Redistribute Values Not Wealth:

Capitalism in the 21st Century Guglielmo Carchedi, Michael Roberts, 2022-12-20 Contemporary capitalism is always evolving From digital technologies to cryptocurrencies current trends in political economy are much discussed but often little understood So where can we turn for clarity As Michael Roberts and Guglielmo Carchedi argue new trends don't necessarily call for new theory In *Capitalism in the 21st Century* the authors show how Marx's law of value explains numerous issues in our modern world In both advanced economies and the periphery value theory provides a piercing analytical framework through which we can approach topics as varied as labour profitability automation and AI the environment nature and ecology the role of China imperialism and the state This is an ambitious work that will appeal to both heterodox economists and labour movement activists alike as it demonstrates the ongoing contemporary relevance of Marxist theory to current trends in political economy

Problems in Value Theory Steven B. Cowan, 2020-02-06 *Problems in Value Theory* takes a pro and con approach to central topics in aesthetics ethics and political theory Each chapter begins with a question What Makes Actions Right or Wrong Does Morality Depend on God Do We Need Government Contemporary philosophers with opposing viewpoints are then paired together to argue their position and raise problems with conflicting standpoints Alongside an up to date introduction to a core philosophical stance each contributor provides a critical response to their opponent and clear explanation of their view Discussion questions are included at the end of each chapter to guide further discussion With chapters ranging from why the government should never wage war to what is art and does morality depend on God this introduction covers questions lying at the heart of debates about what does and does not have value

Boundaries and Justice Sohail H. Hashmi, David Miller, 2021-05-11 Despite the supreme political and economic significance of boundaries and ongoing challenges to existing national boundaries scant attention has been paid to their ethics This volume explores how diverse ethical traditions understand the political and property rights reflected in territorial and jurisdictional boundaries It is the first book to bring together thinkers from a range of traditions both religious and secular to discuss the ethics of boundaries Each contributor represents a tradition's views on questions surrounding the use of boundaries to delimit property and political rights What does it mean to own something What resources should not be privately owned What justifies the erection of political boundaries between one people and another How hard should such boundaries be What rights extend to minorities within a state Should territorial boundaries coincide with social ones Does national autonomy have an ethical basis or is it an aspect

of modern power politics Should we aim for a more inclusive community than that afforded by modern nation states Cross chapter dialogue and a substantive conclusion draw out similarities and differences among the traditions represented traditions that include Christianity classical liberalism Confucianism international law Islam Judaism liberal egalitarianism and natural law In addition to the editors the contributors are Nigel Biggar Joseph Boyle Joseph Chan Russell Hardin Will Kymlicka Loren Lomasky Robert McCorquodale Richard B Miller David Novak Sulayman Nyang Michael Nylan Raul C Pangalangan Daniel Philpott Jeremy Rabkin Hillel Steiner M Raquibuz Zaman and Noam J Zohar

Social Classes and Political Order in the Age of Data Georges Kotrotsios, 2022-09-28 Our lives are changing today but what is the single most important factor driving these changes This question is crucial because attempting to answer it can guide us to an understanding of the processes that are impacting our societies The answer will of course come from the historians of the future but there is already no doubt that the advent of data is behind a radical shake up of our way of living Monetary assets infrastructure equipment and human labor all allow wealth to be created Data does too and it is reasonable to consider a new production factor in this regard data capital This book argues that this new production factor generates innumerable economic opportunities of a nature unthought of a mere twenty years ago These opportunities have led to the creation of a new social class composed of two subclasses data workers and data owners The emergence of this new class repositions existing classes including the traditional working class and the capitalist class creating strong divergences that threaten social cohesion What can we do to ensure cohesion and the proper functioning of society The book argues for the establishment of a regulatory framework and the institutions necessary if we are to open data up and where appropriate exchange and trade it all on a global scale In this regard the state today still playing its traditional role of framework setter and savior when crises loom can become an active economic player thus creating wealth for communities
