Recent Developments in Macroeconomics Edmund S. Phelps,1991

Recent Developments in Growth Theory

Daron Acemoglu,2004 This two volume collection examines the major developments in growth theory over the past decade Key papers by leading scholars cover new trends in theoretical and empirical research The first volume shows how new research has improved our understanding of the empirical patterns of economic growth and has posed new challenges for theory The second volume contains articles which have pushed the theory of economic growth in new directions and work which has responded to the challenges raised by empirical research The editor has written an authoritative introduction which presents a comprehensive overview of the selected papers

Recent Developments in Economic Methodology

John Bryan Davis,2006

Recent Developments in Evolutionary Economics

Ulrich Witt,2008 Evolutionary economics is a vital expanding field of research focusing on the incessant transformation of the economy and its driving forces

Highlighting a variety of pressing economic problems explaining causes and arriving at innovative remedies this book considers developments in innovations knowledge transfer and industrial dynamics

Public Goods, Environmental Externalities and Fiscal Competition Parkash Chander,Jacques Drèze,C. Knox Lovell,Jack Mintz,2007-01-16 Over the last forty years the field of public economics has emerged as a modern successor to public finance It has gained importance on the research agenda of economists and in the curricula of economics departments It has become a diversified field rich in theoretical developments and substantive applications Beyond the traditional concerns with taxation or public goods a number of new concerns have entered the scene concerning for instance public sector pricing the management of public firms social security or federalism A comprehensive presentation of the field extends nowadays beyond the scope of textbooks and requires access to a growing specialised literature The present volume collecting 22 papers published by Henry Tulkens over the period 1978-2003 is offered as an illustration of these new developments The illustration has three dimensions approach subject matters and methods Coming from a single author admittedly assisted by 18 co authors the different papers are illustrative of an underlying general approach which I like to label operational public economics With these simple words I mean an approach under which issues in public economics are formulated so as to capture essential elements of actual situations Typically this leads to theoretical models more complex than standard textbook formulations It is then up to the public economist to extend the theory as needed to fit the situation

The Geography of Competition John R.

Miron,2010-03-16 This book provides a comprehensive up to date and expert synthesis of location theory What are the impacts of a firm's geographic location on the locations of customers suppliers and competitors in a market economy How when and why does this result in the clustering of firms in space When and how is society made better or worse off as a result This book uses dozens of locational models to address aspects of these three questions Classical location problems considered include Greenhut Manne Hitchcock Koopmans and Weber Launhardt The book reinterprets competitive location

theory focusing on the linkages between Walrasian price equilibrium and the localization of firms It also demonstrates that competitive location theory offers diverse ideas about the nature of market equilibrium in geographic space and its implications for a broad range of public policies including free trade industrial policy regional development and investment in infrastructure With an extensive bibliography and fresh interdisciplinary approach the book will be an invaluable reference for academics and researchers with an interest in regional science economic geography and urban planning as well as policy advisors urban planners and consultants

The General Theory of Economic Evolution Kurt Dopfer,Jason

Potts,2007-09-27 The first book to chart the development of the field of evolutionary economics this book provides an integrated generic framework to define the rules of an economic system how they are coordinated and the causes and consequences of their change Packed with pedagogical features including essay and tutorial questions case studies and an extensive bibliography this book proposes a new analytic framework for the study of the nature and causes of long run economic growth and development in market systems analyzes the foundations of the neoclassical tradition before developing a thesis through micro meso and macro domains drawing conclusions as to what can be learned from the point of view of policy analysis focuses on an open systems analytical framework and successfully formulates and refines the analytical foundations of a new general theory of economic evolution This volume is essential reading for scholars and students of economic evolution and as well as for anyone who seeks to better understand the complex evolutionary nature of the structure and dynamics of the knowledge based economy in today s society

Future Sustainable Ecosystems

Nathaniel K Newlands,2016-10-03 Future Sustainable Ecosystems Complexity Risk Uncertainty provides an interdisciplinary integrative overview of environmental problem solving using statistics It shows how statistics can be used to solve diverse environmental and socio economic problems involving food water energy scarcity and climate change risks It synthesizes interdisciplinary theory concepts definitions models and findings involved in complex global sustainability problem solving making it an essential guide and reference It includes real world examples and applications making the book accessible to a broader interdisciplinary readership Discussions include a broad integrated perspective on sustainability integrated risk multi scale changes and impacts taking place within ecosystems worldwide State of the art statistical techniques including Bayesian hierarchical spatio temporal agent based and game theoretic approaches are explored The author then focuses on the real world integration of observational and experimental data and its use within statistical models

Institutional Economics Stefan Voigt,2019-04-11 A concise and clear introduction to the new institutional economics that summarizes current knowledge whilst addressing its gaps and weaknesses

The Foundations of Evolutionary Institutional Economics

Manuel Scholz-Wackerle,2013-08-15 Generic institutionalism offers a new perspective on institutional economic change within an evolutionary framework The institutional landscape shapes the social fabric and economic organization in manifold ways The book elaborates on the ubiquity of such institutional forms with regards to their emergence durability and exit in

social agency structure relations Thereby institutions are considered as social learning environments changing the knowledge base of the economy along generic rule sets in non nomological ways from within Specific attention is given to a theoretical structuring of the topic in ontology heuristics and methodology Part I introduces a generic naturalistic ontology by comparing prevalent ontological claims in evolutionary economics and preparing them for a broader pluralist and interdisciplinary discourse Part II reconsiders these ontological claims and confronts it with prevalent heuristics conceptualizations and projections of institutional change In this respect the book revisits the institutional economic thought of Thorstein Veblen Friedrich August von Hayek Joseph Alois Schumpeter and Pierre Bourdieu A synthesis is suggested in an application of the generic rule based approach Part III discusses the implementation of rule based bottom up models of institutional change and provides a basic prototype agent based computational simulation The evolution of power relations plays an important role in the programming of real life communication networks This notion characterizes the discussed policy realms Part IV of ecological and financial sustainability as tremendously complex areas of institutional change in political economy leading to the concluding topic of democracy in practice The novelty of this approach is given by its modular theoretical structure It turns out that institutional change is carried substantially by affective social orders in contrast to rational orders as communicated in orthodox economic realms The characteristics of affective orders are derived theoretically from intersections between ontology and heuristics where interdependencies between instinct cognition rationality reason social practice habit routine or disposition are essential for the embodiment of knowledge This kind of research indicates new generic directions to study social learning in particular and institutional evolution in general

Recent Developments in Environmental Economics Michael Hoel, 2004 This two volume collection includes the most important and influential contributions to environmental economics during the last ten years The articles cover a broad range of topics and the collection gives an excellent overview over the present state of knowledge in the field These timely volumes will be invaluable to students and researchers alike Journal of Economic Literature ,2000 **Elgar Encyclopedia of Behavioural and Experimental Economics** Swee-Hoon Chuah, Robert Hoffmann, Ananta Neelim, 2025-02-12 This Encyclopedia presents a comprehensive account of the complementary forces of behavioural economics a novel field combining psychological insights with analytical economic thinking and experimental economics Rational Machines and Artificial Intelligence Tshilidzi Marwala, 2021-03-31 Intelligent machines are populating our social economic and political spaces These intelligent machines are powered by Artificial Intelligence technologies such as deep learning They are used in decision making One element of decision making is the issue of rationality Regulations such as the General Data Protection Regulation GDPR require that decisions that are made by these intelligent machines are explainable Rational Machines and Artificial Intelligence proposes that explainable decisions are good but the explanation must be rational to prevent these decisions from being challenged Noted author Tshilidzi Marwala studies the concept of machine rationality and compares

this to the rationality bounds prescribed by Nobel Laureate Herbert Simon and rationality bounds derived from the work of Nobel Laureates Richard Thaler and Daniel Kahneman *Rational Machines and Artificial Intelligence* describes why machine rationality is flexibly bounded due to advances in technology This effectively means that optimally designed machines are more rational than human beings Readers will also learn whether machine rationality can be quantified and identify how this can be achieved Furthermore the author discusses whether machine rationality is subjective Finally the author examines whether a population of intelligent machines collectively make more rational decisions than individual machines Examples in biomedical engineering social sciences and the financial sectors are used to illustrate these concepts Provides an introduction to the key questions and challenges surrounding Rational Machines including When do we rely on decisions made by intelligent machines What do decisions made by intelligent machines mean Are these decisions rational or fair Can we quantify these decisions and Is rationality subjective Introduces for the first time the concept of rational opportunity costs and the concept of flexibly bounded rationality as a rationality of intelligent machines and the implications of these issues on the reliability of machine decisions Includes coverage of Rational Counterfactuals group versus individual rationality and rational markets Discusses the application of Moore's Law and advancements in Artificial Intelligence as well as developments in the area of data acquisition and analysis technologies and how they affect the boundaries of intelligent machine rationality

Dynamic Labor Demand and Adjustment Costs Giorgio Galeazzi, Daniel S. Hamermesh, 1992
Comprises a collection of essays by various authors on the subject of labour demand and adjusted labour costs which were previously published between 1962 and 1990

The Economics of Migration: Migration and the natives Klaus F. Zimmermann, Thomas K. Bauer, 2002

Urban and Regional Economics P. C. Cheshire, Alan W. Evans, 1991 Urban and regional economics in contrast to the rest of economics places great emphasis on distance and location and the importance of spatial relationships Urban economics focuses on the city as a centre of economic activity where productivity is increased through many firms being located close to each other and to decision makers in the public sector But because proximity is important distance within the cities is also important and locations within the city will differ in their economic characteristics At the core of regional economics is the concept of the region as a part of the national economy which has distinct characteristics and which because it is spatially separate develops in a different way to the rest of the economy In turn the trajectory of the national economy is influenced by the economic performance of its regions This major new reference collection prepared by leading authorities in the field presents a blend of classic articles examples of the most recent research and surveys of particular topics It will be an essential source of reference for students instructors and researchers with an interest in urban and regional economics
