

Self-Reflection on Therapist Work

"Perceptions of the aged's worth, as well as their demographic and socioeconomic status have varied enormously according to historical time and societal context" (Achenbaum & Stearns, 1978). As discussed in the text, attitudes and perspectives on older women and men throughout history have been both positive and negative. For example, the Greeks and the Romans viewed the aging process as unappealing, whereas Native American groups viewed their elders in a more positive light and they respected and valued them (Bonder & Bello-Haas, 2018). In contemporary society, because I have more than a few members of my immediate and extended family in the 65+ age range appearing to be living life to the fullest, I do not believe I have any preconceived perceptions about this population. These individuals that I refer to are my role models for successful aging. "Older adults' attitudes and behavior differ in ways than can dramatically affect their quality of life and life satisfaction" (Bonder & Bello-Haas, 2018). As I reflect on these family members, I notice that they accept the physical and psychosocial changes that are a natural progression of the aging process. For example, when their loss of hearing began to negatively impact their daily lives, they were proactive in pursuing medical help and now wear hearing aids. Also, in retirement, they pursued new interests and cultivated a new group of new friends. Therefore, I see these people as making proactive decisions that influence their aging and daily lives. Of course, on the other hand, there are those individuals that do not appear to age well. So many factors impact the aging process. Components such as genetics, socioeconomic, health care, personality, and lifestyle choices. For example, they may suffer from painful diseases, live in isolation, or simply make poor lifestyle choices. They may choose to smoke, eat poorly, ignore doctor's orders, or fail to exercise. Each experiences aging uniquely. As a professional, it is important to be cognizant of the significant changes that occur during later life as we treat individuals in this age bracket. "Later life is characterized by significant change —change in physical capacity, change in roles, change in family constellations, change in living arrangements. All these changes can present daunting challenges in the absence of a sense of purpose and meaning" (Bonder & Bello-Haas, 2018). Therefore my role as an occupational therapist will be to help my clients navigate the aging process by helping them adapt to these inevitable changes so they can continue to live life to the fullest. I believe working with the elderly is very similar to working with other populations because each client/patient is unique. We treat the 'whole person' and age is one of the factors to be considered. If we understand that aging is a process that each person experiences in their own way, then preconceived notions should not exist or interfere with treatment. Aging is a continuum and occupational therapists need to be knowledgeable at all points on this continuum to best serve our clients. My therapeutic use of self is encouraged, motivated and determined by the set of client factors that I am presented with...

Byram Karasu, 2001-07-01 T. Byram Karasu says that healing at best is not what the healer does but what he is that what really matters are not the schools of psychotherapy but the psychotherapists themselves In this deeply moving and self-revealing book Karasu portrays the therapist as healer through a series of clinical vignettes from the treatment of a younger therapist whom the author perceives to be more intelligent, talented and better educated than himself This patient, a veteran of a classical analysis and two lengthy therapies, challenges the therapist at every turn and engages him in a search for new experiential truths The reader is privy to the internal monologue of the therapist as he conceives of and rejects interpretations, looks to varied experts for help and ends with an inner voice not heard before **Essence of Healing** Dr. Arthur Mones, 2021-11-30 Dr. Arthur Mones reflects on a 45-year career in psychotherapy and points out what has worked and what mistakes he's made to provide guidance for new and seasoned practitioners Dr. Mones traces his own career development in parallel with the historical changes in psychotherapy The reader is introduced to the Internal Family Systems (IFS) orientation that guides Dr. Mones' practice and learns how this system can be applied to conceptualize client symptomology from an adaptive strength-based framework to help clients experience improved mental health Case examples illustrate the use of IFS as a practical treatment for a variety of psychiatric disorders Callout text, illustrated notation, guided exercises and questions and defined terms make the text interactive and engaging making the book suitable for use as a teaching aide in a class for practitioners to learn a new approach to family therapy for those interested in learning more about their own mental health and useful strategies to improve functioning or for clinicians to find companionship in the
