxton, Jr, 2016-08-04. Why is contemporary China such a politically contentious place? Relying on the memories of the survivors of the worst catastrophe of Maoist rule and documenting the rise of resistance and protest at the grassroots level, this book explains how the terror, hunger and loss of the socialist past influences the way in which people in the deep countryside see and resist state power in the reform era up to the present day repression of the People's Republic of China's central government. Ralph A. Thaxton Jr provides us with a worm's-eye view of an unknown China, a China that cannot easily or fully be understood through the theories and frameworks of why and how rural people have engaged in contentious politics. This book is a truly unique and disturbing look at how rural people relate to an authoritarian political system in a country that aspires to become a stable world power.

Globalising Migration History, 2014-03-27. Globalizing Migration History is a major step forward in comparative global migration history. Looking at the period 1500-2000, it presents a new universal method to quantify and qualify cross-cultural migrations, which makes it possible to detect regional trends and explain differences in migration patterns across the globe in the last half millennium. The contributions in this volume, written by specialists on Russia, China, Japan, India, Indonesia and South East Asia, show that such a method offers a fruitful starting point for rigorous comparisons. Furthermore, the volume is an explicit invitation to other economic, cultural, social and political historians to include migration more explicitly and systematically in their analyses and thus reach a deeper understanding of the impact of cross-cultural migrations on social change. Contributors are: Sunil Amrith, Ulbe Bosma, Gijs Kessler, Jelle van Lottum, Jan Lucassen, Leo Lucassen, Mireille Mazarin, Adam McKeown, Atsushi Ota, Vijaya Ramaswamy, Osamu Saito, Jianfa Shen, Ryuto Shimada, Willard Sunderland and Yuki Umeno.

China's Revolutions in the Modern World Rebecca E. Karl, 2020-01-28. China's emergence as a twenty-first century global economic, cultural and political power is often presented as a story of what Chinese leader Xi Jinping calls the nation's great rejuvenation, a story narrated as the return of China to its rightful place at the center of the world. In *China's Revolutions in the Modern World*, historian Rebecca E. Karl argues that China's contemporary emergence is best seen not as a return but rather as the product of revolutionary and counter-revolutionary activity and imaginings. From the Taipings in the mid-nineteenth century through nationalist, anti-imperialist cultural and

socialist revolutions to today's capitalist inflected Communist State modern China has been made in intellectual dissonance and class struggle in mass democratic movements and global war in socialism and anti socialism in repression and conflict by multiple generations of Chinese people mobilized to seize history and make the future in their own name Through China's successive revolutions the contours of our contemporary world have taken shape This brief interpretive history shows how

The Origins of the Cultural Revolution Roderick MacFarquhar, 1999-11 This is the final volume in a trilogy that examines the politics personalities economics culture and international relations of China from the mid 1950s to the mid 1960s It seeks to answer the central question Why did Chairman Mao Zedong launch the Cultural Revolution 1966-76 which plunged China into chaos and almost destroyed its Communist Party The Coming of the Cataclysm starts with the great famine of the early 1960s which resulted in tens of millions of deaths and set in train a series of emergency measures that increasingly divided Mao from his comrades in arms His anger that they were prepared to adopt capitalist methods to rescue the country was sharpened by his belief that Moscow had actually gone capitalist and sold out to the imperialist West From 1961 to 1966 the period covered by this volume the increasingly urgent question for Mao was how to prevent a similar revolutionary degeneration in China The Cultural Revolution was his answer Drawing upon new evidence from Party documents personal interviews books and journals MacFarquhar details the growing rift between Mao and his colleagues as they attempted to cope with domestic privation and an increasingly hostile international environment until the Chairman finally decided to smash the unity of the Yan'an Round Table by unleashing society against the party state

Revolution and Its Past R. Keith Schoppa, 2019-07-10 Revolution and Its Past is a comprehensive study of China from the last quarter of the eighteenth century through to 2018 A fascinating and dramatic narrative the book compels interest both as a history of an ancient civilization developing into a modern nation state and as an account of how the Chinese as a people have struggled and continue to work to find their identity in the modern world Beginning in the last two decades of the reign of the Qianlong emperor 1736-1795 the book provides a baseline that allows readers to understand China's rapid decline in the nineteenth and part of the twentieth century and extends into the present day a time when China has the second largest economy in the world and aims to become a leading global power by 2050 The vast changes that have swept over China between these times are probed through the lens of the broad and important theme of identities This fourth edition has been updated throughout providing a more thorough examination of recent history since 1960 and increasing coverage of such topics as new Qing history frontier and ethnicity women and their roles environmental concerns and issues and globalization Supported by maps images tables online eResources and suggestions for further reading and written in an engaging concise and authoritative style Revolution and Its Past is the ideal textbook for all students of the history of modern China

China in War and Revolution, 1895-1949 Peter Zarrow, 2006-06-07 Providing historical insights essential to the understanding of contemporary China this text presents a nation's story of trauma and growth during the early twentieth century It explains

how China's defeat by Japan in 1895 prompted an explosion of radical reform proposals and the beginning of elite Chinese disillusionment with the Qing government. The book explores how this event also prompted five decades of efforts to strengthen the state and the nation, democratize the political system and build a fairer and more unified society. Peter Zarrow weaves narrative together with thematic chapters that pause to address in depth themes central to China's transformation. While the book proceeds chronologically, the chapters in each part examine particular aspects of these decades in a more focused way, borrowing from methodologies of the social sciences, cultural studies and empirical historicism. Essential reading for both students and instructors alike, it draws a picture of the personalities, ideas and processes by which a modern state was created out of the violence and trauma of these decades. [Peasants and Revolution in Rural China](#) Chang

Liu, 2007-05-14. This book explores rural political change in China from 1850 to 1949 to help us understand China's transformation from a weak, decaying agrarian empire to a unified strong nation state during this period. Based on local gazetteers, contemporary field studies, government archives, personal memoirs and other primary sources, it systematically compares two key macro regions of rural China: the North China plain and the Yangzi delta, to demonstrate the ways in which the forces of political change, shaped by different local conditions, operated to transform the country. It shows that on the North China plain, the village community, composed mainly of owner cultivators, was the focal point for political mobilization, whilst in the Yangzi delta, absentee landlordism was exploited by the state for local control and tax extraction. However, these both set the stage in different ways for the communist mobilization in the first half of the twentieth century. *Peasants and Revolution in Rural China* is an important addition to the literature on the history of the Chinese Revolution and will be of interest to anyone seeking to understand the course of Chinese social and political development. **Maoist Insurgency**

Since Vietnam Thomas A. Marks, 2012-12-06. This is an analysis of revolutions based on the Maoist Mode. These insurgencies failed, having been successfully contained by their governments. How did the world's strongest power, America, fail where Third World governments have succeeded? *Accidental Holy Land* Joseph W. Esherick, 2022-02-22. A free open access ebook is available upon publication. Learn more at www.luminosoa.org. Yan'an is China's revolutionary holy land, the heart of Mao Zedong's Communist movement from 1937 to 1947. Based on thirty years of archival and documentary research and numerous field trips to the region, Joseph W. Esherick's book examines the origins of the Communist revolution in Northwest China from the political, social and demographic changes of the Qing dynasty (1644-1911) to the intellectual ferment of the early Republic, the guerrilla movement of the 1930s and the replacement of the local revolutionary leadership after Mao and the Center arrived in 1935. In *Accidental Holy Land*, Esherick compels us to consider the Chinese Revolution not as some inevitable peasant response to poverty and oppression, but as the contingent product of local, national and international events in a constantly changing milieu.
