Bruni, 2007-01-01 This book is a welcome consolidation and extension of the recent expanding debates on happiness and economics Happiness and economics as a new field for research is now of pivotal interest particularly to welfare economists and psychologists **Marginal Revolution in Economics** Toru Maruyama, 2024-01-02 This volume is devoted to a reappraisal of the Marginal Revolution on the occasion of its 150th anniversary The year 1871 should be remembered as one of the most important turning points in the history of economics W S Jevons C Menger and L Walras published epochal works at the very beginning of the 1870s Although these works were written independently they shared a common mathematical structure based on classical analysis For this reason the emergence of the trio is called the Marginal Revolution Indeed 1871 is the starting point of modern economics in the proper sense In 1971 several academic conferences were held on the occasion of the 100th anniversary of the Revolution which exerted the stimulating influence upon the historical researches into the Revolution Now more than fifty years have passed since then Economic theory has experienced further substantial changes in researchers' central interest the way of reasonings and the styles of description during this period In view of the new achievements acquired in recent fifty years it seems an indispensable task for us to review and reevaluate the Marginal Revolution based upon the present status of economics We also keep in mind that some concepts and doctrines once discarded could reappear in a later stage of history in a more or less transfigured form The introductory chapter will be a guide for readers not only from the economics community but also from the mathematics community **A History of Italian Economic Thought** Riccardo

Faucci,2014-04-03 This book provides the non Italian scholar with an extensive picture of the development of Italian economics from the Sixteenth century to the present The thread of the narrative is the dialectics between economic theory and political action where the former attempts to enlighten the latter but at the same time receives from politics the main stimulus to enlarge its field of reflection This is particularly clear during the Enlightenment Inside this book insists on stressing that Galiani Verri and Beccaria were economists quite sensitive to practical issues but who also were willing to attain generally valid conclusions In this sense pure economics was never performed in Italy Even Pareto used economics and sociology in order to interpret and possibly steer the course of political action Within this book it illustrates the Restoration period 1815-48 There was a slowdown of the economists engagement due to an adverse political situation that prompted the economists to prefer less dangerous subjects such as the relationship between economics morals and law the main interpreter of this attitude was Romagnosi After 1848 however in parallel with the Risorgimento cultural climate a new vision of the economists task was eventually manifested Between economics and political Liberalism a sort of alliance was established whose prophet was F Ferrara While the Historical school of economics of German origin played a minor role Pure Economics 1890-1940 approx had a considerable success as regards both economic equilibrium and the theory of public finance Consequently the introduction of Keynes s ideas was rather troubled Instead Hayek had an immediate success This book concludes with a chapter devoted to the intense relationships between economic theories economic programmes and political action after 1945 Here the Sraffa debate played an important role in stimulating Italian economists to a reflection on the patterns of Italian economy and the possibilities of transforming Italy s economic and social structure **Economic**

Thought and Policy in Less Developed Europe Maria Eugenia Mata,Michalis Psalidopoulos,2001-12-06 The essays in this volume explore and discuss the process of dissemination of economic ideas among Europe s less developed countries and regions as well as the interaction between economic thought and economic policy in different times and places during the nineteenth century The comparative approach adopted sheds new light on the course of economic development in Europe s less developed countries in the nineteenth century and the role played by political economy Amongst a host of others the topics covered include economic policy in Denmark monetary and trade policy in Norway the influence of the German Historical School in Finland land Reform and the abolition of serfdom in Russia and in Poland With contributions that disclose important insights into national traditions in economic thought and policy and the diffusion of ideas in Europe this work will be essential reading for all scholars of the history of economic thought
