Redrawing The Map Of Europe:

Redrawing the Map of Europe M. Emerson, 1998-09-07 Michael Emerson draws on a rare experience of Europe's new political and economic structures from Brussels to Moscow to explain Europe's contradictory tendencies towards both integration and conflict. He confronts the two strategic issues for the Europe of the early 21st century: how to ensure success for the Euro and how to stabilise the wider Europe with a strong structure for EU-Russian relations. He draws distinctions between the different Europes: geographic Europe, the European Union, Security Europe based around NATO, and the emerging Civil Europe. The author argues that Civil Europe could be the basis of a new European golden age and outlines the far-reaching institutional and cultural changes required to achieve this. Redrawing the Map of Europe Michael Emerson, 1996 **Maps Redrawn** Amelia Khatri, AI, 2025-02-12 *Maps Redrawn* explores the captivating history of maps, demonstrating how they've shaped our world, reflecting not just geography but also power dynamics and cultural perspectives. The book argues that maps are subjective creations influenced by the biases and knowledge of their makers, challenging the notion of maps as neutral representations. It highlights how cartographic errors or deliberate distortions have had real-world consequences, influencing territorial claims and international relations. The book begins by introducing fundamental cartographic principles and tracing the history of mapmaking from ancient times to the Renaissance. It then examines instances of lost lands that once appeared on maps but were later removed as scientific knowledge expanded. Progressing further, the book delves into border disputes and political cartography, analyzing how maps have shaped national identities and fueled conflicts, offering a comprehensive understanding of the interplay between maps, history, and geopolitics. It now lives on at LIFE.com, the largest most amazing collection of professional photography on the internet. Users can browse, search, and view photos of today's people and events. Presents a comprehensive discussion of the origins, events, campaigns, and personalities of World War II. **Boundaries and Borders in the Post-Yugoslav Space** Nenad Stefanov, Srdjan Radović, 2021-10-25 The disintegration of Yugoslavia, accompanied by the emergence of new borders, is paradigmatically highlighting the relevance of borders in processes of societal change, crisis, and conflict. This is even more the case if we consider the violent practices that evolved out of populist discourse of ethnically homogenous bounded space in this process that happened in the wars in Yugoslavia in the 1990s. Exploring the boundaries of Yugoslavia is not just relevant in the context of Balkan area studies but the sketched phenomena acquire much wider importance and can be helpful in order to better understand the dynamics of bordering societal space that are so characteristic for our present situation.
